As the magazine of the Texas A&M University System, *The Alcalde* has united alumni and friends of the University of Texas at Austin for nearly 100 years. The *Alcalde* serves as an intellectual crossroads where our luminaries, artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them meet bimonthly to exchange ideas. Its pages also offer a place for Texas A&M to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for mayor or chief magistrate, the nickname of the governor who signed it into existence. Was the old *Alcalde*.

jackson carter just wants a normal life sure at thirteen he s just retired from an illustrious career as a classical musician and entered harvard as a freshman mathematics major and yeah he s responsible for raising his two younger brothers while mom is off in brazil or thailand spending every last dime they

have but he'd still just like a couple of friends to hang out with and maybe even a girlfriend but a normal life just isn't Jackson's destiny he has become obsessed with patterns the mathematical properties found in the formation of clouds the outline of a mustard stain on a picnic table the intricate working of light and dark found in a curtain at the Sydney Opera House when his mathematics instructor shows him a fractal image Jackson becomes so engrossed that he cannot look away then someone hammers a pre-Roman curse to his front door summoning an angry demon and his littlest brother starts receiving messages from Eddie Cochran the dead rockabilly singer and of course there are the corporate paramilitary units stalking the parking lots of Harvard his other brother's hysterical blindness and a demented ex-weatherman from Little Rock Arkansas who thinks Jackson is an evil genius who needs a good ass kicking and oh yeah everyone seems to think Jackson may be the anti-Christ so much for a normal life an angel of obedience is the sometimes funny sometimes scary always exciting tale of Jackson Carter boy genius overburdened older brother and potential destroyer of the known universe it's a story that just goes to prove that when time and space are on the brink of extinction that's when you need your friends and family the most

within the field of clinical psychology the term borderline personality disorder was developed to fulfill a diagnostic need and has come to possess specific stereotypes and negative meanings because the term borderline is an emotionally charged word it can lead to a less than accurate view of the situation or patient being described thus presenting a challenge to even the most experienced therapists and becoming one of the most complex disorders to treat through the use of one case study however experts in borderline personality disorders have put this difficulty at ease through applying a variety of modalities to identify

treatment goals including selecting assessment tools conceptualizing progression pinpointing pitfalls and developing techniques diagnosing and treating bpd has created a more successful therapeutic result

the journey to becoming an exemplary engineering educator is one that is rarely simple and straightforward simply being exposed to active learning strategies or innovative pedagogies rarely leads to a transformation of one s own teaching in this book we present a collection of stories from exemplary engineering educators that are told in their own voices these stories are shared to enable readers to immerse themselves in first person recollections of transformation involving engineering educators who

changed their teaching strategies from the ways that they were taught as engineering undergraduate students to ways that more effectively fostered a conducive learning atmosphere for all students it is our hope that providing stories of successful engineering educators might stimulate thoughtful and productive self reflection on ways that we can each change our own teaching these stories are not simple linear stories of transformation instead they highlight the complexities and nuances inherent to transforming the way that engineering faculty teach through our strategy of narrative storytelling we hope to inspire future and current engineering educators to embark on their own journeys of teaching transformations we conclude the book with some lessons that we learned during our readings of these stories and invite readers to extract lessons of their own

this book brings in the focus on the borders between different contexts that need to be crossed in the process of education despite the considerable efforts of various groups of researchers all over the world it does not seem that traditional educational psychology has succeeded in illuminating the complex issues involved in the schoolfamily relationship from a methodological perspective there is no satisfactory explanation of the connection between representations and actual practice in educational contexts crossing boundaries is an invitation to cultural psychology of educational processes to overcome the limits of existing educational psychology eemphasizing social locomotion and the dynamic processes the book try to capture the ambiguous richness of the transit from one context to another of the symbolic perspective that accompanies the dialogue between family and school of practices regulating the interstitial space between these different social systems how family and school fill occupy circulate avoid or strategically use this space in between what discourses and practices saturate this border zone and or cross from one side to the other crossing boundaries gathers contributions with the clear aim of documenting and analysing what happens at points of contact between family culture and scholastic educational culture from the perspective of everyday life this book is in itself an attempt to cross the border between the theorizing on the borders and how the outside world and the others are perceived from a certain point of view and the practices that characterize the school home interaction
