this product accompanies the algebra i project based curriculum that is aligned with the common core state standards ccss there are seven formal tests each test assesses two or three projects to guarantee student have mastered the new content teachers can administer a test after the completion of the projects to each individual student again it is at the teacher s discretion to utilize these tests many students struggle with traditional classroom environments and delivery of lessons students only received direct instruction on pre requisite information during the completion of each project the project based curriculum allowed students to have the autonomy to work in groups individually or in pairs to complete each project and to create and present a deliverable to demonstrate mastery of the intended standards teachers had the final say on whether the students could work and or present in pairs or groups thus the overall purpose of this curriculum is to improve student academic achievement in algebra 1 and to provide the foundation for future success by creating a student centered culture the purpose of these formal test are to ensure that the students have mastered the skills and are retaining the necessary skills and information required to advance to the next mathematics course

CME Project Algebra 1 2013

writing projects for mathematics courses is a collection of writing projects suitable for a wide range of undergraduate mathematics courses from a survey of mathematics to differential equations the projects vary in their level of difficulty and in the mathematics that they require but are similar in the mode of presentation and use of applications students see these problems as real in a way that textbook problems are not even though many of the characters involved e g dime store detectives and ceos are obviously fictional the stories are sometimes fanciful and sometimes grounded in standard scientific applications but the mere existence of the story draws the students in and makes the problem relevant
