twenty three centuries after its compilation the politics still has much to contribute to this central question of political science aristotle s thorough and carefully argued analysis is based on a study of over 150 city constitutions covering a huge range of political issues in order to establish which types of constitution are best both ideally and in particular circumstances and how they may be maintained aristotle s opinions form an essential background to the thinking of philosophers such as thomas aquinas machiavelli and jean bodin and both his premises and arguments raise questions that are as relevant to modern society as they were to the ancient world this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1908 edition excerpt of the state for example the chytrians at clazomenae did not agree with the people of the island and the people of colophon quarrelled with the notians at athens too the inhabitants of the piraeus are more democratic than those who live in the city for just as in war the impediment of 16 a ditch though ever so small may break a regiment so every cause of difference however slight makes a breach in a city the greatest opposition is confessedly that of virtue and vice next comes that of wealth and poverty and there are other antagonistic elements greater or less of which one is this difference of place in revolutions the occasions may be trifling but great 4 interests are at stake trifles are most important when they concern the rulers as was the case of old at syracuse for the syracusan constitution was once changed by a love quarrel of two young men who were in the government the story is that while one of them was away from home a his beloved was gained over by his companion and he to revenge himself seduced the other s wife they then drew all the members of the ruling class into their quarrel and made a revolution we learn from this story that we should 3 be on our guard against the beginnings of such evils and should put an end to the quarrels of chiefs and mighty men the mistake lies in the beginning as the proverb says well begun is half done so an error at the beginning o a 19j occasions of revolutions v 4 though quite small has the proportion of a half to the whole 4 matter in general when the notables quarrel the whole city is involved as happened in hestiaea after the persian war the occasion was the division of an inheritance one of two brothers refused to give an account of their aristotle s politics is the best work ever written on the concepts that help shape countries of the world and their governments although he strongly supports the out dated institution of slavery his views on constitution and running of government are classical though he discusses greek city states and institutions of that era his work forms the basis of modern day political science excerpt from aristotle politics with an english translation ethics but also how it is to be secured that of poli tics and it is also practical in the narrower sense because happiness is found in ethics not to be a product of action but itself to consist in action of a certain sort about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to

have it in their power to live entirely as they wish it is necessary to examine into the polity of those states which are allowed to be well governed and if there should be any others which

some persons have described and which appear properly regulated to note what is right and useful in them and when we point out wherein they have failed let not this be imputed to an

affectation of wisdom for it is because there are great defects in all those which are already established that i have been induced to undertake this work we will begin with that part of the

subject which naturally presents itself first to our consideration the members of every state must of necessity have all things in common or some things common and not others or nothing

at all common to have nothing in common is evidently impossible for society itself is one species of community and the first thing necessary thereunto is a common place of habitation

namely the city which must be one and this every citizen must have a share in but in a government which is to be well founded will it be best to admit of a community in everything which

is capable thereof or only in some particulars but in others not for it is possible that the citizens may have their wives and children and goods in common as in plato's commonwealth for

in that socrates affirms that all these particulars ought to be so which then shall we prefer the custom which is already established or the laws which are proposed in that treatise chapter

ii now as a community of wives is attended with many other difficulties so neither does the cause for which he would frame his

Aristotle, the Politics 1932 aristotle s life was primarily that of a scholar however like the other ancient philosophers it was not the stereotypical ivory tower existence his father was court physician to amyntas iii of macedon so aristotle grew up in a royal household aristotle also knew philip of macedon son of amyntas iii and there is a tradition that says aristotle tutored philip s son alexander who would later be called the great after expanding the macedonian empire all the way to what is now india clearly aristotle had significant firsthand experience with politics though scholars disagree about how much influence if any this experience had on aristotle s thought there is certainly no evidence that alexander s subsequent career was much influenced by aristotle s teaching which is uniformly critical of war and conquest as goals for human beings and which praises the intellectual contemplative lifestyle it is noteworthy that although aristotle praises the politically active life he spent most of his own life in athens where he was not a citizen and would not have been allowed to participate directly in politics

aristotle studied under plato at plato s academy in athens and eventually opened a school of his own the lyceum there as a scholar aristotle had a wide range of interests he wrote about meteorology biology physics poetry logic rhetoric and politics and ethics among other subjects his writings on many of these interests remained definitive for almost two millennia they remained and remain so valuable in part because of the comprehensiveness of his efforts for example in order to understand political phenomena he had his students collect information on the political organization and history of 158 different cities the politics makes frequent reference to political events and institutions from many of these cities drawing on his students research aristotle s theories about the best ethical and political life are drawn from substantial amounts of empirical research the internet encyclopedia of philosophy
