during the last 30 years advanced architecture has consolidated an interactive and informational logic that differs from that of modernity and postmodernity this logic is threefold it is modulated through three coexisting protocols modes of action whose peaks of intensity occur in three different decades conformative protocols 1990 2000 distributive protocols 2000 2010 and expansive protocols 2010 2020 this work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity it positions three different ethos by critically approaching the architectural side of a cultural mutation that has been affecting the western experimental areas of knowledge and practice since the end of the last century a transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella in this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements it argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades conformative protocols 1990 2000 distributive protocols 2000 2010 and expansive protocols 2010 2020 these three periods shouldn t be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three

overlapping and coexisting systems whose peaks of intensity occur in three different decades however the main purpose of this book is not limited to unveiling the ethos of these three conjugations it also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture in this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse a tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates

Ford Mustang Red Book 1964 1/2-2015

1978

eighteen million vespas have buzzed their way into the world since 1946 stood end to end they would form a line measuring 32 000 kilometres 20 000 miles in length this is an almost inconceivable statistic as with many things that transcend conventional measures and at some point achieve cult status how did the little machine come so far the answer is simple the vespa has always remained the vespa true to itself and has what others lack real character this book tells the vespa s story via over 470 photos corrects many misconceptions and lets the reader become immersed in the culture of vespa and la bella vita

The 1863 U.S. Infantry Tactics

1999

popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better
