A Change of Climate

2010-06-24

from the double man Booker prize winning author of *Wolf Hall* and *Bring Up the Bodies* this is an epic yet subtle family saga about broken trusts and buried secrets

Climate and Culture

2019-10-03

discusses how culture both facilitates and inhibits our ability to address live with and make sense of climate change

Organizing Cools the Planet

2011

Organizing Cools the Planet weaves together stories analysis organizing tools and provocative questions to offer a snapshot of U.S. climate activism and provide pathways for readers to participate in it. Authors share hard lessons learned reflect on strategy and grapple with the challenges of their roles as organizers who do not come from frontline communities but work to amplify and build a climate justice movement led by low income people communities of color indigenous youth and other constituencies most directly impacted by the crisis rooted in the authors experiences organizing in local national and international arenas. This pamphlet grapples with the challenges and overwhelming odds young activists face today. *Organizing Cools the Planet* challenges readers to look at the scale of ecological collapse with open eyes without falling prey to disempowering doomsday narratives. It asks key pressing questions for those who wish to take our generational challenge seriously. This pamphlet is for anyone who wants to build a movement with the resiliency to navigate one of the most rapid transitions in human history.

2021-10-19

this book explores how vulnerable and resilient communities from SIDS are affected by climate change proposes and where possible evaluates adaptation activities identifies factors capable of enhancing or inhibiting SIDS people's long term ability to deal with climate change and critiques the discourses vocabularies and constructions around SIDS dealing with climate change. The contributions written by well established scholars as well as emerging authors and practitioners in the field include conceptual papers coherent methodological approaches and case studies from the communities based in the Caribbean Sea and the Indian Atlantic and Pacific Oceans. In their introduction the editors contextualise the book within the current literature they emphasise the

importance of stronger links between climate change science and policy in sids both to increase effectiveness of policy and also boost scholarly enquiry in the context of whose communities are often excluded by mainstream research this book is timely and appropriate given the recent commission by the intergovernmental panel on climate change ipcc of a special report that aims at addressing vulnerabilities especially in islands and coastal areas as well as the adaptation and policy development opportunities following the paris agreement coupled with this there is also the need to support the policy community with further scientific evidence on climate change related issues in sids accompanying the first years of implementation of the united nations sustainable development goals

Potential Implications of Climate Change in the Built Environment

2000

in the context of growing concern over climate change hilary marlow explores what an ecological reading of the biblical text can contribute to contemporary environmental ethics includes a survey of creation theology in church history and a detailed exegetical study of the texts of the biblical prophets amos hosea and first isaiah

Biblical Prophets and Contemporary Environmental Ethics

2009-10-01

economic research on climate change has been crucial in advancing our understanding of the consequences associated with global warming as well as the costs and benefits of the various policies that might reduce emissions of greenhouse gases as nations work to develop climate policies economic insights into their design and implementation are ever more important with a balance between theoretical and empirical approaches the design and implementation of us climate policy looks at the possible effects of various climate policies on a range of economic outcomes the studies that comprise the volume examine topics that include the coordination or lack thereof between the federal and state governments implications of monitoring and enforcing climate policy and the specific consequences of various climate policies for the agricultural automotive and buildings sectors

The Design and Implementation of US Climate Policy

2012-09-06

national governments are ill equipped for tackling transnational environmental problems from ozone depletion to soaring trade in commodities like timber and shrimp as these issues climb higher on the political agenda industrial and developing countries are on a collision course over climate change and water shortages goods money microbes pollution people and ideas are crossing global boundaries evermore frequently the implications for our future and for the health of the planet are profound this text describes what we need to do to cope with the challenge

2008-04-11

winner 2014 hilary weston writers trust prize for non fiction forget everything you think you know about global warming the really inconvenient truth is that it s not about carbon it s about capitalism the convenient truth is that we can seize this existential crisis to transform our failed system and build something radically better in her most provocative book yet naomi klein author of the global bestsellers the shock doctrine and no logo tackles the most profound threat humanity has ever faced the war our economic model is waging against life on earth klein exposes the myths that are clouding the climate debate we have been told the market will save us when in fact the addiction to profit and growth is digging us in deeper every day we have been told it s impossible to get off fossil fuels when in fact we know exactly how to do it it just requires breaking every rule in the free market playbook reining in corporate power rebuilding local economies and reclaiming our democracies we have also been told that humanity is too greedy and selfish to rise to this challenge in fact all around the world the fight back is already succeeding in ways both surprising and inspiring climate change klein argues is a civilizational wake up call a powerful message delivered in the language of fires floods storms and droughts confronting it is no longer about changing the light bulbs it s about changing the world before the world changes so drastically that no one is safe either we leap or we sink once a decade naomi klein writes a book that redefines its era no logo did so for globalization the shock doctrine changed the way we think about austerity this changes everything is about to upend the debate about the stormy era already upon us

