Public Papers of the Presidents of the United States 1918 bill handley is well known for making maths fun the first edition of teach your children tables challenged over 20000 readers and bill has been inundated with letters of thanks since from parents whose children have quickly become proficient in maths and problem solving this not only pleases their teachers but does wonders for a child s self esteem in this new fully revised edition rewritten for clearer understanding bill expands the sections on explaining multiplication to young children on problem solving and the correlation between the multiplication method and subtraction

The Slide Rule Simplified 1968 the author of the classic philosophical treatment of love reflects on the trajectory over decades of his thoughts on love and other topics in 1984 irving singer published the first volume of what would become a classic and much acclaimed trilogy on love trained as an analytical philosopher singer first approached his subject with the tools of current philosophical methodology dissatisfied by the initial results finding the chapters he had written just dreary and unproductive of anything he turned to the history of ideas in philosophy and the arts for inspiration he discovered an immensity of

speculation and artistic practice that reached wholly beyond the parameters he had been trained to consider truly philosophical in his three volume work the nature of love singer tried to make sense of this historical progression within a framework that reflected his precise distinction making and analytical background in this new book he maps the trajectory of his thinking on love it is a partial summing up of a lifework partial because it expresses the author's still unfolding views because it is a recapitulation of many published pages because love like any subject of that magnitude resists a neatly comprehensive all inclusive formulation adopting an informal even conversational tone singer discusses among other topics the history of romantic love the platonic ideal courtly and nineteenth century romantic love the nature of passion the concept of merging and his critique of it ideas about love in freud schopenhauer nietzsche dewey santayana sartre and other writers and love in relation to democracy existentialism creativity and the possible future of scientific investigation singer's writing on love embodies what he has learned as a contemporary philosopher studying other authors in the field and trying to get a little further this book continues his trailblazing explorations
