Habitat for Humanity

2001-12-15

the humanity of private law presents a new way of thinking about english private law making a decisive break from earlier views of private law which saw private law as concerned with wealth maximisation or preserving relationships of mutual independence between its subjects the author argues that english private law's core concern is the flourishing of its subjects this volume presents a critique of alternative explanations of private law defines and sets out the key building blocks of private law sets out the vision of human flourishing the rp that english private law has in mind in seeking to promote its subjects flourishing shows how various features of english private law are fine tuned to ensure that its subjects enjoy a flourishing existence according to the vision of human flourishing provided by the rp explains how other features of english private law are designed to preserve private law's legitimacy while it pursues its core concern of promoting human flourishing defends the view of english private law presented here against arguments that it does not adequately fit the rules and doctrines of private law or that it is implausible to think that english private law is concerned with promoting human flourishing a follow up volume will question whether the rp is correct as an account of what human flourishing involves and consider what private law would look like if it sought to give effect to a more authentic vision of human flourishing the humanity of private law is essential reading for students academics and judges who are interested in understanding private law in common law jurisdictions and for anyone interested in the nature and significance of human flourishing

Early Magnetism in Its Higher Relations to Humanity

1846

history humanity and evolution brings together thirteen original essays by prominent scholars in the history of evolutionary thought the volume is intended both to represent the best of today's research in the field and also to celebrate the work of the distinguished historian john c greene whose historical writings have had a unique influence on this volume's contributors as well as the field as a whole using contemporary sources as diverse as medicine literature and natural history tableaux and drawing on the resources of publishing history feminist scholarship and the histories of politics sociology and philosophy the contributors offer new perspectives not only on familiar figures such as erasmus and charles darwin lamarck chambers huxley and haeckel but also on many lesser known participants in the evolutionary debates the volume contains a fascinating introductory conversation with john c greene and an afterword by him that responds to the contributors' essays

Beasts Of Humanity: Book 3 of The Chronicles of Beasts

2023-06-30

volume v of the history of humanity is concerned with the early modern period the sixteenth seventeenth and eighteenth centuries it gives an extensive overview of this crucial stage in the rise of the west as well as examining the development of cultures and societies elsewhere structure the volume is divided into two main parts the first is thematic discussing the geography chronology and sociology of cultural change in this period the second is regional less theoretical and more empirical it stresses cultural diversity the links between different activities in a given region and the importance of social contexts and local circumstances each chapter has a bibliography which directs the reader to sources of further information the volume is extensively illustrated with line drawings and plates and is comprehensively indexed

1889

in 18th century germany philosophers were occupied with questions of who we are and what we should be can the individual fulfill its vocation or is this possible only for humanity as a whole is significant progress towards perfection in any way possible for me or just for me as part of humanity by following the origin and nature of these debates this collection sheds light on the vocation of humanity in early german philosophy featuring translations of spalding s contemplation on the vocation of the human being in its first version from 1748 and an extended translation of abbt s and mendelssohn s epistolary discussion around the doubts and the oracle from 1767 newly commissioned chapters cover johann gottfried herder s inherently cultural concept of the human being immanuel kant s transformative interplay of moral and natural aspects and the notion of metempsychosis in fichte s work inspired by two neglected philosophers gotthold ephraim lessing and johann georg schlosser opening further lines of inquiry contributors address questions about the adaptations of spalding s work that focus on the vocation of women as wife mother or citizen exploring the multitude of ways 18th century german thinkers understand our position in the world this volume captures major changes in metaphysics and anthropology and enriches current debates within modern philosophy

