force and motion formula unit relation law of motion

May 08 2024

□□□ 2023□5□31□ in physics we come across various motions of a body what causes the motion of an object the answer is a force what stops an object under motion the answer is force thus in general force and motion are like two sides

□□□ about this unit understanding interactions between force mass acceleration and momentum allows us to predict and how an object will move and comes in handy when we re designing things like airplanes or seismically reinforced buildings let s start exploring what these terms mean and how they relate to one another

□□□ newton s second law of motion states that a force acting on an object will change its velocity by changing either its speed or its direction or both if your basketball goes rolling into the street and is hit by a bike either the ball will change direction or its speed or both

□□□ force is the cause of motion and motion draws our attention motion itself can be beautiful such as a dolphin jumping out of the water the flight of a bird or the orbit of a satellite the study of motion is called kinematics but kinematics describes only the way objects move their velocity and their acceleration

☐☐☐ learn about the basics of forces and motion with this interactive simulation from phet experiment with different types of forces friction and objects and see how they affect the movement and speed of the objects this simulation is suitable for students of all ages and can be used offline or online
