WHO Expert Committee on Specifications for Pharmaceutical Preparations *2021-04-26*

the expert committee on specifications for pharmaceutical preparations works towards clear independent and practical standards and guidelines for the quality assurance of medicines and provision of global regulatory tools standards are developed by the expert committee through worldwide consultation and an international consensus building process the following new guidance texts were adopted and recommended for use guidelines and guidance texts adopted by the expert committee on specifications for pharmaceutical preparations points to consider when including health based exposure limits hbels in cleaning validation good manufacturing practices water for pharmaceutical use guideline on data integrity who united nations population fund recommendations for condom storage and shipping temperatures who united nations population fund guidance on testing of male latex condoms who united nations population fund guidance on conducting post market surveillance of condoms who biowaiver list proposal to waive in vivo bioequivalence requirements for who model list of essential medicines immediate release solid oral dosage forms who certification scheme on the quality of pharmaceutical products moving in international commerce good reliance practices in the regulation of medical products high level principles and considerations and good regulatory practices in the regulations of medical products all of the above are included in this report and recommended for implementation

Official Gazette *2004*

this book brings together scholars based in or had previously been based in a range of east and southeast asian countries building on their respective primary empirical data and first hand experience as academics and think tank researchers in order to pluralise the current debates about governance in transitional societies in an era of global democratic backsliding this edited volume offers less explored local perspectives to balance the western centrism observed in area studies and the focus on former soviet countries in transit what is the future of governance in asia this book by attempting to supply a diversity of answers will interest political scientists economists and journalists

Governance in Transitional Societies in East and Southeast Asia 2023-11-01

techniques for downstream process for biologic drugs and vaccines provides comprehensive technologies involved in processing postharvest broth to separate the target biological therapeutic products of extracellular or intercellular aspects in nature to its highest purification form and to thus make it acceptable to end users the technologies involved in the post harvesting of fermented broth are explained in this comprehensive resource in a simplified manner with different case studies to help non engineering students and scientists easily capture the basic principle of biomass processing

technologies and their applications in new projects related to the development and manufacturing of therapeutic bio products as conceptual development of biotechnology has taken new shape and style with the integration of medical sciences physical science and engineering and has thus begun the need for the development of microbial or cell line process technology and application for large scale isolation and purification of metabolites or vaccines through the fermentation process this book covers the most important aspects provides insights into the conceptual strategic drive for manufacturing innovative biologically derived therapeutic compounds for commercial purposes focuses on how to execute biopharmaceutical portfolio trends to bring sustainable manufacturing process as per guidelines of international regulatory acts highlights emerging trends in medical sciences on tissue engineering regenerative medicine personalized medicines and various innovative techniques on immunotherapy to fight against life threatening diseases

Techniques for Downstream process for Biologic Drugs and Vaccines *2023-08-01*

this report presents the recommendations of a who expert committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biological substances and the establishment of international biological reference materials following a brief introduction the report summarizes a number of general issues brought to the attention of the committee the next

part of the report of particular relevance to manufacturers and national regulatory authorities outlines the discussions held on the development and adoption of new and revised who recommendations guidelines and guidance documents following these discussions a who guidance document on the scientific principles for regulatory risk evaluation on finding an adventitious agent in a marketed vaccine was adopted along with who guidelines on procedures and data requirements for changes to approved vaccines and revised who recommendations to assure the quality safety and efficacy of poliomyelitis vaccines inactivated subsequent sections of the report provide information on the current status and proposed development of international reference materials in the areas of antibiotics biotherapeutics other than blood products blood products and related substances in vitro diagnostic device reagents and vaccines and related substances a series of annexes are then presented which include an updated list of all who recommendations guidelines and other documents on biological substances used in medicine annex 1 the above three who documents adopted on the advice of the committee are then published as part of this report annexes 2 4 finally all additions and discontinuations made during the 2014 meeting to the list of international standards reference reagents and reference panels for biological substances maintained by who are summarized in annex 5 the updated full catalogue of who international reference preparations is available at who int bloodproducts catalogue en

