destined to become a landmark work this book is devoted principally to a reassessment of the content categories boundaries and basic assumptions of pidgin and creole studies it includes revised and elaborated papers from meetings of the society for pidgin and creole linguistics in addition to commissioned papers from leading scholars in the field as a group the papers undertake this reassessment through a reevaluation of pidgin creole terminology and contact language typology section one a questioning of process and evolution in pidginization creolization and other language contact phenomena section two a reinterpretation of the sources and genesis of grammatical aspects of saramaccan and atlantic creoles in general section three a reconsideration of the status of languages defying received definitions of pidgins and creoles section four and analyses of aspects of grammar that shed light on the issue of what a possible creole grammar is section five this account of language acquisition in a multilingual context explains how hybrid grammars develop and can result in language change this textbook provides an account of intellectual property law the underlying policies influencing the direction of the law are explained and explored and contemporary issues facing the discipline are tackled head on the international and european dimensions are covered together with the domestic position the present volume includes papers that were presented at the conference languages in contact at the university of groningen 25 26 november 1999 the conference was held to celebrate the university of st petersburg s award of an honorary doctorate to tjeerd de graaf of groningen in general the issues discussed in the articles involve pidgins and creoles minorities and their languages diaspora situations sprachbund phenomena extralinguistic correlates of variety in contact situations problems of endangered languages and the typology of these languages special attention is paid to contact phenomena between languages of the russian empire ussr russian federation their survival and the influence of russian this book develops a minimalist approach to cross linguistic morphosyntactic variation ian roberts argues that the essential insight of the principles and parameters approach to variation can be maintained albeit in a somewhat different guise in the context of the minimalist programme for linguistic theory the central idea is to organize the parameters of universal grammar ug into hierarchies that define the ways in which properties of individually variant categories and features may act in concert a further leading idea which is consistent with the overall goal of the minimalist programme to reduce the content of ug is that the parameter hierarchies are not directly determined by ug and are instead emergent properties stemming from the interaction of the three factors in language design cross linguistic variation in word order null subjects incorporation verb movement case alignment wh movement and negation are all analysed in the light of this approach this book represents a significant new contribution to the formal study of cross linguistic morphosyntactic variation on both the empirical and theoretical levels and will appeal to researchers and students in all areas of theoretical linguistics and comparative syntax this collection of selected conference papers from three spcl meetings brings together a cross fertilization of approaches to the study of contact languages the articles are grouped into three coherent sections dealing with respectively phonetics and phonology including optimality theory synchronic analyses of both morphology and syntax and diachronic tracings of language change with special focus on sound patterns as well as semantics an added value of the volume is that most of the articles are in various ways significant for more than one linguistic subgrouping and there is a significant overlap of interests the sections also cover sociolinguistic subjects give both theoretical and functional linguistic analyses of language data and discuss issues of grammaticalization thus in discussing a number of issues relevant far beyond the study of pidgin and creole languages as well as providing a wealth of linguistic data this volume also contributes to the broader field of linguistics in general research on second language acquisition sla has identified language aptitude and age of onset ao i e the age at which learners are first meaningfully exposed to the l2 as robust predictors of rate of classroom language learning and level of ultimate l2 attainment in naturalistic settings respectively it is not surprising therefore that recent years have witnessed a surge of interest in the combination of age and aptitude as a powerful explanatory factor in sla and central to a viable sla theory the chapters in this volume provide new studies and reviews of research findings on age effects bilingualism effects maturational constraints and sensitive periods in sla the sub components of language aptitude and the development of new aptitude measures the influence of ao and aptitude in combination on sla aptitude treatment interactions and the implications of the research findings for language education policy and tailored language instruction although grammatical agreement or concord is widespread in human languages linguistic theorists have generally treated agreement phenomena as secondary or even marginal all the papers in this volume however take agreement phenomena seriously as presenting either a general issue in theory construction or a descriptive problem in particular types of languages the theoretical perspectives range from purportedly theory neutral typological frameworks to assumptions about the validity of one or another current formal model further the degree of generality ranges from a universalist nature of human language agenda to concern with one or another aspect of grammatical agreement or with agreement in a single language or language group the book contains 30 descriptive chapters dealing with a specific language contact situation the chapters follow a uniform organisation format being the narrative version of a standard comprehensive questionnaire previously distributed to all authors the questionnaire targets systematically the possibility of

contact influence grammatical borrowing in a full range of categories the uniform structure facilitates a comparison among the chapters and the languages covered the introduction describes the setup of the questionnaire and the methodology of the approach along with a survey of the difficulties of sampling in contact linguistics two evaluative chapters each authored by one of the co editors draws general conclusions from the volume as a whole one in relation to borrowed grammatical categories and meaningful hierarchies the other in relation to the distribution of matter and pattern replication the second edition of the definitive reference on contact studies and linguistic change provides extensive new research and original case studies language contact is a dynamic area of contemporary linguistic research that studies how language changes when speakers of different languages interact accessibly structured into three sections the handbook of language contact explores the role of contact studies within the field of linguistics the value of contact studies for language change research and the relevance of language contact for sociolinguistics this authoritative volume presents original findings and fresh research directions from an international team of prominent experts thirty seven specially commissioned chapters cover a broad range of topics and case studies of contact from around the world now in its second edition this valuable reference has been extensively updated with new chapters on topics including globalization language acquisition creolization code switching and genetic classification fresh case studies examine romance indo european african mayan and many other languages in both the past and the present addressing the major issues in the field of language contact studies this volume includes a representative sample of individual studies which re evaluate the role of language contact in the broader context of language and society offers 23 new chapters written by leading scholars examines language contact in different societies including many in africa and asia provides a cross section of case studies drawing on languages across the world the handbook of language contact second edition is an indispensable resource for researchers scholars and students involved in language contact language variation and change sociolinguistics bilingualism and language theory review text we are lucky to have this book laurence krute in anthropological linguistics 2 2005 since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general several contradictory proposals have been put forward in the literature for example creole languages typologically pair with their superstrate languages chaudenson 2003 with their substrate languages lefebvre 1998 or even creole languages are alike bickerton 1984 such that they constitute a definable typological class mcwhorter 1998 this book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages as the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically the bulk of the data show that creoles reproduce the typological features of their substrate languages this argues that creoles cannot be claimed to constitute a definable typological class concise encyclopedia of pragmatics second edition cope is an authoritative single volume reference resource comprehensively describing the discipline of pragmatics an important branch of natural language study dealing with the study of language in its entire user related theoretical and practical complexity as a derivative volume from encyclopedia of language and linguistics purposes of epp the inquiry into the existence of connections between verbal and dp internal agreement on the morphological and syntactic distinction of person number and gender agreement how and why agree and spec head relations trigger different agreement effects and the type of relation that exists between head movement and morphological agreement the data collected come from a wide variety of
