The Competitiveness of Tropical Agriculture

2016-12-27

the competitiveness of tropical agriculture a guide to competitive potential with case studies describes and synthesizes existing methodologies for evaluating competitiveness in agriculture introduces extensions and refinements and provides a novel approach based on a combination of quantitative and qualitative methodologies as exports of tropical fruit nuts and other high value crops have been growing very rapidly from developing countries but often encounter serious obstacles in their value chains this book demonstrates how national agricultural policy is oftentimes not guided by considerations of inherent competitiveness in addition the book presents case studies that illustrate the application of these approaches using quantitative frameworks a concluding chapter introduces policy considerations for competitiveness from work in Jordan Colombia Estonia Peru and elsewhere also discussing the role of specific policies in raising competitiveness sustainably and its role in reducing rural poverty presents evaluations of 105 agricultural products including crops livestock outputs aquaculture products and forestry products explores insights not found in other competitiveness studies including spatial variation within a country for the same crop relation to the use of skilled labor and above all the role of value chain issues in determining competitiveness includes analysis of results such as assessing sector wide effects on employment

and income of policies that help align the sector with its competitive advantage

Interregional Competition in Agriculture

1951

agricultural planning individual or national depends on an understanding of competition in farm products between one region of the united states and another the agriculture of different parts of the united states competes constantly with that of other parts as for example the early competition in cotton between the northern frontier and southern growers later between the southwest frontier and the old south and recently between california and the south there is equally strong competition between potato growing regions it is this inter regional competition in a country with no trade barriers which two outstanding economists analyze in this book they present the results of a concrete study of one outstanding example competition in dairy production between the northeastern states and the lake states of the central midwest for the new england market for fluid milk and cream six selected sample areas were analyzed carefully in each region in 1935 36 and predictions were made about future production and marketing of dairy products in each of these areas ten years later these areas were surveyed and the production changes compared with the predictions the authors conclusions about the conditions under which new england will be able to continue to compete with the lake states for the new england market are significant in

themselves even more important however is the development of a method of analysis which can be widely employed to furnish the information which is needed to guide future developments in the agriculture of the united states or in any other country this study is therefore an important contribution to the theory of interregional and international trade

Competition in Agriculture

2000

meet the challenges facing the u s agricultural market within the global arena economists agricultural scientists farm leaders and trade specialists will find the information they need to determine the importance of specific crops and livestock products in international markets in competition in agriculture analyzing costs quality and policy impacts on such products as beef dairy pork poultry corn cotton fruits peanuts rice soybeans vegetables and wheat competition in agriculture provides you with an understanding of international markets to help you design strategies that will increase competitiveness and prevent losses complete with research findings tables graphs and studies of domestic and foreign economic and trade policies this book will help you improve your export capabilities and streamline trade costs in order to maximize market presence this comprehensive book provides you with information from economic analyses that will help you determine the capability of important agricultural commodities to prosper in the growing international market competition in agriculture offers you in

depth information that will assist you in enhancing and improving your status in the global marketplace this valuable book discusses the three aspects of competitiveness economic policies geography and history to help you understand the factors that influence competitive positioning of agricultural products defines competitiveness and examines factors that influence competitiveness such as advances in technology input costs production economies production quality and enterprise differentiation promotion and external factors such as government policies and macroeconomic variables analyzes the dramatic effects the north american free trade agreement has had on the u s and the world market examines how biotechnology affects the quality and quantity of crops and the implications this has on the world market investigates changing market trends that are influenced by new technologies alternative methods of expanding trade new economic and agricultural policies of the united states and other countries and new or modified trade agreements among others offering effective approaches for measuring and understanding competitiveness this knowledgeable reference gives you strategies for maximizing the potential of major crop and livestock products competition in agriculture will help you meet the challenges facing the u s agricultural market within the global arena in order to improve the quality of food and maintain and increase export revenues in the united states