WHO Expert Committee on Biological Standardization 2015-06-30

this report presents the recommendations of a who expert committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biological substances and the establishment of international biological reference materials following a brief introduction the report summarizes a number of general issues brought to the attention of the committee the next part of the report of particular relevance to manufacturers and national regulatory authorities outlines the discussions held on the development and adoption of new and revised who recommendations guidelines and guidance documents following these discussions who guidelines on the quality safety and efficacy of ebola vaccines and who guidelines on procedures and data requirements for changes to approved biotherapeutic products were adopted on the recommendation of the committee in addition the following two who guidance documents on the who prequalification of in vitro diagnostic medical devices were also adopted a technical specifications series tss for who prequalification diagnostic assessment human immunodeficiency virus hiv rapid diagnostic tests for professional use and or self testing and b technical guidance series tgs for who prequalification diagnostic assessment establishing stability of in vitro diagnostic medical devices subsequent sections of the report provide information on the current status proposed development and establishment of international reference materials in the areas

of antibiotics biotherapeutics other than blood products blood products and related substances in vitro diagnostics and vaccines and related substances a series of annexes are then presented which include an updated list of all who recommendations guidelines and other documents on biological substances used in medicine annex 1 the above four who documents adopted on the advice of the committee are then published as part of this report annexes 2 5 finally all additions and discontinuations made during the 2017 meeting to the list of international standards reference reagents and reference panels for biological substances maintained by who are summarized in annex 6 the updated full catalogue of who international reference preparations is available at who int bloodproducts catalogue en

Euroscepticism and European Integration *2009*

uniform customs administration is of great importance for the eu and the competitiveness of eu businesses in global trade however the eu s so called executive federalism raises the potential for the non uniform application of eu customs law this problem has already arisen in the european communities selected customs matters wto dispute settlement therefore the central research question of this book concerns the challenge presented to executive federalism in the eu customs union by the wto it also examines those safeguard measures for uniform customs administration which are in operation valuable empirical analysis of the decision making procedures and practices of the national customs authorities allows for the fullest understanding of the operation of the customs administration an important feature of the exploration is its analysis of the reform of eu customs law and of the effectiveness of

the european union s strategies to enhance uniform customs administration that analysis helps to identify potential weak points in the decentralised administration of eu customs law and suggests ways in which it might be improved scholarly rigorous and timely this important study will be required reading for all scholars of eu customs law

the artificial intelligence ai landscape has evolved significantly from 1950 when alan turing first posed the question of whether machines can think today ai is transforming societies and economies it promises to generate productivity gains improve well being and help address global challenges such as climate change resource scarcity and health crises

WHO Expert Committee on Biological Standardization *2020-05-15*

tailoring of biomolecules using protein engineering technology and host cells culture techniques are among the most sophisticated and elegant achievements of modern applied life sciences in which the basic fundamentals biotechnology are applicable for the development and manufacturing of biologics and other related bio molecules for a hurdle free life with good health a majority of biologics derived from genetically modified host cells in the current market are bio formulation such as antibodies nucleic acid products and vaccines such bio formulations are developed mainly in two steps i e upstream process and

downstream process the first volume of this series begins with the latest information on how the classical stepwise host cells culture mammals animals plants and bacteria methodology has been changed to fully continuous or partially continuous host cells culture process in order to economise the biopharmaceutical products manufacturing process in addition this volume narrates a brief history on conceptual development of new thoughts in designing biotechnology industries for commercial production of variety of therapeutic proteins with structural modification on the basis of clinical requirements the readers will feel exited by going through the latest discovery and development in applied life sciences for designing innovative biomolecules for health care with utmost safe the most interesting part of this volume is newly developed concept on bioprinting it explains how to design and fabricate animate objects by fusing or depositing material of interest in the form of powders solid dusts metal liquid or even living cells or tissues by layers to produce 3d objectives the first volume ends with the latest information on the current trend in biologics market market dynamic drives and opportunities with challenges

