against syndicate criminals man eating aliens and her own grim space weakened body it were difficult to exaggerate the disorder pervading the castilian kingdoms when the spanish monarchy found its origin in the union of isabella of castile and fernand of aragon many causes had contributed to prolong and intensify the evils of the feudal system and to neutralize such advantages as it possessed the struggles of the reconquest from the saracen continued at intervals through seven hundred years and varied by constant civil broils had bred a race of fierce and turbulent nobles as eager to attack a neighbor or their sovereign as the moor the contemptuous manner in which the cid is represented in the earliest ballads as treating his king shows what was in the twelfth century the feeling of the chivalry of castile toward its overlord and a chronicler of the period seems rather to glory in the fact that it was always in rebellion against the royal power so fragile was the feudal bond that a rich man or noble could at any moment renounce allegiance by a simple message sent to the king through a hidalgo the necessity of attracting population and organizing conquered frontiers which subsequently became inland led to granting improvidently liberal franchises to settlers which weakened the powers of the crown without building up as in france a powerful third estate to serve as a counterpoise to the nobles and eventually to undermine feudalism in spain the business of the castilian was war the arts of peace were left with disdain to the jews and the conquered moslems known as mudéjares who were allowed to remain on christian soil and to form a distinct element in the population no flourishing centres of industrious and independent burghers arose out of whom the kings could mould a body that should lend them efficient support in their struggles with their powerful vassals the attempt indeed was made the cortes whose co-operation was required in the enactment of laws consisted of representatives from seventeen cities who while serving enjoyed personal inviolability but so little did the cities prize this privilege that under henry iv they complained of the expense of sending deputies the crown eager to find some new sources of influence agreed to pay them and thus obtained an excuse for controlling their election and although this came too late for henry to benefit by it it paved the way for the assumption of absolute domination by fernand and isabella after which the revolt of the comunidades proved fruitless meanwhile their influence diminished their meetings were scantily attended and they became little more than an instrument which in the interminable strife that cursed the land was used alternately by any faction as opportunity offered this is one of the best known works by the american historian henry charles lea the spanish inquisition officially known as the tribunal of the holy office of the inquisition was established in 1478 by catholic monarchs fernand ii of aragon and isabella i of castile it was intended to maintain catholic orthodoxy in their kingdoms and to replace the medieval inquisition which was under papal control it became the most substantive of the three different manifestations of the wider catholic inquisition along with the roman inquisition and portuguese inquisition the inquisition was originally intended primarily to identify heretics among those who converted from judaism and islam to catholicism the regulation of the faith of newly converted catholics was intensified after the royal decrees issued in 1492 and 1502 ordering muslims and jews to convert to catholicism or leave castile the inquisition was not definitively abolished until 1834 during the reign of isabella ii after a period of