This Changes Everything

2014-09-16

public responses to fossil fuel export provides wide ranging theoretical and methodological international contributions on the human dimensions of fossil fuel export with a distinctive focus on exporting countries some of which are new entrants into the marketplace what do members of the public think about exporting fossil fuels in places where it is happening what do they see as its main risks and benefits what connections are being made to climate change and the impending energy transition how have affected communities responded to proposals related to fossil fuel export broadly defined to include transport by rail pipeline and ship contributions to the work are presented in three parts the first part synthesizes the background of the project outlines major social science theories and relevant previous research and identifies global trends in energy production regional and national case studies related to public opinion on fossil fuel export are included in part

two of the manuscript part three highlights community based case studies implications for research and practice feature in the concluding chapter serves as a definitive reference on the social dimensions of fossil fuel export bringing together case examples and public opinion research from around the world on this important but understudied issue explores the broader implications for growing field of energy social science particularly those focused on public perceptions of energy development siting controversies and community impacts from energy development provides practical and policy implications including the need for better community inclusion in export and transport facility siting decisions the changing status of certain fuels impacts on public awareness and the relevance of the movement of energy resources

Public Responses to Fossil Fuel Export

2022-01-29

for some years now growing scientific warnings have continued to strengthen the belief that an unprecedented global warming is underway and that only an urgent system wide transformation can avoid climate disaster in his june 2 2022 address to the stockholm 50 conference the un secretary general antonio guterres construed climate emergency as one of the key drivers of the triple planetary crisis despite this the overriding impression left by cop27 held in sharm el sheikh in november 2022 was of a divided institution floundering and nowhere close to realizing its stated aim of stabilizing greenhouse gas concentrations at a level that would prevent dangerous interference with the climate system while prognoses and projections set the stage for a climate change emergency the legally ordained platform for institutionalized cooperation to deal with the problem seems always to be achieving too little too late this book regulating global climate change presents articles from the special climate change issue of the journal environmental policy and law vol 52 5 6 2022 published to mark the 30th year of the unfccc the book provides a sequel to two previously published ios press books our earth matters 2021 and envisioning our environmental future 2022 and the contributions included here seek to make sense of the marathon climate change regulatory process the book is organized into 5 parts climate normativity regime at the crossroads climate justice factoring gender and the paris conundrum urging scholars and decision makers to consider the approach process tools and techniques used to address the primary objective of the unfccc as well as strongly calling for a decisive new normative push from common concern to planetary concern the book will be of interest to all those involved in the process of tackling and dealing with the adverse effects of global climate change bharat h desai is professor of international law jawaharlal nehru chair in international environmental law and chairperson of the centre for international legal studies at school of international studies of jawaharlal nehru university new delhi editor in chief of the global journal environmental policy and law amsterdam ios press

World and Time

2015

this book explores how vulnerable and resilient communities from sids are affected by climate change proposes and where possible evaluates adaptation activities identifies factors capable of enhancing or inhibiting sids

people's long term ability to deal with climate change and critiques the discourses, vocabularies and constructions around issues dealing with climate change. The contributions written by well established scholars as well as emerging authors and practitioners in the field include conceptual papers, coherent methodological approaches and case studies from the communities based in the Caribbean Sea and the Indian Atlantic and Pacific Oceans. In their introduction, the editors contextualise the book within the current literature. They emphasise the importance of stronger links between climate change science and policy in issues both to increase effectiveness of policy and also boost scholarly enquiry in the context of whose communities are often excluded by mainstream research. This book is timely and appropriate given the recent commission by the Intergovernmental Panel on Climate Change (IPCC) of a special report that aims at addressing vulnerabilities especially in islands and coastal areas as well as the adaptation and policy development opportunities following the Paris Agreement. Coupled with this, there is also the need to support the policy community with further scientific evidence on climate change related issues in issues accompanying the first years of implementation of the United Nations Sustainable Development Goals.

