integrating the theory and practice of statistics through a series of case studies each lab introduces a problem provides some scientific background suggests investigations for the data and provides a summary of the theory used in each case aimed at upper division students

Promoting Statistical Practice and Collaboration in Developing Countries

2022-06-07

rarely but just often enough to rebuild hope something happens to confound my pessimism about the recent unprecedented happenings in the world this book is the most recent instance and i think that all its readers will join me in rejoicing at the good it seeks to do it is an example of the kind of international comity and collaboration that we could and should undertake to solve various societal problems this book is a beautiful example of the power of the possible it provides a blueprint for how the lisa 2020 model can be replicated in other fields civil engineers or accountants or nurses or any other profession could follow this outline to share expertise and build capacity and promote progress in other countries it also contains some tutorials for statistical literacy across several fields the details would change of course but ideas are durable and the generalizations seem pretty straightforward this book shows every other profession where and how to stand in order to move the world i urge every researcher to get a copy david banks from the foreword promoting statistical practice and collaboration in developing countries provides new insights into

the current issues and opportunities in international statistics education statistical consulting and collaboration particularly in developing countries around the world the book addresses the topics discussed in individual chapters from the perspectives of the historical context the present state and future directions of statistical training and practice so that readers may fully understand the challenges and opportunities in the field of statistics and data science especially in developing countries features reference point on statistical practice in developing countries for researchers scholars students and practitioners comprehensive source of state of the art knowledge on creating statistical collaboration laboratories within the field of data science and statistics collection of innovative statistical teaching and learning techniques in developing countries each chapter consists of independent case study contributions on a particular theme that are developed with a common structure and format the common goal across the chapters is to enhance the exchange of diverse educational and action oriented information among our intended audiences which include practitioners researchers students and statistics educators in developing countries

equivalence elizabeth I scott at berkeley is the compelling story of one pioneering statistician s relentless twenty year effort to promote the status of women in academe and science part biography and part microhistory the book provides the context and background to understand scott s masterfulness at using statistics to help solve societal problems in addition to being one of the first researchers to work at the interface of astronomy and statistics and an early practitioner of statistics using high speed computers scott worked on an impressively broad range of questions in

science from whether cloud seeding actually works to whether ozone depletion causes skin cancer later in her career scott became swept up in the academic women s movement she used her well developed scientific research skills together with the advocacy skills she had honed in such activities as raising funds for martin luther king jr and keeping free speech movement students out of jail toward policy making that would improve the condition of the academic workforce for women the book invites the reader into scott s universe a window of inspiration made possible by the fact that she saved and dated every piece of paper that came across her desk
