this volume collects contributions on leading figures in mechanism and machine science from Spain and Ibero America over the last two centuries. The contributions examine scientists whose work resulted in relevant technical scientific achievements with an impact on technology and science in the historical evolution of these fields and with an influence on the development of society. Large biographical notes describing the efforts and achievements of these persons are included as well, but a technical survey is the core of each chapter, offering a modern interpretation of their legacy. Includes articles on international business opportunities. This book, first published in 1988, examines the impact of multinational companies on the British economy and the British government's policy responses. It assesses the effects of multinationals both on the national economy and on different regions and evaluates the benefits and problems brought by overseas companies. It looks at how government has attempted to entice multinationals to invest and the UK government's success in these attraction efforts as compared with other countries. Regulatory aspects of policy are also reviewed and evaluated, and consideration is given to possible new policy approaches. This title will be of interest to students of business studies.

Jones Bartlett Learning CDX Automotive Cover includes advertising matter. The Lloyd's Register of Yachts was first issued in 1878 and was issued annually until 1980, except during the years 1916-18 and 1940-46. Two supplements containing additions and corrections were also issued annually. The register contains the names, details and characters of yachts classed by the Society together with the particulars of other yachts which are considered to be of interest. Illustrates plates of the flags of yacht and sailing clubs together with a list of club officers, an illustrated list of the distinguishing flags of yachtsmen, a list of the names and addresses of yacht owners and much other information.