Climate Change in the Dominican Republic

2023-08-15

Climate projections show that Britain can expect wetter winters, drier summers and a higher likelihood of flash floods, heat waves and droughts. Yet adaptation to climate change has been given only a fraction of the attention that has gone into reducing greenhouse gases. The government must build awareness and support for the wide ranging and urgent programme of action that is needed to protect people, property and prosperity and safeguard the natural environment. Adapting infrastructure and homes will be expensive to maintain current levels of flood protection for homes. Real terms spending on flood defences will need to increase from its current level of around 600 million per annum to around 1 billion in 2035. Estimates in 2009 suggest that by the end of the century around 7 billion may be needed to improve the Thames flood barrier and tidal defences. New homes being built now must be designed to cope with the inevitable changes in climate over the next 50-80 years. The government must make adaptation and mitigation more central to the planning system. New developments should only be permitted if they are suited to future climates. Existing homes will also need to be adapted so that they are comfortable during hotter summers and better protected against the risk of flooding. The government must help to kick start an integrated retrofit programme that covers adaptation, water efficiency and energy efficiency. Green infrastructure such as water storage, greater tree cover and more open green spaces must also be promoted.

Regulating Global Climate Change

2021

Climate change differs from any other problem that as collective humanity we face today. If it goes unchecked, the consequences are likely to be catastrophic for human life on earth. Yet for most people and for many policy makers too, it tends to be a back of the mind issue. This book argues controversially, we do not have a systematic

politics of climate change politics as usual won't allow us to deal with the problems we face while the recipes of the main challenger to orthodox politics the green movement are flawed at source cover

Small Island Developing States

2010-03-25

there is increasing understanding globally that climate change will have profound and mostly harmful effects on human health this authoritative book brings together international experts to describe both direct such as heat waves and indirect such as vector borne disease incidence impacts of climate change set in a broad international economic political and environmental context this unique book also expands on these issues to address a third category of potential longer term impacts on global health famine population dislocation and conflict this lively yet scholarly resource explores these issues fully linking them to health in urban and rural settings in developed and developing countries the book finishes with a practical discussion of action that health professionals can yet take

Adapting to climate change

2009-05-05

this book has three main goals the first is to celebrate the work of a great public health figure the late a j tony mcMichael 1942 2014 the second is to position contemporary public health issues in an interdisciplinary context and in ways that highlight the interdependency between the environment human institutions and behaviours a broad approach championed by tony the third is to encourage emerging and future public health leaders to advocate for policies and cultural change to sustain and improve human health from a foundation of objective scholarship the book's foreword and 38 chapters were written by people who were inspired by tony many of whom worked with him at some point in the last 40 years its structure reflects five major public health domains each of which tony made major contributions to in an extremely productive academic life occupational health and safety environmental and social epidemiology nutrition and food systems climate change and health and ecosystem change and infectious disease the final section transformation is dedicated to tony's desire for public health scientists to propose adaptive and mitigating solutions to the problems they were observing each section contains at least one key publication involving tony there is also a selection of artworks from an exhibition which formed part of the conference held to honour tony at the Australian National University in 2012 this conference formed the first part of tony's festschrift completed by this book

Politics of Climate Change

2016-07-20

climate change law and policy in the middle east and north africa region provides an in depth and authoritative examination of the guiding principles of climate change law and policy in the MENA region this

volume introduces readers to the latest developments in the regulation of climate change across the region including the applicable legislation institutions and key legal innovations in climate change financing infrastructure development and education it outlines participatory and bottom up legal strategies focusing on transparency accountability gender justice and other human rights safeguards needed to achieve greater coherence and coordination in the design approval financing and implementation of climate response projects across the region with contributions from a range of experts in the field the collection reflects on how mena countries can advance existing national strategies around climate change green economy and low carbon futures through clear and comprehensive legislation taking an international and comparative approach this book will be of great interest to students scholars and practitioners who work in the areas of climate change environmental law and policy and sustainable development particularly in relation to the mena region

Climate Change and Global Health

2015-07-31

this book is about climate change adaptation it contains nine systems of sustainability that can be put together in one location food forest system organic farming system green business system craft village system permaculture school system green architecture system earth commune system off grid system and hope enculturation system these systems together can convince people to change their lifestyle from carbon emitting to carbon absorbing way creating climate adaptive re settlements earth communes is claimed by this book as the best solution to climate change as it can change the lifestyle of many people away from material development towards a more ecological way of life this book details the practical steps of changing our lifestyle from food to crops to recreation prayers windmills baskets etc that will create the lifestyle that is more adaptive to climate change finally this book aims to replicate these care communes all over the world

