designers screenwriters and actors and shed light on their artistic visions and storytelling sensibilities people interested in what the great film critics had to say have usually been shortchanged as to their backgrounds and just why they are qualified to sit in judgment using mini biographies placed within a chronological framework the complete history of american film criticism is the biography of a profession whose cultural impact has left an indelible mark on the 20th century s most significant art form one of the most powerful forces in world culture american cinema has a long and complex history that stretches through more than a century this history not only includes a legacy of hundreds of important films but also the evolution of the film industry itself which is in many ways a microcosm of the history of american society historical dictionary of american cinema second edition contains a chronology an introduction and an extensive bibliography the dictionary section has more than 600 cross referenced entries covering people films companies techniques themes and subgenres that have made american cinema such a vital part of world culture this transitional era covered the years 1908 1917 witnessed profound changes in the structure of the motion picture industry in the us involving film genre film form filmmaking practices the emergence of the studio system the pattern which emerged dominated the industry for decades to come in the end of cinema as we know it contributors well known in the movie field talk about the movie industry and look at the variety of new ways we are

viewing films they query whether or not we are getting different better movies american film in the 1970s is analyzed fully in this groundbreaking study revealing an art form in transition and widening in scope to offer serious critiques of american culture alongside increasingly well produced entertainment simultaneous the introduction to this book traces the history of american film against a backdrop of broader changes in late nineteenth and twentieth century popular culture a series of interpretive essays then examines how classic films treated american political economic and social life primary sources that illuminate film history are also included as is an extensive bibliographic guide to the literature on american movies preface p ix foreign films once enjoyed a position of prominence on american theater screens by the start of world war i however the united states film industry was strong enough to challenge that foreign presence and foreign films in america have been insignificant ever since for about a century the hollywood cartel has dominated the production distribution and exhibition of movies domestically and around the world this work traces the history of the foreign film in america from its domination in the early days to its low standing in the present looking at the attempts made by foreign producers to increase their presence on american cinema screens the responses by hollywood to those attempts and the oligopoly of hollywood s few producers the work discusses the cultural differences between foreign artistic expression and the commercialism of the american film and analyzes hollywood s

explanations for the lack of a foreign presence americans have unique tastes they don t like subtitles foreign films are immoral or badly made trade union pressure and so on an appendix detailing the all time gross earnings of foreign language films and a full bibliography conclude the work which is illustrated with stills and posters this book introduces the reader to basic issues related to the phenomenon of american cinema it looks at american film history from the 1890s through the spring of 2020 but it does not always explore this history in a purely chronological way in fact it is not strictly speaking a history rather it is a cultural history which focuses more on topics and issues than on what happened when it begins with a profile of classical hollywood cinema as a unique economic industrial aesthetic and cultural institution it considers the experience of moviegoing the nature of hollywood storytelling and the roles played by the studio system the star system and film genres in the creation of a body of work that functions not only as entertainment but as a portrait of the relationship between an american national identity and an industrialized mass culture that has slowly evolved over the past century this book assumes that the reader has little or no formal training in film history theory or aesthetics it presents fairly basic concepts in such a way as to encourage discussion not so much of individual films but of films in general for this reason the book concentrates on large groupings of films on genres topics and periods of film history this textbook differs from the more traditional histories of the cinema for

certain specific and important reasons over the past fifty years the field of film study has undergone a tremendous transformation this change has been spearheaded by the work of a new generation of scholars who challenge the traditional way in which film history has been written and taught introduction to film courses that fifty years ago taught film as art drew heavily upon the approaches of new criticism contemporary film courses now teach film not only as art but also as film and they attempt to situate film as an art form within a larger industrial economic social and cultural context they rely heavily on cultural studies new historicism psychoanalysis and other contemporary critical disciplines film history texts have changed over the years as well in the past histories consisted of simple chronological accounts of who did what and what happened when and of the stories of great men sic and their achievements and of straightforward accounts of the influence of technology and economics on the course of a history that unfolds in a linear fashion up to the present more recently film scholars have begun to rewrite these traditional histories creating what thomas elsasser refers to as the new film history at its best this history is driven by a sophisticated theoretically informed revisionism it simply refuses to accept the easy answers to basic historical questions that had been offered up by past historians with the initial publication of american cinema american culture in 1994 the methods and discoveries of the new film history were applied to an introductory level text surveying the history of the american

cinema this provocative three volume encyclopedia is a valuable resource for readers seeking an understanding of how movies have both reflected and helped engender america s political economic and social history movies in american history an encyclopedia is a reference text focused on the relationship between american society and movies and filmmaking in the united states from the late 19th century through the present beyond discussing many important american films ranging from birth of a nation to star wars to the harry potter film series the essays included in the volumes explore sensitive issues in cinema related to race class and gender authored by international scholars who provide unique perspectives on american cinema and history written by a diverse group of distinguished scholars with backgrounds in history film studies culture studies science religion and politics this reference guide will appeal to readers new to cinema studies as well as film experts each encyclopedic entry provides data about the film an explanation of the film s cultural significance and influence information about significant individuals involved with that work and resources for further study this work offers insights into how specific films influenced the americanization of the holocaust and how the medium per se helped seed that event into the public consciousness in addition to an in depth study on films produced for both theatrical release and tv since 1937 including the great dictator cabaret julia and the mini series holocaust this work provides an analysis of schindler s list and the debate over the merit of