Artificial Intelligence in Society *2019-06-11*

this publication describes the united kingdom of great britain and northern ireland s multisectoral voluntary approach to antibiotic stewardship in food producing animals developed as a collaboration between industry and government it is a tribute to all those involved for their tremendous efforts commitment and continuous work to improve responsible use of antibiotics and achieve significant reductions in their use across livestock

sectors keys to success include the development of strong relationships between producers veterinarians and government industry led target setting and cross sectoral learning and sharing of experiences this has built a collective sense of ownership and responsibility resulting in effective behaviour change for improved stewardship

the united nations disarmament yearbook volume 42 part ii 2017 with a foreword by the high representative for disarmament affairs summarizes developments and trends in 2017 on key issues of multilateral consideration at the international and regional levels reviews the activity of the general assembly the conference on disarmament and the disarmament commission and contains a handy timeline of highlights of multilateral disarmament in 2017

Tackling antimicrobial use and resistance in food-producing animals *2022-09-29*

this book highlights the challenges facing quality assurance quality control qa qc in today s biopharmaceutical environment and presents the strategic importance and value generated by qa qc for their involvement in control of manufacturing it will put into perspective the need for a graded approach to qa qc from early clinical trials through market approval since

the first edition published in 2004 there have been more than 50 new regulatory guidances released by the food and drug administration fda european medicines agency ema and ich that affect the cmc regulatory compliance of biopharmaceuticals also the application of biosimilars has been developed in europe and is under development in the usa the revised update will be broadened to include not only biopharmaceuticals biotech drugs but also other biologics vaccines cell therapy plasma derived proteins etc

Corporate Structure and Banking Resolution 2006

preformulation studies are the physical chemical and biological studies needed to characterize a drug substance for enabling the proper design of a drug product whereas the effectiveness of a drug product is determined during the formulation studies phase though the two disciplines overlap in practice each is a significantly distinct phase of new drug development entirely focused on preformulation principles this fully revised and updated handbook of preformulation chemical biological and botanical drugs second edition provides detailed descriptions of preformulation methodologies gives a state of the art description of each technique and lists the currently available tools useful in providing a comprehensive characterization of a new drug entity features addresses the preformulation studies of three different types of new active entities chemical biological and botanical which is the latest established class of active ingredient classified by the fda illustrates the activities comprised in preformulation studies and establishes a method of tasking for drug development projects includes extensive flow charts for characterization decision making

gives extensive theoretical treatment of principles important for testing dissolution solubility stability and solid state characterization includes over 50 new material

the objectives of the 2022 consolidated guidelines are to provide policy makers and implementing partners with evidence based recommendations on the cascade of care for children and adolescents to support the implementation of activities to prevent tb among children and adolescents at risk to improve tb case detection and treatment outcomes in children and adolescents with tb using effective models of care and to contribute to

reductions in tb related morbidity and mortality in children and adolescents in line with global targets including those in the un sustainable development goals the who end tb strategy and the political declaration of the united nations general assembly high level meeting on the fight against tuberculosis the target audience for these consolidated guidelines consists primarily of national tb programmes ntps primary health care phc programmes maternal and child health programmes national aids programmes or their equivalents in health ministries and other health policy makers they also target generalist and specialist paediatricians clinicians and health practitioners working on tb hiv and or infectious diseases in public and private sectors the educational sector nongovernmental civil society and community based organizations as well as technical and implementing partners

Pharmaceutical and Medical Devices Manufacturing Computer Systems Validation 2023-02-13

sets forth the state of the science and technology in plasma protein production with contributions from an international team of eighty leading experts and pioneers in the field production of plasma proteins for therapeutic use presents a comprehensive overview of the current state of knowledge about the function use and production of blood plasma proteins in addition to details of the operational requirements for the production of plasma derivatives the book describes the biology development research manufacture and clinical

indications of essentially all plasma proteins with established clinical use or therapeutic potential production of plasma proteins for therapeutic use covers the key aspects of the plasma fractionation industry in five sections section 1 introduction to plasma fractionation initially describes the history of transfusion and then covers the emergence of plasma collection and fractionation from its earliest days to the present time with the commercial and not for profit sectors developing into a multi billion dollar industry section 2 plasma proteins for therapeutic use contains 24 chapters dedicated to specific plasma proteins including coagulation factors albumin immunoglobulin and a comprehensive range of other plasma derived proteins with therapeutic indications each chapter discusses the physiology biochemistry mechanism of action and manufacture of each plasma protein including viral safety issues and clinical uses section 3 pathogen safety of plasma products examines issues and procedures for enhancing viral safety and reducing the risk of transmissible spongiform encephalopathy transmission section 4 the pharmaceutical environment applied to plasma fractionation details the requirements and activities associated with plasma collection quality assurance compliance with regulatory requirements provision of medical affairs support and the manufacture of plasma products section 5 the market for plasma products and the economics of fractionation reviews the commercial environment and economics of the plasma fractionation industry including future trends highlighting regions such as asia which have the potential to exert a major influence on the plasma fractionation industry in the twenty first century

