This textbook provides a comprehensive overview of the state of the art knowledge of breast cancer management for the modern breast surgeon it covers all aspects of multidisciplinary care including primary breast and axillary surgery reconstruction and oncoplastic techniques external beam radiotherapy and newer techniques such as tomotherapy intraoperative radiotherapy and brachytherapy in addition systemic therapies including chemotherapy the latest biological targeted therapies and endocrine therapies are covered readers can find out about other important aspects of breast cancer such as genetics screening imaging and long term health among others chapters take the reader through the basics up to the highest levels of knowledge in an easy to understand format with management algorithms to aid clinical care generous referencing of the best literature and figures and photographs to illustrate each section published with the official approval of the european society of surgical oncology eso and the european society of breast cancer specialists eusoma the book is written by a panel of recognised leaders in the field and is an indispensable guide for the practicing breast specialist and senior specialists in training wishing to update their knowledge with the latest trends or polish off their training before accreditation this volume details state of the art methods on computer aided antibody design chapters guide readers through information on antibody sequences and structures modeling antibody structures and dynamics prediction and optimization of biological and biophysical properties of antibodies prediction of antibody antigen interactions and computer aided antibody affinity maturation and beyond written in the format of the highly successful methods in molecular biology series each chapter includes an introduction to the topic lists necessary materials and reagents includes tips on troubleshooting and known pitfalls and step by step readily reproducible protocols authoritative and cutting edge computer aided antibody design aims to be a useful and practical guide to new researchers and experts looking to expand their knowledge chapter 2 is available open access under a creative commons attribution 4 0 international license via link springer com multiplication des ouragans disparition des glaciers prolifération des feux de forêt en amazonie en australie et en californie les désastres naturels font aujourd'hui partie intégrante de notre quotidien À tel point que les nouvelles générations grandissent en sachant qu'au rythme où vont les choses la terre ne sera bientôt plus habitable mais un mouvement de transformation est en marche celui de cette jeunesse justement qui lutte non seulement pour contrer les effets des changements climatiques mais surtout pour assurer à tout le monde un avenir juste où il fera bon vivre Écrit spécifiquement pour les jeunes mais accessible à un large public ce livre est un hommage à leur résistance et à leur force de mobilisation

qu'est ce que la dette publique d'où vient l'inflation le profit est-il source de progrès le chômage est-il un mal nécessaire l'État nuit-il à l'investissement mystérieuse et confuse l'économie est trop souvent mise hors de la portée du citoyen ordinaire qui n'en fait pas moins les frais de ses crises seuls les experts semblent autorisés à répondre à des questions dont dépend pourtant l'avenir de tous cette nouvelle édition du petit cours d'autodéfense en économie arrive à point nommé pour rompre ce déséquilibre

entièrement mis à jour bonifié d'une solide réflexion sur les inégalités l'ouvrage offre des synthèses claires et simples appuyées sur l'analyse de situations concrètes stanford montre ici que dès qu'on a démystifié les rouages du capitalisme tous peuvent le comprendre
