New Horizons in English 3 2019-10-03

this book clarifies current efforts to reform teaching by providing a conceptual analysis of what a

professional and a bureaucratic view of teaching entail case studies are presented illustrating what happens when differing approaches to teachers work are tried in three school districts the first chapter describes the two approaches to reform by examining their conceptions of what students should learn and how and what teachers should teach the next three chapters present the stories of three districts efforts to redesign teaching the teacher program is described in its district context and issues of implementation are analyzed chapter 5 examines how the three districts implemented divergent conceptions of teacher reform chapter 6 analyzes the politics of redesign by examining the roles of different groups in shaping district policies the final chapter synthesizes the arguments of the book and suggests that while short term improvements can be accomplished through bureaucracy serious reform requires professionalization an extensive reference list and three appendices research methods a site visit guide and an academy survey complete the volume II

Learning Composite Mathematics -5 2015-03-16

it appears to me that if one wants to make progress in mathematics one should study the masters and not the pupils niels henrik abel recent pedagogical research has supported abel s claim of the effectiveness of reading the masters students exposed to historically based pedagogy see mathematics not as a monolithic assemblage of facts but as a collection of mental processes and an evolving cultural construct built to solve actual problems exposure to the immediacy of the original investigations can inspire an inquiry mindset in students and lead to an appreciation of mathematics as a living intellectual activity triumphs transforming instruction in undergraduate mathematics via primary historical sources is an nsf funded initiative to design materials that effectively harness the power of reading primary historical documents in undergraduate mathematics instruction teaching and learning with primary source projects is a collection of 24 classroom modules psps produced by triumphs that incorporate the reading of primary source excerpts to teach core mathematical topics the selected excerpts are intertwined with thoughtfully designed student tasks that prompt students to actively engage with and explore the source material rigorously classroom tested and scrupulously edited to comply with the standards developed by the triumphs project each of the psps in this volume can be inserted directly into a course in real analysis complex variables or topology and used to replace a standard textbook treatment of core course content the volume also contains a comprehensive historical overview of the sociocultural and mathematical contexts within which the three subjects developed along with extensive implementation guidance students and faculty alike are afforded a deeper classroom experience as they heed abel s advice by studying today s mathematics through the words of the masters who brought that mathematics to life primary sources provide motivation in the words of the original discoverers of new mathematics draw attention to subtleties encourage reflection on today s paradigms and enhance students ability to participate equally regardless of their background these beautifully written primary source projects that adopt an inquiry approach are rich in features lacking in modern textbooks

prompted by the study of historical sources students will grapple with uncertainties ask questions interpret conjecture and compare multiple perspectives resulting in a unique and vivid guided learning experience david pengelley oregon state university
