Deep Space Communications 2016-08-16 deep space communications a collection of some of the jet propulsion laboratory s space missions selected to represent the planetary communications designs for a progression of various types of missions the text uses a case study approach to show the communications link performance resulting from the planetary communications design developed by the jet propulsion laboratory jpl this is accomplished through the description of the design and performance of six representative planetary missions these six cases illustrate progression through time of the communications system s capabilities and performance from 1970s technology to the most recent missions the six missions discussed in this book span the voyager for fly bys in the 1970s galileo for orbiters in the 1980s deep space 1 for the 1990s mars reconnaissance orbiter mro for planetary orbiters mars exploration rover mer for planetary rovers in the 2000s and the msl rover in the 2010s deep space communications provides an overview of the deep space network and its capabilities examines case studies to illustrate the progression of system design and performance from mission to mission and provides a broad overview of the mission systems described discusses actual flight mission telecommunications performance of each system deep space communications serves as a reference for scientists and engineers interested in communications systems for deep space telecommunications link analysis and design control

Mobile Agents for Telecommunication Applications 2003-07-31 mobile agents refer to self contained and identifiable computer programs that can move within the network and can act on behalf of the user or another entity most of the current research work on the mobile agent paradigm has two general goals reduction of network traffic and asynchronous interaction these two goals stem directly from the desire to reduce information overload and to efficiently use network resources there are certainly many motivations for the use of a mobile agent paradigm however intelligent information retrieval network and mobility management and network services are currently the three most cited application targets for a mobile agent system the aim of the workshop is to provide a unique opportunity for researchers software and application developers and computer network technologists to discuss new developments in the mobile agent technology and applications after last year's very successful workshop in ottawa canada 110 attendees this year's workshop will focus on mobile agent issues across the areas of network management mobile applications nomadic computing e commerce ad hoc networks and applications feature interactions internet applications qos management policybased management interactive multimedia and computer telephony integration

InfoWorld 1995-08-07 mastering interoperability in a computing environment consisting of different operating

systems and hardware architectures is a key requirement which faces system engineers building distributed information systems distributed applications are a necessity in most central application sectors of the contemporary computerized society for instance in office automation banking manufacturing telecommunication and transportation this book focuses on the techniques available or under development with the goal of easing the burden of constructing reliable and maintainable interoperable information systems the topics covered in this book include management of distributed systems frameworks and construction tools open architectures and interoperability techniques experience with platforms like corba and rmi language interoperability e g java agents and mobility quality of service and fault tolerance workflow and object modelling issues and electronic commerce the book contains the proceedings of the international working conference on distributed applications and interoperable systems ii dais 99 which was held june 28 july 1 1999 in helsinki finland it was sponsored by the international federation of information processing ifip the conference program presents the state of the art in research concerning distributed and interoperable systems this is a topical research area where much activity is currently in progress interesting new aspects and innovative contributions are still arising regularly the dais series of conferences is one of the main international forums where these important findings are reported

Distributed Applications and Interoperable Systems II 2013-03-09 this book presents the widely applicable information obtained during the planning and management of the collaborative regional air quality study known as the san joaquin valley air quality study atmospheric utility signatures predictions and experiments sjvaqs auspex the extensive experience and knowledge gained during and after the study is clearly presented in this guide an ideal working reference for developing regional and subregional air quality and meteorological field measurement and modeling studies

InfoWorld 1995-12-11 welcome to middleware 98 and to one of england s most beautiful regions in recent years the distributed systems community has witnessed a growth in the number of conferences leading to difficulties in

tracking the literature and a consequent loss of awareness of work done by others in this important field the aim of middleware 98 is to synthesise many of the smaller workshops and conferences in this area bringing together research communities which were becoming fragmented the conference has been designed to maximise the experience for attendees this is reflected in the choice of a resort venue rather than a big city to ensure a strong focus on interaction with other distributed systems researchers the programme format incorporates a question and answer panel in each session enabling significant issues to be discussed in the context of related papers and presentations the invited speakers and tutorials are intended to not only inform the attendees but also to stimulate discussion and debate

Scientific and Technical Aerospace Reports 1995 this book demystifies the jargon of webcams and computer processing and provides detailed hints and tips for imaging the sun moon and planets with a webcam it demonstrates how inexpensive tools are revolutionizing imaging in amateur astronomy anyone with a modest telescope and a webcam can now obtain jaw dropping lunar and planetary images to rival those taken with mid range astronomical ccd cameras costing thousands of dollars a glance through the images in this book shows just what spectacular results can be achieved by using a webcam with your telescope your scientific results will be sought by professional astronomers

New User's Guide to Useful and Unique Resources on the Internet 1992 the collections framework is supplied with all versions of the java 2 platform and provides programmers with incredibly efficient ways to manipulate data however given the large number of methods and classes in this library using them correctly is hardly a cakewalk well known columnist and bestselling author john zukowski gives the java professional exactly what he or she needs to know about this vital library in order to maximize productivity this practical book contains comprehensive coverage of the important collections framework from the working programmer's point of view while staying away from academic abstractions java collections leads you through the standard java support for maintaining abstract groups of data from the historical collection classes available since the inception of java time through the collections framework introduced with the java 2 platform and on to third party alternative libraries for times when the standard support

isn t enough if you re working with data in java programs you need to understand the collections framework let
 zukowski s java collections be your guide table of contents java collections framework an overview arrays the vector
 and stack classes the enumeration interface the dictionary hashtable and properties classes the bitset class
 collections introduction sets lists maps sorting special collections support array algorithm support custom
 implementations compatibility issues advanced usages jgl libraries util concurrent colt
