red teaming is a revolutionary new way to make critical and contrarian thinking part of the planning process of any organization allowing companies to stress test their strategies flush out hidden threats and missed opportunities and avoid being sandbagged by competitors today most if not all established corporations live with the gnawing fear that there is another uber out there just waiting to disrupt their industry red teaming is the cure for this anxiety the term was coined by the u s army which has developed the most comprehensive and effective approach to red teaming in the world today in response to the debacles of its recent wars in iraq and afghanistan however the roots of red teaming run very deep to the roman catholic church s office of the devil s advocate to the kriegsspiel of the prussian general staff and to the secretive aman organization israel s directorate of military intelligence in this book author bryce hoffman shows business how to use the same techniques to better plan for the uncertainties of today s rapidly changing economy red teaming is both a set of analytical tools and a mindset it is designed to overcome the mental blind spots and cognitive biases that all of us fall victim to when we try to address complex problems the same heuristics that allow us to successfully navigate life and business also cause us to miss or ignore important information it is a simple and provable fact that we do not know what we do not know the good news is that through red teaming we can find out in this book hoffman shows how the most innovative and disruptive companies such as google and toyota already employ some of these techniques organically he also shows how many high profile business failures including those that sparked the great recession could easily have been averted by using these approaches most importantly he teaches leaders how to make red teaming part of their own planning process laying the foundation for a movement that will change the way america does business
