This text integrates the core instructional leadership tasks of all principals: supervision, evaluation, and professional development. It is a practical, hands-on approach based on sound theory and research.

High School Algebra II Unlocked 2003-09-01

This work integrates the core instructional leadership tasks of all principals: supervision, evaluation, and professional development. The text demonstrates a hands-on approach grounded in sound theory and rigorous research. It provides both a conceptual frame and realistic exercises that today's principals and supervisors can use to improve their practice. The book highlights observation tools that focus on high-yield instructional strategies. Principals and supervisors are encouraged to collect data in classrooms and provide this instructional feedback so, together with teachers, they can reflect and identify areas for growth. The models of supervision, evaluation, and professional development are research-based and are consistent with contemporary challenges that confront principals and others committed to improving instruction.

this monograph introduces an exact model for a critical spin chain with arbitrary spin s which includes the haldane shastry model as the special case $s = 1/2$ while spinons in the haldane shastry model obey abelian half fermi statistics the spinons in the general model introduced here obey non abelian statistics this manifests itself through topological choices for the fractional momentum spacings the general model is derived by mapping exact models of quantized hall states onto spin chains the book begins with pedagogical review of all the relevant models including the non abelian statistics in the pfaffian hall state and is understandable to every student with a graduate course in quantum mechanics
