after the unprecedented destruction of the great war the world longed for a lasting peace the victors however valued vengeance even more than stability and demanded a massive indemnity from germany in order to keep it from rearming the results as eminent historian norman stone describes in this authoritative history were disastrous in world war two stone provides a remarkably concise account of the deadliest war of human history showing how the conflict roared to life from the ashes of world war one adolf hitler rode a tide of popular desperation and resentment to power in germany promptly making good on his promise to return the nation to its former economic and military strength he bullied europe into giving him his way and in so doing backed the victors of the great war into a corner following the invasion of poland in 1939 britain and france declared war on germany a decision that stone argues was utterly irrational yet hitler had driven the world mad and the rekindling of european hostilities soon grew to a conflagration that spread across the globe fanned by political and racial ideologies more poisonous and weaponry more destructive than the world had ever seen with commanding expertise stone leads readers through the escalation climax and mournful denouement of this sprawling conflict world war two is an invaluable contribution to our understanding of the twentieth century and its defining struggle

john norris shows how logistics though less glamorous than details of the fighting itself played a decisive role in the outcome of every campaign and battle of world war two the author marshals some astounding facts and figures to convey the sheer scale of the task all belligerents faced to equip vast forces and supply them in the field he also draws on first hand accounts to illustrate what this meant for the men and women in the logistics chain and those depending on it at the sharp end many of the vehicles from supply trucks to pack mules and other relevant hardware are discussed and illustrated with numerous

photographs this first volume of two looks at the early years of the war so we see for example how hitlers panzer divisions were kept rolling in the blitzkrieg a german division in 1940 still had around 5000 horses requiring hundreds of tonnes of fodder and the british armys disastrous loss of equipment at dunkirk this is a fascinating and valuable study of a neglected aspect of world war two

in 1941 the european war became a world war this book tackles that process in its economic political and ideological dimensions margaret lamb and nicholas tarling explore the significance of the asian factor and the importance of east asia in the making of the war in europe and the transformation of the european war of 1939 into the world war of 1941 this asian factor has often been neglected but the policies of all the major powers were affected by their world wide interests france had its possessions in north africa and asia nazi germany chose to become involved in china and to make an agreement with japan britain s action in europe and the mediterranean were conditioned by its commitments elsewhere in the world and the united states and the soviet union were both involved in europe and asia in particular the threat that japan presented to the status quo in east asia made it difficult for the war in europe in turn affected the position in east asia the us built a two ocean navy and encouraged the british to continue their struggle by keeping the resources of south east asia available and these steps led to a clash with the japanese lamb and tarling s global approach throws valuable new light on the origins of the second world war

this revisionist history convincingly argues that the regia marina italiana the royal italian navy has been neglected and maligned in assessments of its contributions to the axis effort in world war ii after all italy was the major axis player in the mediterranean and it was the italian navy and air force with only sporadic help from their german ally that stymied the british navy and air force for most of the thirty nine months that italy was a belligerent it was the royal italian navy that provided the many convoys that kept the axis war effort in africa alive by repeatedly braving attack by aircraft submarine and surface vessels if doomed by its own technical weaknesses and ultra the top secret british decoding device the italian navy still fought a tenacious and gallant war and if it did not win that war it avoided defeat for thirty nine long frustrating months
