though the alps may appear to be a peaceful place the famed mountains once provided the backdrop for a political environmental and cultural battle as germany and austria struggled to modernize tait keller examines the mountains threefold role in transforming the two countries as people sought respite in the mountains transformed and shaped them according to their needs and over time began to view them as national symbols and icons of individualism in the mid nineteenth century the alps were regarded as a place of solace from industrial development and the stresses of urban life soon however mountaineers or the so called apostles of the alps began carving the crags to suit their whims altering the natural landscape with trails and lodges and seeking to modernize and nationalize the high frontier disagreements over the meaning of modernization opened the mountains to competing agendas and hostile ambitions keller examines the ways in which these opposing approaches corresponded to the political battles social conflicts culture wars and environmental crusades that shaped modern germany and austria placing the alpine borderlands at the heart of the german question of nationhood
