RESEARCH ANTHOLOGY ON IMPLEMENTING SENTIMENT ANALYSIS ACROSS MULTIPLE DISCIPLINES 2022-06-10 in appeasing bankers jonathan kirshner shows that bankers dread war an aversion rooted in pragmatism not idealism sound money not war is hardly a pacifist rallying cry the financial world values economic stability above all else and crises and war threaten that stability states that pursue appeasement when assertiveness or even conflict is warranted kirshner demonstrates are often appeasing their own bankers and these realities are increasingly shaping state strategy in a world of global financial markets yet the role of these financial preferences in world politics has been widely misunderstood and underappreciated liberal scholars have tended to lump finance together with other commercial groups theorists of imperialism including most famously lenin have misunderstood the preferences of finance and realist scholars have failed to appreciate how the national interest and proposals to advance it are debated and contested by actors within societies finance s interest in peace is both pronounced and predictable regardless of time or place bankers kirshner shows have even opposed assertive foreign policies when caution seems to go against their nations interest as in interwar france or their own long term political interest as during the falklands crisis when british bankers failed to support their ally margaret that cher examining these and other cases including the spanish american war interwar japan and the united states during the cold war appeasing bankers shows that when faced with the prospect of war or international political crisis national financial communities favor caution and demonstrate a marked aversion to war