History of Humanity

2005-12-31

although the enlightenment is often associated with the emergence of human rights and humanitarian sensibility humanity is an elusive category in the literary philosophical scientific and political writings of the period fiction without humanity offers a literary history of late seventeenth and early eighteenth century efforts to define the human focusing on the shifting terms in which human difference from animals things and machines was expressed Lynn Festa argues that writers and artists treated humanity as an indefinite class which needed to be called into being through literature and the arts drawing on an array of literary scientific artistic and philosophical devices the riddle the fable the microscope the novel and trompe l'oeil and still life painting fiction without humanity focuses on experiments with the perspectives of nonhuman creatures and inanimate things rather than deriving species membership from sympathetic identification or likeness to a fixed template early enlightenment writers and artists grounded humanity in the enactment of capacities reason speech educability that distinguish humans from other creatures generating a performative model of humanity capacious enough to accommodate broader claims to human rights in addressing genres typically excluded from canonical literary histories fiction without humanity offers an alternative account of the rise of the novel showing how these early experiments with nonhuman perspectives helped generate novelistic techniques for the representation of consciousness by placing the novel in a genealogy that embraces paintings riddles scientific plates and fables Festa shows realism to issue less from mimetic exactitude than from the tailoring of the represented world to a distinctively human point of view

Humanity

2018-11-05

this is the first book to focus primarily on George Orwell's ideas about free speech and related matters freedom of the press the writer's freedom of expression honesty and truthfulness and in particular the ways in which they are linked to his political vision of socialism Orwell is today claimed by the left and right by neo conservatives and neo socialists how is that possible part of the answer as Glenn Burgess reveals is that Orwell was an odd sort of socialist the development of Orwell's socialism was from the start conditioned by his individualist and liberal commitments the hopes he attached to socialism were for a fairer more equal world that would permit human freedom and individuality to flourish completing not destroying the work of liberalism freedom of thought was a central part of this and its defence and use were essential parts of the struggle to ensure that socialism developed in a liberal humane form that did not follow the totalitarian path of Soviet communism written in celebration of Orwell's dictum we hold that the most perverse human being is more interesting than the most orthodox gramophone record George Orwell's *Perverse Humanity* is a portrait of Orwell that captures these themes and provides a new understanding of him as a political thinker and activist based on archival research and new materials that affirm his work as an activist for freedom it also uncovers a socialist ideology that has been obscured in just the way that the author feared it would be associated in many people's minds with totalitarian unfreedom

The Crooked Timber of Humanity

2013-06-02

Humanity Texts and Contexts is a record of the 2007 Singapore Building Bridges Seminar an annual dialogue between Muslim and Christian scholars cosponsored by Georgetown University and the Archbishop of Canterbury this volume explores three central questions what does it mean to be human what is the significance of the diversity that is evident among human beings and what are the challenges that humans face living within the natural world a distinguished group of scholars focuses on the theological responses to each of these questions drawing on the wealth of material found in both Christian and Islamic scriptures part one lays out the three issues of human identity difference and guardianship part two explores scriptural texts side by side pairing Christian and Islamic scholars who examine such themes as human dignity human alienation human destiny humanity and gender humanity and diversity and humanity and the environment in addition to contributions from an international cast of outstanding scholars the book includes an afterword by Archbishop Rowan Williams

1876

of the great philosophers of pagan antiquity Marcus Tullius Cicero is the only one whose ideas were continuously accessible to the Christian West following the collapse of the Roman Empire yet in marked contrast with other ancient philosophers Cicero has largely been written out of the historical narrative on early European political thought and the reception of his ideas has barely been studied the *Bonds of Humanity* corrects this glaring oversight arguing that the

influence of cicero s ideas in medieval and early modern europe was far more pervasive than previously believed in this book cary j nederman presents a persuasive counternarrative to the widely accepted belief in the dominance of aristotelian thought surveying the work of a diverse range of thinkers from the twelfth to the sixteenth century including john of salisbury brunetto latini marsiglio of padua christine de pizan and bartolomé de las casas nederman shows that these men and women inherited deployed and adapted key ciceronian themes he argues that the rise of scholastic aristotelianism in the thirteenth century did not supplant but rather supplemented and bolstered ciceronian ideas and he identifies the character and limits of ciceronianism that distinguish it from other schools of philosophy highly original and compelling this paradigm shifting book will be greeted enthusiastically by students and scholars of early european political thought and intellectual history particularly those engaged in the conversation about the role played by ancient and early christian ideas in shaping the theories of later times

