this volume collects twenty nine published and unpublished papers by the linguist james gair considered the foremost western scholar of the sri lankan languages sinhala and jaffna tamil ranging over thirty years his work also considers issues in a variety of indian languages including hindi marathi tamil malayalam and bengali the collection reflects the wide range of gair s interests from morpho syntactic questions to questions regarding historical and areal linguistics especially language contact and diglossia and extending to language acquisition by collecting these papers and making them newly accessible this volume will provide an important resource not only for scholars of these languages but for linguists interested in the theoretical issues gair explores sinhala is one of the official languages of sri lanka and the mother tongue of over 70 of the population outside sri lanka it is used among immigrant populations in the u k north america australia and some european and middle eastern countries as for the genetic relation it belongs to the indo aryan branch of the indo european languages although the earliest surviving literature in sinhala dates from the 8th century a d its written tradition has traced a longer path of more than 2 000 years among the major topics covered in this volume are the writing system phonology morphology grammatical constructions and discourse and pragmatic aspects of sinhala written in a clear and lucid style the book presents a rich sampling of the data and serves a useful typological reference therefore this is required reading for not only linguists and sinhala specialists but also to anyone interested in language thought and culture universal grammar ug is a theory of both the fundamental principles for all possible languages and the language faculty in the initial state of the human organism these two volumes approach the study of ug by joint tightly linked studies of both linguistic theory and human competence for language acquisition in particular the volumes collect comparable studies across a number of different languages carefully analyzed by a wide range of international scholars the issues surrounding cross linguistic variation in heads projections and learnability volume 1 and in binding dependencies and learnability volume 2 are arguably the most fundamental in ug how can principles of grammar be learned by general learning theory what is biologically programmed in the human species in order to guarantee their learnability what is the true linguistic representation for these areas of language knowledge what universals exist across languages the two volumes summarize the most critical current proposals in each area and offer both theoretical and empirical evidence bearing on them research on first language acquisition and formal learnability theory is placed at the center of debates relative to linguistic theory in each area the convergence of research across several different disciplines linguistics developmental psychology and computer science represented in these volumes provides a paradigm example of cognitive science research on language universals and research on linguistic typology are not antagonistic but rather complementary approaches to the same fundamental problem the relationship between the amazing diversity of languages and the profound unity of language only if the true extent of typological divergence is recognized can universal laws be formulated in recent years it has become more and more evident that a broad range of languages of radically different types must be carefully analyzed before general theories are possible typological comparison of this kind is now at the centre of linguistic research the series empirical approaches to language typology presents a platform for contributions of all kinds to this rapidly developing field the distinctive feature of the series is its markedly empirical orientation all conclusions to be reached are the result of a deepened study of empirical data general problems are focused on from the perspective of individual languages language families language groups or language samples special emphasis is given to the analysis of phenomena from little known languages which shed new light on long standing problems in general linguistics the series is open to contributions from different theoretical persuasions it thus reflects the methodological pluralism that characterizes the present situation care is taken that all volumes be accessible to every linguist and moreover to every reader specializing in some domain related to human language a deeper understanding of human language in general based on a detailed analysis of typological diversity among individual languages is fundamental for many sciences not only for linguists therefore this series has proven to be indispensable in every research library be it public or private which has a specialization in language and the language sciences to discuss your book idea or submit a proposal please contact birgit sievert the indo aryan languages are spoken by at least 700 million people enhanced significantly by six indexes 1 index of languages 2 diglossia in literature 3 historically oriented works 4 pedagogically oriented works 5 theoretical works and 6 theses and dissertations the first book to apply the latest methodological analysis to the languages of south asia the teaching and acquisition of south asian languages provides a much needed examination of learners and their learning patterns language materials and their delivery classroom environments and learning conditions beyond the classroom the contributors accredited researchers and experienced teachers test important universal learning hypotheses on less commonly taught languages and find that those circumstances have significant implications for theory and practice the book brings into focus a variety of issues related to linguistic theory second language acquisition research non verbal communication discourse appropriateness learner variation and strategies for developing speaking listening and reading skills it is also a valuable addition to the general body of knowledge in the field of adult language acquisition a carefully prepared index and an extensive bibliography covering both the south asian field and general literature enhance the book s usefulness as a reference guide this book brings together novel work on the semantics and pragmatics of certain indefinite expressions that also convey modality these epistemic indefinites are determiners or pronouns that signal ignorance on the part of the speaker such as german irgendein and spanish algún the sentence maría se casó con algún medico maria married some doctor or other both makes an existential statement that there is a doctor that maria married and signals the speaker s inability or unwillingness to identify the doctor in question although epistemic indefinites have featured in recent semantic literature a full understanding of the phenomenon is still lacking there is currently no agreement on the source of their epistemic component there is insufficient cross linguistic data to develop a semantic typology of these items and the parallelisms and differences between epistemic indefinites and other expressions that convey epistemic modality have not been explored in depth in this volume a team of experts in the field offer novel empirical observations and important theoretical insights on epistemic indefinites and related topics such as modal free relatives modified numerals and epistemic modals they