Health of People, Places and Planet

2005-07-06

the ongoing global warming is setting off changes in global climate what has come to be known as climate change with dire consequences on the ecosystem of the earth and on human life being experienced by the world for over the last many decades in the form of climatic extremes erratic rainfall floods droughts cyclones having adverse impact on water resources agriculture health human settlements biodiversity loss of glaciers rise in sea level ocean acidification etc all these have been scientifically established through the assessment reports of the intergovernmental panel on climate change the causes of this rising threat are mainly indiscriminate human activities of burning of fossil fuels deforestation intensive agriculture and animal husbandry industrial emissions etc causing continual rise of emissions of greenhouse gases the general perception is that decision making and action is slow and the threat is increasing by the day there is lack of public awareness toward the danger since human activities are the cause it is through modification of human activities that the danger can be averted the purpose of this book is to explain the whole phenomenon of climate change in easy language and lucid style for creating public awareness aware people can prevail upon

the governments and authorities to take up the mitigation and adaptation efforts in right earnest and also on their part they can conduct their daily activities with thought of abating the challenge

The Economics of Climate Change

2005-01-01

a practical guide to cultivating expansive understandings of climate change and environmental regeneration in k 12 students through classroom instructional practices and curricula teaching climate change lays out a comprehensive ngss aligned approach to climate change education that builds in depth knowledge of the subject empowers students and promotes a social justice mindset in this fortifying and inspiring work mark windschitl guides classroom teachers and educational leaders through an ambitious multilevel multidisciplinary framing of climate change education as an integral element of school curricula exuding hope for the future windschitl emphasizes the big picture of research informed teaching about climate change he presents real life classroom examples that illustrate not only key stem concepts such as carbon cycles and the greenhouse effect biodiversity and sustainability but also broader issues including the countering of misinformation decarbonizing solutions the centering of human stories and the advancement of equity and environmental justice windschitl offers keen advice for using methods such as storytelling project based learning and models of inquiry backed by authoritative evidence as core strategies in science teaching and learning he also addresses the social emotional toll that discussion of the climate crisis may exact on both students and teachers this timely book equips teachers to approach climate education with the urgency and empathy that the topic requires and shows how the classroom can inspire students to activism

Tropical Forests and Adaptation to Climate Change

2021-07-28

national critical functions ncfs are government and private sector functions so vital that their disruption would debilitate security the economy public health or safety researchers developed a risk management framework to assess and manage the risk that climate change poses to the ncfs and use the framework to assess 27 priority ncfs this report details the risk assessment portions of the framework

Climate Change Law and Policy in the Middle East and North Africa Region

2019-05-22

the language of climate politics offers readers new ways to talk about the climate crisis that will help get fossil fuels out of our economy and save our planet it s an analysis of the current discourse of american climate politics but also a critical history of the terms that most directly influence the way not just conservatives but centrists on both sides of the political divide think and talk about climate change in showing how those terms

lead to mistaken beliefs about climate change and its solutions the book equips readers with a new vocabulary that will enable them to neutralize climate propaganda and fight more effectively for a livable future

Pilgrimage to Paradise

2015-01-23

in addressing the urgent questions raised by climate change this book provides a comprehensive overview of the anthropology of climate change guided by a critical political ecological framework it argues that anthropologists must significantly expand their focus on climate change and their contributions to responding to climate change as a grave risk to humanity the book presents a human socioecological framework for conceptualizing climate change it examines the emergence and slow maturation of the anthropology of climate change reviews the historic foundations for this work in the archaeology of climate change and presents three alternative contemporary theoretical perspectives in the anthropology of climate change the book synthesizes anthropological work and perspectives on climate change in the form of case studies in various regions of the world revealing the nature of global climate change as constituting multiple and somewhat diverse changes in local settings it explores the applied anthropology of climate change in terms of the ways anthropologists are contributing to climate policy working with communities on climate change issues as well as within the climate movement both internationally and nationally finally it provides an overview of what other the social sciences are saying about climate change and explores ways that the anthropology of climate change can interface with sociology political science and human geography in order to create an integrated social science of climate change this book gives researchers and students in environmental anthropology climate change human geography and sociology a novel framework for understanding climate change that emphasizes human socioecological interactions

Understanding Climate Change-Its Mitigation and Adaptation to It

2011-01-01

climate change is an issue that has been generating a significant amount of discussion research and debate in recent years climate change continues to evolve at a rapid rate and continues to have a wide array of effects on everything from temperature to plant life beyond the negative environmental impacts climate change is also proving to be a detriment to society with increasingly violent natural disasters and human health effects it is essential to stay up to date on the latest in emerging research within this field as it continues to develop the research anthology on environmental and societal impacts of climate change discusses the varied effects of climate change throughout all areas of life and provides a comprehensive dive into the latest research on key elements of society that are affected by the rapidly increasing climate covering a range of topics including reproduction plants and animals and energy demand it is ideal for environmentalists policymakers environmental engineers scientists disaster and crisis management personnel professionals government officials practitioners upper level students and academics interested in emerging research on the numerous impacts of climate change

