## **Newswatch 1965**

bayesian inference networks a synthesis of statistics and expert systems have advanced reasoning under uncertainty in medicine business and social sciences this innovative volume is the first comprehensive treatment exploring how they can be applied to design and analyze innovative educational assessments part i develops bayes nets foundations in assessment statistics and graph theory and works through the real time updating algorithm part ii addresses parametric forms for use with assessment model checking techniques and estimation with the em algorithm and markov chain

monte carlo mcmc a unique feature is the volume's grounding in evidence centered design ecd framework for assessment design this design forward approach enables designers to take full advantage of bayes nets modularity and ability to model complex evidentiary relationships that arise from performance in interactive technology rich assessments such as simulations part iii describes ecd situates bayes nets as an integral component of a principled design process and illustrates the ideas with an in depth look at the biomass project an interactive standards based web delivered demonstration assessment of science inquiry in genetics this book is both a resource for professionals interested in assessment and advanced students its clear exposition worked through numerical examples and demonstrations from real and didactic applications provide invaluable illustrations of how to use bayes nets in educational assessment exercises follow each chapter and the online companion site provides a glossary data sets and problem setups and links to computational resources
