car manufacturers release new production models that are unique and  
innovative these cars begin as concepts then go through the process of  
prototyping the process of creating a new model can take years  
involving extensive testing and refining of aerodynamics safety engine  
components and vehicle styling the production model is the result of  
this lengthy process and its new technologies reflect the latest  
engineering standards as well as market trends the 2014 passenger car  
yearbook details the key engineering developments in the passenger  
vehicle industry of the year each new car model is profiled in its own  
chapter with one or more articles that were previously published and  
written by the award winning editors of automotive journal of computers  
and mathematics with applications

explored in depth interviews with key developers and engineers are included for some of the models providing inside details about how initial ideas evolved in the cars that consumers drive published for enthusiasts who are interested in new car models and their technologies as well as practicing automotive engineers who are interested in new engineering trends such as hybrid systems powertrain designs automotive design lightweighting and materials and new engineers who want an overview of current trends the 2014 passenger car yearbook also provides a single source for information on the key engineering trends of one year allows the reader to skip to chapters that cover specific car models that interest them or read about all models from beginning to end makes for dynamic reading with its large number of big full color images and easy reading magazine format every year global automakers introduce new or significantly re engineered passenger vehicles with increasingly advanced technology intended to exceed consumer expectations and satisfy increasingly stringent government regulations some of these technologies are firsts of their kind and start trends that other automakers soon follow with the innovations becoming adopted across the board the supply community is also increasingly playing a more significant role in helping the original equipment manufacturers research develop and introduce the latest engineering innovations that help bring competitive advantage for their automaker partners each year the editors of sae's automotive engineering magazine publish many articles focused on the technology and mathematics with applications

and engineering innovations of new passenger and concept vehicles and these articles have been collected into this volume this 2015 passenger car and 2014 concept car yearbook is the fourth in an ongoing series of books that provide yearly snapshots of the latest and greatest technologies introduced by the automotive industry in this book we explore from an oem and supplier perspective the newest and most technically interesting production vehicles released for the 2015 model year in addition we also have included a technology focused recap of the concept cars revealed during 2014 readers will have in one publication a complete overview of the key advances that took place over the course of the year from around the world each new model is profiled in its own chapter with one or more articles by the award winning editors and contributors of automotive engineering in this exclusive compilation of print and online content the novel engineering aspects of each new vehicle are explored with exclusive interviews of key engineers and product developers providing insights you can only get from you can only get from automotive engineering this book is published for the most technically minded enthusiasts who are interested in new car technologies as well as practicing automotive engineers who are interested in new engineering trends engineering trends explored focus on what engineers are doing to meet the sometimes conflicting consumer and governmental demands for improved vehicle fuel efficiency performance safety and comfort in short this book provides a single source for information on the key