Climate

2023-08-29

readers of the martin cole series of novels will be familiar with the cosy side apart from a murder or two of the fictional devon town of roselake in his new novel alan tootill pulls the curtain aside to reveal what goes on behind roselake s tranquil façade a request to change a street name leads to division in the town vigilantes roaming the streets and police helicopters in the air not to mention the burning down of the town hall english provincialism gently but tellingly skewered a great gallery of characters a ring of authenticity even when or because things verge on the preposterous and comic

Teaching Climate Change

2022-04-05

how does climate change affect social work and social development what actions are needed to integrate the three pillars of economic development environmental development and social protection with global warming and the increase in natural disasters due to the emission of greenhouse gases an alternative approach to the natural environment is vital the main focus of this volume is to emphasize the person in environment concept and to find measures for its implementation for social work the environment has traditionally been viewed as a world of human relationships as opposed to the interaction between man and environment this informative and incisively written edited collection brings together experts from around the world to analyze the person in environment concept and to find measures for its implementation through the presentation of theoretical and practical platforms for environmental social work or green social work we hope to bring about a new paradigmatic shift in our attitude to the concept of person in environment

Assessing Risk to the National Critical Functions as a Result of Climate Change

2024

while economic and other social science expertise is indispensable for successful public policy making regarding global climate change social scientists face trade offs between the scientific credibility policy relevance and legitimacy of their policy advice from a philosophical perspective this book systematically addresses these trade offs and other crucial challenges facing the integrated economic assessments of the intergovernmental panel on climate change ipcc based on john dewey s pragmatist philosophy and an analysis of the value laden nature and reliability of climate change economics the book develops a refined science policy model and specific guidelines for these assessments of climate policy options the core idea is to scientifically explore the various practical implications of alternative climate policy pathways in an interdisciplinary manner together with diverse stakeholders this could facilitate an iterative deliberative public learning process concerning disputed policy issues this volume makes novel contributions to three strands of the literature 1 the

philosophy of social science in policy 2 the philosophy of economics and 3 debates about the design of scientific assessments including the continuous ipcc reform debate this work is thus interesting for philosophers and other scholars reflecting on the science policy interface but also for assessment practitioners climate policy makers and economists the science policy approach developed in this volume has already influenced the recent socio economic ipcc assessment

The Language of Climate Politics

2014-04-24

this book provides original critical insights into climate politics and new directions for society s response for researchers advanced students and policy makers

The Anthropology of Climate Change

2021-10-29

climate change temporalities explores how various timescales timespans intervals rhythms cycles and changes in acceleration are at play in climate change discourses it argues that nuanced detailed and specific understandings and concepts are required to handle the challenges of a climatically changed world politically and socially as well as scientifically rather than reflecting abstractly on theories of temporality this edited collection explores a variety of timescales and temporalities from narratives experience popular culture and everyday life in addition to science and history and the entanglements between them the chapters are clustered into three main sections exploring a range of genres such as questionnaires interviews magazines news media television series aquariums and popular science books to critically examine how and where climate change understandings are formed the book also includes chapters historicising notions of climate and temporality by exploring scientific debates and practices climate change temporalities will be of great interest to students and scholars of humanistic climate change research environmental humanities studies of temporality and historicity cultural studies cultural history and popular culture

Research Anthology on Environmental and Societal Impacts of Climate Change

2016-12-16

a synthesis of the relevant agreements customary norms and ongoing discussions on the international law on climate change

Beggars Way

2016-05-06

this book compares how governments in 192 countries perceive climate change related health risks and which measures they undertake to protect their populations building on case studies from the united kingdom ireland south korea japan and sri lanka the politics of the climate change health nexus demonstrates the strong influence of epistemic communities and international organisations on decision making in the field of climate change and health jungmann shows that due to the complexity and uncertainty of climate change related health risks governments depend on the expertise of universities think tanks international organisations and researchers within the public sector to understand strategize and implement effective health adaptation measures due to their general openness towards new ideas and academic freedom the book shows that more democratic states tend to demonstrate a higher recognition of the need to protect their populations however the level of success largely depends on the strength of their epistemic communities and the involvement of international organisations this volume will be of great interest to students and scholars of climate change and public health it will also be a valuable resource for policymakers from around the world to learn from best practices and thus improve the health adaptation work in their own countries
