math mammoth grade 3 a worktext light blue series is the student book for the first half of third grade math in this part a the main areas of study are addition and subtraction within 1 000 including mental math the concept of multiplication the multiplication tables telling time and working with time intervals counting coins and solving problems related to money features math mammoth focuses on conceptual understanding it explains the why so your children can understand the math not just learn how to do it concepts are often explained with visual models followed by exercises using those models these visual models can take the place of manipulatives for many children however it is very easy to add corresponding manipulatives to the lessons if so desired the curriculum is mastery oriented this means it concentrates fairly long on a topic delving into its various aspects this promotes conceptual understanding as

opposed to spiral curricula that often tend to jump from topic to topic too much there is a strong emphasis on mental math and number sense it requires very little teacher preparation which is a big help to most parents the curriculum has no separate teacher s manual nor is it scripted the introduction to each chapter has some notes for the teacher concerning the material in the chapter all the instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see maria herself teach the material after each chapter introduction you will find a list of internet links and resources games quizzes animations etc that can be used for fun illustrations and further practice for multiplication tables and division facts you can use our online practice program free this curriculum is essentially the same as the u s version of math mammoth grade 3 only customized for the canadian audience in these aspects the curriculum teaches the metric measurement units imperial units such as inches and pounds are not used the spelling conforms mostly to american english taking into account a few key differences where canadian english follows british english numbers are formatted with a space as a thousands separator and a point as a decimal separator page paper size is letter

math mammoth grade 3 review workbook is intended to give students a thorough review of third grade math it has both topical as well as mixed spiral review worksheets and includes both topical tests and a comprehensive end of the year test the tests can also be used as review worksheets instead of tests you can use this workbook for various purposes for summer math practice to keep a child from forgetting math skills during other break times to prepare students who are going into fourth grade or to give third grade students extra practice during the school year the topics reviewed in this workbook are addition and subtraction multiplication concept and tables clock money place value with thousands geometry measuring division fraction the content for these is taken from math mammoth grade 3 complete curriculum so it works especially well to prepare students for grade 4 in math mammoth however the content follows a typical study for grade 3 so this workbook can be used no matter which math curriculum you follow please note this book does not contain lessons or instruction for the topics it is not intended for initial teaching it also will not work if the student needs to completely re study these topics the student has not learned the topics at all for that purpose please consider math mammoth grade 3 complete curriculum which has all the necessary instruction and lessons
