what is the benchmark of 19 20 and 27 28 using 1 wyzant Feb 16 2023

a benchmark is a number used to give a close approximation to the answer of a question like what is 19 divided by 20 or what is 27 divided by 28 we know that 20 divided by 20 is equal to 1 likewise 28 divided by 28 is also 1 so it is very easy to say that 19 20 is slightly less than 1

solved if the estimate is 29 and the benchmark is 28 chegg Jan 18 2023

statistics and probability questions and answers if the estimate is 29 and the benchmark is 28 because of the probability that the estimate suffers from some random sampling error it would be logical to ask or is the difference probably due to random sampling error is the estimate probably greater than the benchmark is the estimate

different types of benchmarking examples indeed com Dec 17 2022

some of the most popular benchmarking methods include peer benchmarking companies look at their closest competitors and establish whether their products or services are in line with what else is being offered in the marketplace best practice benchmarking
