A Complete Course in ISC Biology

1997

meiosis is the key process underlying sexual reproduction in eukaryotes occurring in single celled eukaryotes and in most multicellular eukaryotes including animals and most plants thus meiosis is of considerable interest both at the scientific level and at the level of natural human curiosity about sexual reproduction improved understanding of important aspects of meiosis has emerged in recent years and major questions are starting to be answered such as

2023-06-28

10/29

gateway pc manual

how does meiosis occur at the molecular level how did meiosis and sex arise during evolution what is the major adaptive function of meiosis and sex in addition changing perspectives on meiosis and sex have led to the question how should meiosis be taught this book proposes answers to these questions with extensive supporting references to the current literature

Meiosis

1999

this book is based on the icar syllabus of seed science and technology it comprises of two major parts 1 seed science and technology and 2 advances in seed science and technology the part 1 consists of eight units of seed science and technology like seed biology seed production seed processing seed quality control seed storage seed health seed industry development and marketing and protection of plant varieties the part 2 involves the advances in seed science and technology on seed physiology and biochemistry in this the units such as seed development and maturation seed dormancy and germination and seed deterioration are included
