Minnesota in the Spanish-American War and the Philippine Insurrection

1923 in 1975 workers at life science products a small makeshift pesticide

factory in hopewell virginia became ill after exposure to kepone the brand

name for the pesticide chlordane they made the poison under contract

for a much larger hopewell company allied chemical life science workers

had been breathing in the dust for more than a year ingestion of the

chemical made their bodies seize and shake news of ill workers

eventually led to the discovery of widespread environmental contamination

of the nearby james river and the landscape of the small working class

city not only had life science dumped the chemical but so had allied when

the company manufactured it in the 1960s and early 1970s the resulting

toxic impact was not only on the city of hopewell but also on the faraway

fields where kepone was used as an insecticide aspects of this

environmental tragedy are all too common corporate avarice ignorance

and regulatory failure combined with race and geography to determine

toxicity and shape the response but the kepone story also contains some surprising medical legal and political moments amid the disaster with poison powder gregory s wilson explores the conditions that put the kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975 although the manufacture and use of kepone is now banned by the environmental protection agency organochlorines have long half lives and these toxic compounds and their residues still remain in the environment

Publications 1923 remembering glen christie is about a now vanished village that was north of hespeler cambridge ontario the history photos stories and memories of those that lived there with guest contribution from puslinch township historian marjorie clark