Competitive Agriculture

2021

the book combines food security and agricultural competitiveness issues and treat them together it starts with definitions and evolution of both concepts followed by reviews on global and regional food security challenges the book identifies global agricultural trade and competitiveness patterns and uses it as a basis for analysing global food security further the book also identifies countries regions products groups and develops a typology of agricultural competitiveness giving policy lessons and recommendations on how to increase national regional global agricultural competitiveness to achieve sustainable food security goals the motivation behind writing such a book are numerous first as researchers interested in both food security and agricultural competitiveness issues we have always found a gap in the scientific literature in treating the two notions together second as lecturers of various agricultural policy and food security related courses we have many times been faced with questions related to the competitive positions of different countries and the factors lying behind these positions third as economic advisors we have been faced

with the need to provide clear policy recommendations and lessons on how increase competitiveness and associated food security many times such a need is mainly coming from developing country policy and decision makers we think the book is unique in many ways first it provides a consistent analysis of global agricultural trade patterns over 25 years second it analyzes and synthetizes the definitions concepts and measurement methods of competitiveness covering a major gap in the current literature third it establishes a link between the analysis of global agricultural competitiveness and food security which is also an understudied area finally the book provides policy lessons to increase a country s agricultural competitiveness and food security by identifying its determinants

Competitive Strategy Analysis For Agricultural Marketing Cooperatives

2019-03-11

this book contributes to broadening the interdisciplinary knowledge basis for the description analysis and assessment of land use practices it presents conceptual advances grounded in empirical case studies on four main themes distal drivers competing demands on different scales changing food regimes and land water competition competition over land ownership and use is one of the key contexts in which the effects of global change on social ecological systems unfold as such understanding these rapidly changing dynamics is one of the most pressing challenges of global change research in the 21st century this book contributes to a deeper understanding of the manifold interactions between land systems the economics of resource production distribution and use as well as the logics of local livelihoods and cultural contexts it addresses a broad readership in the geosciences land and environmental sciences offering them an essential reference guide to land use competition

Investing in the National Research

Initiative

1994-02-01

our nation faces daunting challenges to its food and fiber system and to the condition of our natural resources in the coming decades rapid increases in world population and the pressure on resources generated by increasing per capita consumption as a result of increasing per capita income challenge the very basis of our standard of livingâ our food fiber and natural resource base as the nation faces the challenges new technologies and new information systems are changing the face of biologic research the us department of agriculture usda has traditionally been the nation s primary public research engine in food fiber and natural resources the national research initiative competitive grants program nri is a small part of that usda research effort but it accounts for a substantial portion of the nation s merit based peer reviewed fundamental research efforts in food fiber and natural resources in 1997 usda asked the national research council board on agriculture now the board on agriculture and natural resources to conduct an independent assessment of the nri program specifically usda asked the research council to perform a retrospective assessment of the quality and value of research funded by the program determine whether the science and technology priorities in the major nri programs are defined appropriately assess how nri activities complement other usda programs those of other federal agencies and state programs in the private sector and recommend the nature and content of changes for the future this report summarizes the results of the committee s

analysis chapter 2 summarizes the value of food fiber and natural resources research to the united states focusing on economic contributions and rates of return of food and fiber research the committee s analysis of the quality value fairness relevance and responsiveness of the nri competitive grants program is presented in chapter 3 chapter 4 presents the committee s analysis of the role and scope of the nri including its scientific objectives its value in training and education and its complementarity with other research activities the committee s analysis of nri s priority setting process and its research priorities is given in chapter 5 the committee s analysis of organizational and funding issues is given in chapter 6 chapter 7 presents the committee s recommendations to improve the effectiveness of the nri program additional supporting materials are found in appendixes a through i

Competitiveness and Protection in World Agriculture

1989

this book provides an analysis of funding for agricultural research in the united states and presents a proposal to strengthen this system its premise is that a judicious but substantial increase in research funding through competitive grants is the best way to sustain and strengthen the u s agricultural food and environmental system the proposal calls for an increased public investment in research a broadened scientific scope and expanded program areas of research and four categories of competitively awarded

grants with an emphasis on multidisciplinary research

A COMPETITIVE BOOK ON AGRICULTURE

2023-03-01

this book describes how competition between plant species and succession in plant ecosystems operate in grasslands and grazed pastures both natural and sown it discusses how competition both affects botanical structure productivity and persistence of pastures and is itself regulated by biological environmental and management factors such as grazing animals the book also examines the ways in which competition and succession are analysed evaluated and measured and brings to the agricultural arena the considerable progress made in understanding the principles of competition from theoretical and experimental ecology