provide a coherent overview of the issues that shape the subject as well as placing them in the context of current semantic research moving towards the development of a semantic typology of epistemic indefinites that explores the place of these expressions within a general typology of modal items this book now available in paperback traces the key evolutions in the development of the concept of human security the various definitions and critiques how it relates to other concepts and what it implies for polities politics and policy human security is an important subject for the whole world in particular asia as it deals with interactions among fields of social change such as development conflict resolution human rights and humanitarian assistance in a globalizing world in which threats become trans national and states lose power security can no longer be studied in a one dimensional fashion written by authors who are experts in this field and with case studies from different regions afghanistan central asia and south asia presented throughout this book now available in paperback contributes to this new multidimensional conception of security analyzes its strengths and weaknesses and focuses on its implications for analysis and action this book constitutes the thoroughly refereed proceedings of the second international joint conference on natural language processing ijcnlp 2005 held in jeju island korea in october 2005 the 88 revised full papers presented in this volume were carefully reviewed and selected from 289 submissions the papers are organized in topical sections on information retrieval corpus based parsing mining rule based parsing summarization named entity recognition linguistic resources and tools discourse analysis semantic analysis nlp applications tagging language models spoken language and terminology mining it includes all the cbse all examination question papers delhi and outside delhi from 2014 to 2020 fully solved what allows children to acquire language so effortlessly with such speed and with such amazing accuracy capitalizing on the most recent developments in linguistics and cognitive psychology this volume sheds new light on the what why and how of the child s ability to acquire one or more languages the handbook is one of a kind in a number of respects it includes state of the art treatments of acquisition from a variety of theoretical viewpoints ranging from functionalist approaches and the implications of the creolization of languages for the study of acquisition to the relevance of chomsky s minimalist program it contains overviews of the acquisition of all components of linguistic structure treats the acquisition of the sign languages of the deaf and discusses the specific problems of bilingual acquisition this

handbook addresses the following questions is the capacity for language acquisition constant throughout the career of the language learner that is is it continuous or does that capacity change in significant ways as the learner matures is the language capacity a separate module of the mind or does it follow from general all purpose cognitive capacities what is innate in language acquisition and what is acquired on the basis of experience what research methodological issues arise in the study of child language acquisition how might input from the language or languages of the environment including visual gestural input in the case of the sign languages of the deaf affect the process and result of acquisition and how are the facts of non normal acquisition to be explained have we reached an end to the era of peaceful third party intervention in conflict management and resolution in the 1990s with the ending of the cold war the intervention of third parties as a non violent means of negotiating settlements of intra state conflicts gained prominence but the emphasis in the twenty first century has been increasingly on military responses peaceful intervention in intra state conflicts norwegian involvement in the sri lankan peace process is an in depth impartial discussion on the background decision making processes and procedures and related actions in the norwegian facilitated peace process in sri lanka that gradually shifted towards a military solution it provides the reader with evidence based comprehensive analysis on the attempts of peaceful third party intervention in a complex ethno separatist intra state conflict since the third century bce when the king of sri lanka converted to buddhism the island nation off the southern coast of india has represented a central interest of buddhist scholarship the association between its politics and religious life has not always remained harmonious however and has contributed to the contemporary turmoil that threatens to tear it apart in this valuable book renowned religious scholar bardwell smith elucidates the history of buddhism in sri lanka from the time of one of its earliest rulers through to its present day strife the essays collected here for the first time explore various themes of sri lanka s long history in novel and constructive ways topics include sinhala buddhists sense of manifest destiny arising from sri lanka s oldest historical chronicles the mahavamsa and the dipavamsa the nationalist implications of the chronicles depiction of the third century mahavihara monastery as the site of original buddhism and concepts of order and legitimation of power in ancient ceylon with a new introduction and final chapter smith sheds fresh light on today s sri lanka connecting historical studies with contemporary issues this two volume set consisting of Incs 7181 and Incs 7182 constitutes the thoroughly refereed proceedings of the 13th international conference on computer linguistics and intelligent processing held in new delhi india in march 2012 the total of 92 full papers were carefully reviewed and selected for inclusion in the proceedings the contents today the notion of diglossia occupies a prominent place in sociolinguistic research since the 1960s when the dominant sense of diglossia was the complementary sociofunctional distribution of two varieties of the same language the term has been applied often controversially to a growing number of diverse sociolinguistic situations as a consequence of this extension of the scope of the concept in combination with an increasing interest in the relationship between the role of language and the social structure the number of publications in this field has risen exponentially over the last decades however despite the growing importance of the notion up till now there was no adequate bibliography devoted to diglossia while coverage in other bibliographies does not do justice to the number of works actually published in this area this first comprehensive bibliography of the subject includes almost 3 000 entries although the time span covered is 1960 1990 the book includes several dozens of entries from before 1960 and also a substantial number of very recent publications from the period 1990 1992 the selection of items has not been restricted to a specific definition of diglossia all available publications in which the term or one of its offsprings appears have been included moreover when considered appropriate some material relevant to the subject has been added even though the term is not explicitly used the usefulness of the bibliography has been enhanced significantly by six indexes 1 index of languages 2 diglossia in literature 3 historically oriented works 4 pedagogically oriented works 5 theoretical works and 6 theses and dissertations
