teacher education and practice a peer refereed journal is dedicated to the encouragement and the dissemination of research and scholarship related to professional education the journal is concerned in the broadest sense with teacher preparation practice and policy issues related to the teaching profession as well as being concerned with learning in the school setting the journal also serves as a forum for the exchange of diverse ideas and points of view within these purposes as a forum the journal offers a public space in which to critically examine current discourse and practice as well as engage in generative dialogue alternative forms of inquiry and representation are invited and authors from a variety of backgrounds and diverse perspectives are encouraged to contribute teacher education practice is published by rowman littlefield the journal of school leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts we welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations the editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement the mission of the international journal of educational reform ijer is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities as the only peer reviewed scholarly publication that combines authors voices without regard for the political affiliations perspectives or research methodologies ijer provides readers with a balanced view of all sides of the political and educational mainstream to this end ijer includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration curriculum instruction law and research ijer should thus be of interest to professional educators with decision making roles and policymakers at all levels turn since it provides a broad based conversation between and among policymakers practitioners and academicians about reform goals objectives and methods for success throughout the world readers can call on ijer to learn from an international group of reform implementers by discovering what they can do that has actually worked ijer can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes finally it is the mission of ijer to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the u s and the world this book constitutes the refereed proceedings of the 4th international workshop on formal techniques for safety critical systems ftscs 2015 held in paris france in november 2015 the 15 revised full papers presented together with one invited talk and two tool papers were carefully reviewed and selected from 41 submissions the papers are organized in topical sections on timed systems railway systems fault tolerance automotive systems software and systems analysis tools transport properties calculated by chapman enskog theory for high temperature gas mixtures in planetary entry applications the journal of school leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts we welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations the editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement volcanoes release gases to the atmosphere both during and between eruptive phases primary and secondary processes occurring within the mantle and crust control the gases chemical and isotopic compositions as well as their emission rates therefore by measuring these gases a wealth of scientific information concerning the source and fate of these fluids is provided fluid geochemistry has been highly useful in advancing both our fundamental scientific understanding and procedures for operational volcano monitoring and eruption forecasting gases from low to high temperature fumaroles and those diffusively released through the soils of volcanic flanks are investigated using various sampling and measurement techniques furthermore a variety of remote sensing methods are applied at relatively great distances from the source to gather major gas composition and flux data for volcanic plumes using ground based airborne including uav and space borne platforms the acquired data have advanced science in a number of key ways firstly with parallel thermodynamical modelling to advance our capacity to interpret acquired degassing data secondly through improved constraints on budgets for volcanically mediated geochemical cycling particularly via regional subduction processes thirdly through improved

constraints on the effects of volcanic gases on atmospheric composition chemistry and radiative transfer particularly in terms of halogen chemistry volcanogenic climate change and impacts on human health fourthly there has been a growing body of work focused on combining degassing data with contemporaneous geophysical data and studies on conduit fluid dynamics to advance our understanding of how subterranean gas flow mediates activity at the surface and fifthly there have been considerable advances in the methods themselves used to make the gas measurements in particular in terms of extractive sampling e g using multigas units mass spectrometry spectroscopic isotope measurement approaches and diffusive denuder sampling and remote sensing approaches e g doas uv cameras and other imaging techniques lidar and ft the journal of school leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts we welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations the editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world growing numbers of educators and professors look to the six bimonthly issues to deal with problems