Competitive Issues in Agriculture and the Food Marketing Industry

2000

this book analyzes the implications of the trend toward increased seller concentration due to mergers and leveraged buyouts that have helped increase food firm stock prices 900 during the 1980s it is an essential reading for industrial organization economists and agricultural marketing economists

Agriculture For Competitive Examinations

2020-11-25

the knowledge on agriculture is continuously improved updated and disseminated it is also important that the review and inventory of the state of the art in agriculture objectives questions and best practices should be shared widely among agriculture practitioners educators and scholars through competitive examinations there is direct recruitment for admission and high position in our education system the pattern followed is m c q s or objective type questions in such examinations the book is a repository of more than 6 000 objective questions which calls for quick answering for success within a specified period in the examinations a sincere effort has been made by different authors to present them in most easy short and understandable language for the benefit of students teachers and those who are interested in agriculture and agricultural extension majorly all different aspects of agriculture discipline are provided in the book which are a part of various agricultural universities syllabi this book will be of great service to the students aiming for higher level competitive examination such as net ars jrf srf ug and pg entrance examinations

Land Use Competition

2016-07-29

this open access book provides a clear holistic conceptual framework of ciss f competitiveness inclusiveness sustainability scalability and access to finance to analyse the efficiency of value chains of high value agricultural commodities in india it is based on the understanding that agriculture is an integrated system that connects farming with logistics processing and marketing farmer s welfare being central to any agricultural policy makes it very pertinent to study how a value chain works and can be strengthened further to realize this policy goal this book adds value to the existing research by studying the value chains end to end across a wide spectrum of agricultural commodities with the holistic lens of ciss f it is not enough that a value chain is competitive but not inclusive or it is competitive and inclusive but not sustainable the issue of scalability is very critical to achieve macro gains in terms of greater farmer outreach and sectoral growth the research undertaken here brings out some very useful insights for

polycymaking in terms of what needs to be done better to steer the agricultural value chains towards being more competitive inclusive sustainable and scalable the value chain specific research findings help draw very nuanced policy recommendations as well as present a big picture of the future direction of policy making in agriculture

National Research Initiative

2000-09-08

during our preparation we found that agriculture created enormous job opportunities in teaching research extension industrial and financial institutions which are base on all those examinations conducted by indian council of agricultural research icar

Investing in Research

1989-02-01

fundamentals of agriculture for competitive exams in agriculture discipline contains 6 chapters in volume i and 7 chapters in volume ii covering all disciplines of agriculture the chapters included general agriculture agricultural climatology genetics plant breeding biotechnology plant physiology biochemistry seed technology and agronomy in volume i and soil science agricultural microbiology horticulture entomology plant pathology agriculture extension agriculture economics and agriculture statistics in volume ii have given due importance and whole syllabus is

covered as per icar saus syllabus and guidelines each chapters contains very short types of descriptive questions recent precise information and development in the field of agriculture have been incorporated in the book for the overall benefit of the student in the discipline of agriculture we have made this book exclusively in such a way that it hands out not only solutions but also detailed explanations though these detailed and thorough explanation student can learn the concepts which will enhance their thinking and learning ability thus this book may be useful not only to students but also teachers researchers extension workers and development officers for reference and easy answering of many complicated questions of all related disciplines of agriculture fundamentals of agriculture covers the course contents of competitive examinations like ias ifs pcs ars banking services b sc m sc ph d ag admission states and national levels of different competitions in agriculture the entire book is prepared in most simple clear talking language comprehensive and short descriptive types of questions so that the concepts could be easily understand by the readers in short times hence this book can solve as a single platform for preparation of different competitive examinations in agriculture