Crimes Against Humanity in International Criminal Law

2023-08-28

on the contemporary international law scene there are not many jurists who match the eminence and stature of abdul g koroma who served as distinguished judge of the international court of justice for 18 years this volume of outstanding essays shielding humanity written by renowned judges scholars and practitioners of international law in honour of judge koroma discuss both classical and contemporary topics of significant relevance to the current and future of international law

The Human Vocation in German Philosophy

2023-01-26

however you view the present time it is a new century a new world and also a new humanity in fact humanity is not something that was ever defined once and for all but remains an open project for several decades we have been witnessing a revolution however unlike the political and ideological revolutions that took place around the first world war this is a technological and much more radical one that does not depend on people s beliefs but rather on the tireless labour of machines the rise of automation has brought about a revelation of something that had hitherto remained hidden in the workshops of homo faber that is there are very few functions apart from consumption where a machine cannot replace a human being be these material or spiritual machines need energy but they can also do without it whereas humans die if deprived of it or one can imagine a machine producing symphonies but not enjoying them so while human beings are still needed their roles and scopes have to be reconsidered workers may be superfluous but humans are still needed including those who until recently only recognised themselves as producers the exclusion of workers from production does not discount humans being able to produce value in the form of consumption recognising this will enable us to conceive the webfare a new digital system that will teach us to find new names and new forms more tolerance and room for traditional human needs above all it will teach us how to transform the time given to us by automation into an opportunity for progress

Humanity to Honey Bees: Or, Practical Directions for the Management of Honey Bees ... Third Edition

1839

now in paperback forming humanity reveals bildung or ethical formation as the key to post kantian thought kant s proclamation of humankind s emergence from self incurred immaturity left his contemporaries with a puzzle what models should we use to sculpt ourselves if we no longer look to divine grace or received authorities deftly uncovering the roots of this question in rhineland mysticism pietist introspection and the rise of the bildungsroman jennifer a herdt reveals bildung or ethical formation as the key to post kantian thought this was no simple process of secularization in which human beings took responsibility for something they had earlier left in the hands of god rather theorists of bildung from herder through goethe to hegel championed human agency in self determination while working out the social and political implications of our creation in the image of god while bildung was invoked to justify racism and colonialism by stigmatizing those deemed resistant to self cultivation it also nourished ideals of dialogical encounter and mutual recognition herdt reveals how the project of forming humanity lives on in our ongoing efforts to grapple with this complicated legacy

Humanity in Psychology

2023-07-24

how language began revolutionizes our understanding of the one tool that has allowed us to become the lords of the planet mankind has a distinct advantage over other terrestrial species we talk to one another but how did we acquire the most advanced form of communication on earth daniel l everett a bombshell linguist and instant folk hero tom wolfe harper s provides in this sweeping history a comprehensive examination of the evolutionary story of language from the earliest speaking attempts by hominids to the more than seven thousand languages that exist today although fossil hunters and linguists have brought us closer to unearthing the true origins of language daniel everett s discoveries have upended the contemporary linguistic world reverberating far

beyond academic circles while conducting field research in the amazonian rainforest everett came across an age old language nestled amongst a tribe of hunter gatherers challenging long standing principles in the field everett now builds on the theory that language was not intrinsic to our species in order to truly understand its origins a more interdisciplinary approach is needed one that accounts as much for our propensity for culture as it does our biological makeup language began everett theorizes with homo erectus who catalyzed words through culturally invented symbols early humans as their brains grew larger incorporated gestures and voice intonations to communicate all of which built on each other for 60 000 generations tracing crucial shifts and developments across the ages everett breaks down every component of speech from harnessing control of more than a hundred respiratory muscles in the larynx and diaphragm to mastering the use of the tongue moving on from biology to execution everett explores why elements such as grammar and storytelling are not nearly as critical to language as one might suspect in the book s final section cultural evolution of language everett takes the ever debated language gap to task delving into the chasm that separates us from the animals he approaches the subject from various disciplines including anthropology neuroscience and archaeology to reveal that it was social complexity as well as cultural physiological and neurological superiority that allowed humans with our clawless hands breakable bones and soft skin to become the apex predator how language began ultimately explains what we know what we d like to know and what we likely never will know about how humans went from mere communication to language based on nearly forty years of fieldwork everett debunks long held theories by some of history s greatest thinkers from plato to chomsky the result is an invaluable study of what makes us human

