since the onset of economic reform in 1986 this book argues that as in the socialist era current gender relations bear the imprint of state gender policies and discourses this is more than an index because it gives the death date place of residence at death and often the parents or other relatives in addition to the date of the newspaper the book is a timely report on advanced methods and applications of computational intelligence systems it covers a long list of interconnected research areas such as fuzzy systems neural networks evolutionary computation evolving systems and machine learning the individual chapters are based on peer reviewed contributions presented at the 16th annual uk workshop on computational intelligence held on september 7 9 2016 in lancaster uk the book puts a special emphasis on novels methods and reports on their use in a wide range of applications areas thus providing both academics and professionals with a comprehensive and timely overview of new trends in computational intelligence jean harlow the godmother of blondes lit the torch for the blonde bombshell creating an image and persona that would be passed on for generations to come jean s life was cut tragically short at the age of 26 but the flame reignited in the 1950s with the most notorious blondes of all time ruth ellis marilyn monroe jayne mansfield and diana dors each left a legacy that has ensured the fire will never be completely extinguished affecting not only individual lives but society across a world stage from marilyn s stardom and diana s unwavering integrity to ruth s tragic status as the last woman hanged in britain all of these women experienced success and tragedy love and heartbreak and attention both positive and negative bombshells examines these five exceptional women in the context of the 1950s the expectations and constrictions society had at the time and how they pushed through barriers and paved the way for the real sexual revolution an archaeology of disbelief traces the origin of secular philosophy to pre socratic greek philosophers who proposed a physical universe without supernatural intervention some mentioned the homeric gods but others did not atomists and sophists identified themselves as agnostics if not outright atheists and in reaction plato featured transcendent spiritual authority however aristotle offered a physical cosmology justified by evidence from a variety of scientific fields he also revisited many pre socratic assumptions by proposing that existence consists of mass in motion without temporal or spatial boundaries in many ways his analysis anticipated newton s concept of gravity darwin s concept of evolution and einstein s concept of relativity aristotle s follower strato invented scientific experimentation he also inspired the pursuit of science and advocated the rejection of all beliefs unconfirmed by science carneades in turn distorted aristotelian logic to ridicule the god concept and lucretius proposed a grand secular cosmology in his epic de rerum natura in the two dialogues academica and de natura deorum cicero provided a useful retrospective assessment of this entire movement the roman empire and advent of christianity effectively terminated greek philosophy except for platonism reinvented as stoicism widespread destruction of libraries eliminated most early secular texts and the inquisition played a major role in preventing secular inquiry aquinas later justified aristotle in light of christian doctrine and secularism s revival was postponed until the seventeenth century s paradoxical reaction against his interpretation of aristotle today it

nevertheless remains possible to trace western civilization s remarkable secular achievement to its initial breakthrough in ancient greece the purpose of this book is accordingly to trace the origin and development of its secular thought through close examination of texts that still exist today in light of aristotle s writings the literature on physiognomy the art of studying a person s outward appearance especially the face in order to determine character and intelligence has flourished in recent years in the wake of renewed scholarly interest in the history and politics of the body virtually no attention however has been devoted to the vocabulary and rhetoric of physiognomy the face of immortality addresses this gap arguing that the trend in western culture has been to obliterate the face which is manifested in criticism as a disregard for the letter denouncing this trend davide stimilli draws on hebrew greek latin italian english and german sources in order to explore the terminology and historical development of physiognomy stimilli takes physiognomy to be the resistance to such an obliteration of the face and argues that it offers a model for a theory of reading that does not discount the letter as inessential elaborating on the work of walter benjamin he defines the task of physiognomical criticism as transliteration which preserves the letter rather than translation which obliterates it the face of immortality is meant to exemplify the method and test the reach of such a criticism which aims at mediating between philology and philosophy between literal and allegorical modes of interpretation this strong and timely collection provides fresh insights into how shakespeare s plays and poems were understood to affect bodies minds and emotions contemporary criticism has had surprisingly little to say about the early modern period s investment in imagining literature s impact on feeling shakespearean sensations brings together scholarship from a range of well known and new voices to address this fundamental gap the book includes a comprehensive introduction by katharine a craik and tanya pollard and comprises three sections focusing on sensations aroused in the plays sensations evoked in the playhouse and sensations found in the imaginative space of the poems with dedicated essays on hamlet macbeth othello and twelfth night the collection explores how seriously early modern writers took their relationship with their audiences and reveals new connections between early modern literary texts and the emotional and physiological experiences of theatregoers

