this true story of an amazing breeding experiment in siberia is part science part russian fairy tale and part spy thriller the new york times book review tucked away in siberia there are furry four legged creatures with wagging tails and floppy ears that are as docile and friendly as any lapdog but despite appearances these are not dogs they are foxes they are the result of the most astonishing experiment in breeding ever undertaken imagine speeding up thousands of years of evolution into a few decades in 1959 biologists dmitri belyaev and lyudmila trut set out to do just that starting with a few dozen silver foxes from fox farms in the ussr and attempting to recreate the evolution of wolves into dogs in real time in order to witness the process of domestication this is the extraordinary untold story of this remarkable undertaking most accounts of the natural evolution of wolves place it over a span of about 15 000 years but within a decade belyaev and trut s fox breeding experiments had resulted in puppy like foxes with floppy ears piebald spots and curly tails along with these physical changes came genetic and

behavioral changes and with each generation they became increasingly interested in human companionship to date fifty six generations of foxes have been domesticated in this book trut along with biologist and science writer lee dugatkin tells the story of the adventure science politics and love behind it all dugatkin and trut take us inside this path breaking experiment in the midst of the brutal siberian winters to reveal how scientific history is made and continues to be made today the science is profound but the authors write accessibly and engagingly and their vulpine subjects are awfully cute too of compelling interest to any animal lover kirkus reviews starred review a cheerful easy to read account spin s complex genetic science into a fascinating story about adorable foxes publishers weekly an extraordinary story times literary supplement

who has never wondered why people behave the way they do they create glorious music art and literature they have uncovered the secrets of the universe and disease yet have not been able to figure out how to get along with each other without war the human dilemmas set out to find out why it describes how humans evolved how their wonderful brains work and what they are like when they are born the author explores the reasons individuals grow up with different personalities depending on the societies in which they mature from hunter gatherers in africa to industrial americans she then turns to relationships between the sexes the temptations of power and why religious differences lead to violence the human dilemma explains in simple readable language how human nature customs and beliefs interfere with mankind's ability to resolve the overwhelming problems facing the world today violent conflicts between cultures have become more volatile over the years many believe it is man's nature to fight yet ancient civilizations like crete were peaceful and everyone was treated equally women as well as men the same is true of two hunting gathering tribes in africa that have followed the same way of life for thousands of years perhaps it is just as human to cooperate peacefully in solving problems as it is to fight over them and just as human to see our fellows as equal instead of superior or inferior why then do men regard women as inferior in so many societies and why do so many nations plunge into battle especially since the invention of nuclear bombs makes it possible to wipe out our entire species the newest peril is global warming caused by the spewing of carbon into the atmosphere from burning fossil fuels which may

eventually change our climate back to the days before mankind existed some animals have already become extinct because they cannot adjust to warmer weather humans may not survive such a drastic change our magnificent brains are capable of inventing solutions to all the problems confronting us and entrepreneurs are eager to put these inventions into practice why then don t we do it is there some flaw in our nature that makes it easier to blame each other instead and find excuses for relieving our frustrations in warfare as the author studied the sciences for answers to her questions she became convinced that only by fully understanding our nature and the reasons why it is difficult for us to confront our problems can we hope to resolve them and continue to survive her conclusions are found in the human dilemma an original and thought provoking book which will appeal to a very wide audience richard edelman psychoanalyst in her wonderfully wide ranging exploration of human nature barbara larsen has distilled her research into a lucid and absolutely fascinating book richard edelman psychoanalyst the writer s style is open and exploratory warmly self sharing and it is an enjoyable as well as a searching and provocative learning experience saul I brown emeritus chairman department of psychiatry cedars sinai medical center los angeles ca larsen skillfully weaves together current theory and research from an impressive variety of sources arthur a dole emeritus professor of education university of pennsylvania

i can make this march and make georgia howl william tecumseh sherman the march to the sea shocked georgians from atlanta to savannah in the late autumn of 1864 as sherman s troops cut a four week long path of terror through georgia sherman accomplished his objective to destroy civilian morale and with it their support for the confederate cause his actions elicited a passionate reaction as tales of his dastardly deeds and destruction burned sherman s name into the southern psyche but does the savannah campaign deserve the reputation it has been given in her new book war and ruin anne j bailey examines this event and investigates just how much truth is behind the popular historical notions bailey contends that the psychological horror rather than the actual physical damage which was not as devastating as believed led to the wilting of southern morale war and ruin looks at the march to the sea from its inception in atlanta to its culmination in savannah this fascinating text is a chronicle of not just the campaign itself but also a revealing description of how the people of georgia were affected war and ruin brilliantly combines military history and human interest to achieve a convincing portrayal of what really happened in sherman s epic effort to smash the confederate spirit in georgia
