## **even order harmonic distortion observations during multiple**

Jan 24 2023

large geomagnetic storms are a space weather hazard to power transmission networks due to the effects of geomagnetically induced currents (GICs). GICs can negatively impact power transmission systems through the generation of even order current and voltage harmonics due to half cycle transformer saturation. This study investigates a decade of even order voltage total harmonic distortion (VTHD) hereon.

## **peculiar weather patterns effects on air pollution and covid**

Dec 23 2022

In the frame of global warming and increased frequency of heat waves (HWs), several studies have shown that COVID-19 may potentially exacerbate the air pollutants and temperature effects on human health during heat waves (Bhatt et al 2020).
