this book seeks to demystify the re ascendancy of china as a civilization state china s politics and society are examined in the light of its living civilization which is the only one of the ancient civilizations that has survived to this day the book also contrasts china s development with that of the west and japan by combining the impact of internal political and socio economic developments in china and its external relations from the silk routes the tribute system to the modern day it unravels the existing myths puzzles and paradoxes surrounding china and questions the adequacy of most of the western political theories such as realism in international relations in an attempt to explicate china s re emergence as a world power it attempts to tackle squarely the question is china a threat to world order the book traces the rationale for contemporary developments in china to the roots in the country s tradition as well as foreign influences and seeks to unravel the puzzle about the unique china model that defies conventional thinking in political economy with its sustained and incredibly rapid economic growth over the past three decades this study on china s second rise provides a broad background that includes a meaningful scrutiny of the country s behavior during its first rise 713 1820 and beyond in comparing china s ongoing second rise with its first ascent the book not only refocuses on and reinterprets the example set during its first rise but also takes into account the crucial lessons it learned during its century in eclipse in the interregnum for the effects they have on the country s current orientation and behavior the book follows an interdisciplinary approach combining the cultural intellectual historical normative ideological and social scientific perspectives to lend a more solid grasp of the present day china it ends with an educated speculation based on the foregoing analyses on the contours of a pax sinica that is likely to result from the impact of china s second rise as a world power

the first decades of the twentieth century witnessed an explosion of nationalist sentiment in east asia as in europe this comprehensive work explores how radical chinese and japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development focusing on the adaptation of anarchism and then marxism leninism to non european contexts germaine hoston shows how chinese and japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism given the influence of western experience on marxism chinese and japanese theorists found the marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative

value of eastern and western cultures marxism argues hoston thus placed native marxists in tension with their own heritage and national identity the author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as chinese and japanese dissidents seek identity affirming modernity in accordance with the western democratic model