lying appears to be ubiquitous what franz kafka called a universal principle yet despite a number of recent books on the subject it has been given comparatively little genuinely systematic attention by philosophers social scientists or even literary theorists in the habit of lying john vignaux smyth examines three forms of falsification lying concealment and fiction and makes a strong critique of traditional approaches to each of them and above all to the relations among them with recourse to rene girard paul de man theodor adorno leo strauss and other theoreticians not usually considered together smyth arrives at some surprising conclusions about the connections between lying mimesis sacrifice sadomasochism and the sacred among other central subjects arguing that the relation between lying and truthtelling has been characterized in the west by sharply

sacrificial features he begins with a critique of the philosophies of lying espoused by kant and sissela bok then concludes that the problem of truth and lies leads to the further problem of the relation between law and arbitrariness as well as to the relation between rationality and unanimity constructively criticizing the work of such philosophers as bertrand russell ludwig wittgenstein richard rorty and nelson goodman smyth shows how these problems occur comparably in fiction theory and how paul de man s definition of fiction as arbitrariness finds confirmation in analytic philosophy through the novels of defoe stendhal and beckett with topics ranging from defoe s treatment of lies fiction and obscenity to beckett s treatment of the anus and the sacred smyth demonstrates how these texts generalize the issues of mendacity concealment and sacrificial arbitrariness in girard s sense to almost every aspect of experience fiction theory and cultural life the final section of the book taking its cue from shakespeare elaborates a sacrificial view of the history of fashion and dress concealment

an archaeology of disbelief traces the origin of secular philosophy to pre socratic greek philosophers who proposed a physical universe without supernatural intervention some mentioned the homeric gods but others did not atomists and sophists identified themselves as agnostics if not outright atheists and in reaction plato featured transcendent spiritual authority however aristotle offered a physical cosmology justified by evidence from a variety of scientific fields he also revisited many pre socratic assumptions by proposing that existence consists of mass in motion without temporal or spatial boundaries in many ways his analysis anticipated newton s concept of gravity darwin s concept of evolution and einstein s concept of relativity aristotle s follower strato invented scientific experimentation he also inspired the pursuit of science and

advocated the rejection of all beliefs unconfirmed by science carneades in turn distorted aristotelian logic to ridicule the god concept and lucretius proposed a grand secular cosmology in his epic de rerum natura in the two dialogues academica and de natura deorum cicero provided a useful retrospective assessment of this entire movement the roman empire and advent of christianity effectively terminated greek philosophy except for platonism reinvented as stoicism widespread destruction of libraries eliminated most early secular texts and the inquisition played a major role in preventing secular inquiry aquinas later justified aristotle in light of christian doctrine and secularism s revival was postponed until the seventeenth century s paradoxical reaction against his interpretation of aristotle today it nevertheless remains possible to trace western civilization s remarkable secular achievement to its initial breakthrough in ancient greece the purpose of this book is accordingly to trace the origin and development of its secular thought through close examination of texts that still exist today in light of aristotle s writings

the literature on physiognomy the art of studying a person s outward appearance especially the face in order to determine character and intelligence has flourished in recent years in the wake of renewed scholarly interest in the history and politics of the body virtually no attention however has been devoted to the vocabulary and rhetoric of physiognomy the face of immortality addresses this gap arguing that the trend in western culture has been to obliterate the face which is manifested in criticism as a disregard for the letter denouncing this trend davide stimilli draws on hebrew greek latin italian english and german sources in order to explore the terminology and historical development of physiognomy stimilli takes physiognomy to be the resistance to such an obliteration of the face and argues that it offers a model for a theory of reading that does not discount the letter as inessential elaborating on the work of walter benjamin he defines the task of physiognomical criticism as transliteration which preserves the letter rather than translation which obliterates it the face of immortality is meant to exemplify the method and test the reach of such a criticism which aims at mediating between philology and philosophy between literal and allegorical modes of interpretation
