long distance oceanic and overland trade along the eurasian landmass in the 1400s was largely dominated by chinese indian and arabic traders and predominantly conducted over short trajectories by sole traders or organized around small scale enterprises yet within two centuries of europeans arrival in the indian ocean in 1498 long distance trade throughout eurasia was mainly taken over by them by 1700 they had formed new large scale and impersonal organizations primarily a joint stock business corporation between english east india company eic and dutch east india company voc this allowed them to transform trade from an enterprise dominated by many small traders moving goods over short segments to a vertically integrated firm that was able to control goods from their origin to the end consumers this rise of the business corporation proved essential for the economic rise of europe why did the corporation arise indigenously only in europe and given its effective organization of long distance trade why wasn't it mimicked by other eurasian civilizations for 300 years harris closely examines the role played by forms of organization in the transformation of eurasian trade between 1400 and 1700 comparing the organizational forms that were used in four major civilizations chinese indian middle eastern and western european through this comparative perspective he argues that the organizational design of the eic and voc the first long lasting joint stock corporations enabled large scale multilateral impersonal cooperation for the first time in human history he also argues that this new organizational form enabled the english and dutch to deploy more capital more ships more voyages and more agents than other organizational forms

a risk conundrum can be viewed as a risk that poses major issues in assessment and whose management is not easily engaged such perplexing problems can either paralyze or badly delay risk analysis and directions for progression rather than simply focusing on the progress in risk analysis that has already been made it is crucial to consider what has been learnt about these seemingly unmanageable problems and how best to move forward risk conundrums seeks to answer this question by bringing together a range of key thinkers in the field to explore key issues such as risk communication uncertainty social trust indicators and metrics and risk management drawing upon case study examples including natural disasters terrorism and energy transitions the initial chapters address risk conundrums their properties and the challenges they pose the book then turns to a greater emphasis on systemic and regional risk

conundrums finally it considers how risk management can be changed to address these unsolvable conundrums alternative pathways are defined and scrutinized and predictions for future developments set out this book will be of great interest to students and scholars of risk governance environmental policy and sustainable development