1873

in humanity s law renowned legal scholar ruti teitel offers a powerful account of one of the central transformations of the post cold war era the profound normative shift in the international legal order from prioritizing state security to protecting human security as she demonstrates courts tribunals and other international bodies now rely on a humanity based framework to assess the rights and wrongs of conflict to determine whether and how to intervene and to impose accountability and responsibility cumulatively the norms represent a new law of humanity that spans the law of war international human rights and international criminal justice teitel explains how this framework is reshaping the discourse of international politics with a new approach to the management of violent conflict teitel maintains that this framework is most evidently at work in the jurisprudence of the tribunals international regional and domestic that are charged with deciding disputes that often span issues of internal and international conflict and security the book demonstrates how the humanity law framework connects the mandates and rulings of diverse tribunals and institutions addressing the fragmentation of global legal order comprehensive in approach humanity s law considers legal and political developments related to violent conflict in europe north america south america and africa this interdisciplinary work is essential reading for anyone attempting to grasp the momentous changes occurring in global affairs as the management of conflict is increasingly driven by the claims and interests of persons and peoples and state sovereignty itself is transformed

Fiction Without Humanity

2019-05-31

humanity that existed before and how it has been brought to today s level religious teachings as reflected through conducts of its followers how they helped establish and practice humanity and also how they gradually destroyed humanity the journey thereof and the teachings responsible for this downfall

George Orwell's Perverse Humanity

2023-04-06

how can we in our times understand the biblical concept that human beings have been created in the image of an invisible god this is a perennial but increasingly pressing question that lies at the heart of theological anthropology humanity in god s image an interdisciplinary exploration clarifies the meaning of this concept traces different jewish and christian interpretations of being created in god s image and reconsiders the significance of the imago dei in a post holocaust context as normative counterfactual notions human dignity and the imago dei challenge us to see more claudia welz offers an interdisciplinary exploration of theological and ethical visions of the invisible by analysing poetry and art welz exemplifies human self understanding in the interface between the visual and the linguistic the content of the imago dei cannot be defined apart from the image carrier an embodied creature compared to verbal visual and mental images how does this creature as a living image refer to god like a metaphor a mimetic mirror or an elusive trace combining hermeneutical and phenomenological perspectives with philosophy of religion and philosophy of language semiotics art history and literary studies welz regards the imago dei as a complex sign that is at once iconic indexical and symbolical pointing beyond itself

Humanity: Texts and Contexts

2011-01-11

george bell remains one of only a handful of twentieth century english bishops to possess a continuing international reputation for his involvement in political affairs his insistence that christian faith required active participation in public life at home and abroad established an eminent and often provocative contribution to christian ethics at large bell s participation in the tragic history of the german resistance against hitler has earned him an enduring place in the historiography of the third reich his february 1944 speech protesting against the obliteration bombing of germany made in the house of lords is still often considered one of the great prophetic speeches of the twentieth century throughout his long career bell became a leading light in the burgeoning ecumenical movement a supporter of refugees from dictatorships of all kinds a committed internationalist and a patron of the arts this book draws together the work of leading international historians and theologians including rowan williams and makes an important contribution to a range of ongoing political ecumenical and international debates

The Bonds of Humanity

2019-12-10

popular science humans are rather weak when compared with many other animals we are not particularly fast and have no natural weapons yet homo sapiens currently number nearly 7.5 billion and are set to rise to nearly 10 billion by the middle of this century we have influenced almost every part of the earth system and as a consequence are changing the global environmental and evolutionary trajectory of the earth so how did we become the worlds apex predator and take over the planet fundamental to our success is our intelligence not only individually but more importantly collectively but why did evolution favour the brainy ape given the calorific cost of running our large brains not to mention the difficulties posed for childbirth this bizarre adaptation must have given our ancestors a considerable advantage