spielberg s vision of the holocaust it also examines more thoroughly made for television movies such as escape from sobibor playing for time and war and remembrance a special chapter on the diary of anne frank discusses the evolution of that singularly european work into a universal symbol paying special attention to the tumultuous 1960s in america it assesses the effect of the era on holocaust films made during that time it also discusses how these films helped integrate the holocaust into the fabric of american society transforming it into a metaphor for modern suffering finally the work explores cinema in relation to the americanization of the jewish image hollywood has a growing fascination with america s past this book offers an analysis of how and why contemporary hollywood films have sought to mediate american history it considers whether or how far contemporary films have begun to unravel the unifying myths of earlier films and periods in hollywood we hear it s all about the money it s a ready explanation for why so few black films get made no crossover appeal no promise of a big payoff but what if the money itself is color coded what if the economics that governs film production is so skewed that no film by about or for people of color will ever look like a worthy investment unless it follows specific racial or gender patterns this monica ndounou shows us is precisely the case in a work as revealing about the culture of filmmaking as it is about the distorted economics of african american film ndounou clearly traces the insidious connections between history content and cash in black films how does

history come into it hollywood s reliance on past performance as a measure of potential success virtually guarantees that historically underrepresented underfunded and undersold african american films devalue the future prospects of black films so the cycle continues as it has for nearly a century behind the scenes the numbers are far from neutral analyzing the onscreen narratives and off screen circumstances behind nearly two thousand films featuring african americans in leading and supporting roles including such recent productions as bamboozled beloved and tyler perry s diary of a mad black woman ndounou exposes the cultural and racial constraints that limit not just the production but also the expression and creative freedom of black films her wide ranging analysis reaches into questions of literature language speech and dialect film images and narrative acting theater and film business practices production history and financing and organizational history by uncovering the ideology behind profit driven industry practices that reshape narratives by about and for people of color this provocative work brings to light existing limitations and possibilities for reworking stories and business practices in theater literature and film providing an indispensable resource for students and general readers this book serves as an entry point for a conversation on america s favorite pastime focusing in on generational differences and the evolution of american identity in an age marked by tension and division americans of all ages and backgrounds have turned to film to escape the pressures of

visionaries many of whom are considered among the greatest screenwriters in american film history as orson welles once said in my opinion the writer should have the first and last word in filmmaking this book allows them to have that exciting opportunity some of the highlights from these interviews include betty comden and adolph green s explaining how a nightclub skit became the premise for singin in the rain ernest lehman s description of how while in conversation with hitchcock his unconscious suddenly solved the plot problems in north by northwest carl gottlieb s remembrance of the terrible pressure involved with writing the script for jaws while shooting was already underway and sylvester stallone s account of how he received final approval to star in rocky from studio executives who thought he was just another actor this book examines a range of films that characterized the decade including hollywood movies documentaries and the independent and experimental films discusses avant garde films produced during the sixties and considers the work of stan brakhage and andy warhol one of the great contemporary film makers celebrates american movies martin scorsese s masterly account of american movies is balanced between subjective enthusiasm and objective analysis scorsese probably the most cinephile of all directors starts from his own childhood love affair with the movies when he discovered king vidor s delirious duel in the sun as a boy this is not an orthodox film history but rather a genuinely personal voyage of discovery scorsese recalls from his youth

that all kinds of movies had strong influences on him not only the prestige titles from major directors and studios but also the unsung b movies the despised and undervalued genres what scorsese responds to and celebrates is film itself the movies that make the fullest use of the medium s potential and the film makers who worked within the system yet still retained a personal vision lavishly illustrated and strikingly designed this book is essential reading for anyone interested in movies cinema has always engaged with the experiences hopes fears and anxieties of and about adolescents teenagers and young people this book is a comprehensive and accessible history of the depiction of teenagers in american film from the silent era to the twenty first century timothy shary explores the development of teenage roles across eras and industrial cycles such as the juvenile delinquent pictures of the 1950s the beach movies of the 1960s the horror films of the 1980s and the fantasy epics of the 2000s he considers the varied genres of the teen movie horror and melodrama romance and adventure fantasy and science fiction and its shifting themes and tropes around sex and gender childhood and adulthood rebellion and social order crime and consumer culture teen movies features analyses of films such as rebel without a cause 1955 splendor in the grass 1961 carrie 1976 the breakfast club 1985 american pie 1999 and the twilight series 2008 2012 this second edition is updated throughout and features a new chapter examining millennials and generation z on screen with discussions of many contemporary topics including

this book introduces the reader to basic issues related to the phenomenon of american cinema it looks at american film history from the 1890s through the spring of 2020 but it does not always explore this history in a purely chronological way in fact it is not strictly speaking a history rather it is a cultural history which focuses more on topics and issues than on what happened when it begins with a profile of classical hollywood cinema as a unique economic industrial aesthetic and cultural institution it considers the experience of moviegoing the nature of hollywood storytelling and the roles played by the studio system the star system and film genres in the creation of a body of work that functions not only as entertainment but as a portrait of the relationship between an american national identity and an industrialized mass culture that has slowly evolved over the past century this book assumes that the reader has little or no formal training in film history theory or aesthetics it presents fairly basic concepts in such a way as to encourage discussion not so much of individual films but of films in general for this reason the book concentrates on large groupings of films on genres topics and periods of film history this textbook differs from the more
