The Legend of Briggs & Stratton

1995

the greatest small engines in the world are manufactured by briggs stratton from the informal partnership stephen f briggs and harold m stratton formed in 1908 briggs stratton has evolved into an industry leader whose name is synonymous with the lawn mower engines it pioneered the legend of briggs stratton 208 pages is filled with 125 color and 145 black white images covering briggs stratton s fascinating history

How to Repair Briggs and Stratton Engines, 4th Ed.

walt was born in nelsonville a small town in southeastern ohio whose population has been around 5 000 for the last hundred years in this book he tells us about many extraordinary events that he survived from the age of three to eighteen while growing up in nelsonville like the time he almost drowned in the creek below their home on 969 pleasant view avenue or taking rabies shots when their pet dogs got rabies from a pack of wild dogs that roamed the hills on the other side of the valley or surviving car wrecks when the cars were totaled and there were no seat belts then he graduated from nhs in 1960 in a class of 56 so you knew everyone and everyone knew you and your business you didn t do anything without the whole town finding out very quickly what happened so when he broke the taillight in his dad s car dad knew about it before he got home or when he drove that same car and took his girl friend all the way to columbus to the kahiki supper club for dinner one time and ruined his older brother s white sport coat and tanya s new dress when an orange fountain exploded while they waited in the kahiki s crowded lobby somehow people knew about the incident by the time they got back to nelsonville they quickly told a story to their friends first then their parents that some kid sprayed orange soda all over them at the high school dance that evening

in recent years emissions from transportation engines have been studied widely because of the contribution of such engines to atmospheric pollution during this period the amounts of pollutants emitted the mechanism of their formation and means of controlling emissions have been investigated in industrial and government laboratories as well as at universities the results of these investigations have generally been published as individual articles in journals transactions meeting proceedings and frequently in company reports this proliferation of technical information makes it difficult for workers in the field to keep abreast of all developments for this reason the editors felt the need for a book which would survey the existing state of knowledge in wide albeit selected areas and would provide a guide to the relevant literature this book is intended to fulfill this function it is recognized that all aspects of transportation engine emissions cannot be explored in a single volume in this book attention is focused primarily on sources and mechanisms of emission formation within the
