Education during the Time of the Revolution in Egypt

2015-02-27

since the 25th january 2011 revolution egyptians
experienced and engaged in a daily debate
controversially some argued that the conflict and
revolts in egypt and the arab region were neither
coincidental nor the result of a domino effect of
collective actions by oppressed people against
autocratic regimes rather these revolts were the
result of mobilization efforts made over decades by
several activist groups as well as national and
international non governmental organizations
contrary to this view others claim that despite the
rapid economic growth of egypt in the 2000s there
was a wide gap in the distribution of wealth and
economic return which left the majority of egyptians
2023-09-12 18:36 from poverty and high rate of unemployment

dominated the daily debate education remains the
forgotten arena amidst conflict with the exacerbation
of conflict between militant extremists and modern
states in the region and most recently in many
european countries it became more important than
ever before to understand the dialectics of education
in conflict in different local contexts starting in this
book by the egyptian context the book focuses on
education in egypt during the time of the revolution as
perceived by university students youth activists
educational professionals government officials and
civil society organizations its chapters reveal the
tension contradiction and or coherence among
different players as related to their respective role in
education for civic engagement national identity
global citizenship peace building teacher professional
development and women s and students
empowerment the book illustrates the dialectics of
education in conflict by articulating diverse meanings
and perspectives given by egyptian stakeholders when
describing their actions and reality ies during the time

in this book reinhold kramer explores a variety of
important social changes including the resistance to
objective measures of truth the rise of how i feel
ethics the ascendancy of individualism the immersion
in cyber simulations the push toward globalization
and multilateralism and the decline of political and
religious faiths he argues that the displacement since
the 1990s of grand narratives by ego based narratives
and small narratives has proven inadequate and that
selective adherence pluralist adaptation and
humanism are more worthy replacements relying on
evolutionary psychology as much as on charles taylor
kramer argues that no single answer is possible to the
book title s question but that the term postmodernity
referring to the era not to postmodernism still usefully
describes major currents within the contemporary
world

for the world of education the first wave of reform