Development Co-operation Report 2023 Debating the Aid System *2021-10-15*

this evaluation assesses the extent to which fao adopted an effective coherent and transformative approach to its work on climate action from 2015 to 2020 by contributing to the achievement of sdg 13 targets and the paris agreement the methodology included portfolio analysis quantitative content analysis of over 500 documents participatory stakeholder workshops desk reviews interviews with 488 stakeholders analysis of key fao products 3 global surveys and 13 country case studies the evaluation s findings are i fao s strategic framework is aligned with sdg 13 and the paris agreement however fao has not expressed a long term vision on its leadership role in agriculture for climate action nor does fao governance yet reflect a clear and strategic focus on its mission on climate action ii the 2017 climate change strategy has effectively supported fao s work but it is not fully integrated into corporate decision making iii fao has made relevant contributions by supporting national capacity building for climate action iv fao s contributions to sdg 13 and the uptake of products and tools are not systematically monitored and reported v there is little alignment of portfolios between divisions and no systematic approach to trade offs consequently the root causes of climate change on agriculture are not being addressed in an integrated way vi fao has strong capacity but the current business model results in uneven distribution of human and financial resources and in fragmented short term projects reach vii fao contributed to climate adaptation and mitigation by collaborating with

members and other partners although it has engaged less in innovative partnerships with the private sector financing institutions and civil society viii fao has progressed on the inclusion of gender specific climate action initiatives the recommendations of the evaluation include developing a corporate narrative on climate change and food systems formulating a new climate change strategy and action plan improving the climate change labelling of its project portfolio mainstreaming climate action into all offices divisions and levels and including coordination and guidance to embed procedures in the project cycle quality assurance and learning mechanisms adopting a climate action focused programmatic approach running an assessment to identify capacity gaps needs and opportunities and accordingly strengthening the capacity of staffing funding and inter office communication enhancing its partnerships and seeking out innovative partnerships and mainstreaming the core leave no one behind by including women youth the extreme poor indigenous peoples and other vulnerable groups

aviation law and policy series 19 the incursion of unmanned aircraft systems uas is radically reshaping the future of international civil aviation as the civil uses of uas increase and the technology matures in parallel questions around the associated legal implications remain unanswered even in such fundamental legal regimes of international civil aviation as airspace aircraft international air navigation international air transport and safety this book the first to consider international law and regulations to cross border civil flights of uas explores current legal and regulatory frameworks from the perspective of how they may facilitate the operations of uas the author a well known air law practitioner and diplomat identifies the legal challenges and proposes sound well informed measures to tackle those challenges the book explores comprehensively the means of incorporating uas within the arena of air law while stimulating further research and debate on the topic analysis of the cross border operations of uas focuses on aspects relevant to their immediate future and

address such questions as the following what processes are currently in place what factors require attention what aspects particularly influence the future of uas is the current international legal framework adequate to ensure the operation and development of uas while preserving high levels of safety how will artificial intelligence impact the civil operations of uas the author s analyses draw on relevant initiatives in existing and proposed standards and recommended practices for the operation of uas on cross border flights as well as states regulation of uas within their national airspace also described are the main bilateral and multilateral air services and transport agreements with respect to their application to the operation of uas given the escalating need to adopt a comprehensive international regulatory framework for the operation of uas aimed at facilitating its safe and efficient integration even as the technology advances and continues to outpace law while the potential for incidents involving uas grows this book is well timed to meet the challenge for states and international civil aviation organization and airspace planners its innovative approaches to the management of the air traffic safety and security of uas are sure to influence the development of regulations for civil uas the book will be welcomed by aviation regulators interested international and regional organisations research organisations aviation lawyers and academics in international law and air law
