EBOOK: Analysis for Financial Management

2003

the crypto market ecosystem has emerged as the most profound application of blockchain technology in finance this textbook adopts an integrated approach linking traditional functions of the current financial system payments traded assets fundraising regulation with the respective functions in the crypto market in order to facilitate the reader in their understanding of how this new ecosystem works the book walks the reader through the main features of the blockchain technology the definitions classifications and distinct characteristics of cryptocurrencies and tokens how these are evaluated how funds are raised in the cryptocurrency ecosystem icos and what the main regulatory approaches are the authors have compiled more than 100 sources from different sub fields of economics finance and regulation to create a

coherent textbook that provides the reader with a clear and easily understandable picture of the new world of encrypted finance and its applications the book is primarily aimed at business and finance students who already have an understanding of the basic principles of how the financial system works but also targets a more general readership by virtue of its broader scope and engaging and accessible tone

Financial Markets + Institutions

2016-07-01

this textbook demonstrates how enterprise risk management creates value in strategic and decision making processes the author introduces modern approaches to balancing risk and reward based on many examples of medium sized and large companies from different industries since traditional risk management in practice is often an independent stand alone process with no impact on decision making processes it is unable to create value and ties up resources in the company unnecessarily herewith he serves students as well as practitioners with modern approaches that promote a connection between erm and corporate management the author demonstrates in a didactically appropriate manner how companies can use erm in a concrete way to achieve better risk reward decisions under uncertainty furthermore theoretical and psychological findings relevant to entrepreneurial decision making situations are incorporated this textbook has been recommended and developed for university courses in germany austria and switzerland
