rheumatic heart disease presents a major public health challenge particularly for children and major determinants are poverty malnutrition overcrowding poor housing and a shortage of health care resources although cost effective prevention and control strategies are available they remain underused in most developing countries this publication contains the report of a who expert consultation held in geneva in october 2001 which reviewed the current scientific knowledge of rheumatic fever and rheumatic heart disease as well as the medical and public health related practices it suggests practical recommendations for an evidence based approach to the prevention and management of the disease and for cost effective programmes for their control today rheumatic fever is still the most common cause of heart disease in children and young adults in developing countries this disease is typically associated with poverty in particular with poor housing overcrowding and inadequate medical care rheumatic fever has almost disappeared from economically developed countries this trend has paralleled improvements in standards of living however the recent resurgence of rheumatic fever in middle class families in the u s a has re emphasized the importance of this disease in the developed countries as well prevention and control of rheumatic fever and rheumatic heart disease is an important part of the who cardiovascular disease program based on earlier who experience and on the magnitude of the problem it was realized that concerted action was needed to combat this significant cause of cardiovascular morbidity and mortality the present program has been developed on the principle that sound knowledge and reliable technology already exist for implementing community programs for the prevention and control of rheumatic fever and rheumatic heart disease with the intention of extending activities toward nationwide coverage the first edition of this book was an excellent instrument to assist in the control of this disease the present volume with dissemination of knowledge to health personnel will contribute to closing the gap between knowledge and implementation and it links with who s endeavors in prevention and control of rheumatic fever and rheumatic heart disease ann rule dissects a case centered around an alluring young wife and the two men desperate for her love acute rheumatic fever and rheumatic heart disease is a concise yet comprehensive clinical resource highlighting must know information on rheumatic heart disease and acute rheumatic fever from a global perspective covering the major issues dominating the field this practical resource presents sufficient detail for a deep and thorough understanding of the latest treatment options potential complications and disease management strategies to improve patient outcomes divided into four distinct sections for ease of navigation acute rheumatic fever rheumatic heart disease population based strategies for disease control and acute and emergency presentations international editors and chapter authors ensure a truly global perspective covers all clinical aspects including epidemiology pathophysiology clinical features diagnosis management and treatment includes key topics on population based measures for disease control for effective primary secondary and tertiary prevention consolidates today s available information and guidance into a single convenient resource no one in their right mind travels across siberia in the middle of winter in a modified russian jeep with only a cd player which breaks on the first day for company but jacek hugo bader is no ordinary traveler as a fiftieth birthday present to himself jacek hugo bader sets out to drive from moscow to vladivostok traversing a continent that is two and a half times bigger than america awash with bandits and not always fully equipped with roads but if his mission sounds deranged it is in keeping with the land he is visiting for siberia is slowly dying or more accurately killing itself this is a traumatized post communist landscape peopled by the homeless and the hopeless alcoholism is endemic as are suicides murders and deaths from aids as he gets to know these communities and speaks to the people hugo bader discovers a great deal of tragedy but also dark humor to be shared amongst the reindeer shepherds the former hippies the modern day rappers the homeless and the sick the shamans and the followers of one of the six russian christs just one of the many arcane religions that flourish in this isolated impossible region this book provides a comprehensive guide to acute rheumatic fever arf and chronic rheumatic heart disease rhd beginning with a review of the history of these conditions the text continues with a discussion on the pathology and diagnosis of both arf and rhd the role of echocardiography management of the conditions including during pregnancy treatment and much more the book is accompanied by a dvd of echocardiographic videos to assist in the detection and diagnosis of the diseases akashvani english is a programme journal of all india radio it was valuable when diagnosing and managing heart disease in their day to day practice it is also of use for trainees in cardiology and general medicine especially those interested in applied cardiovascular pathophysiology army officer deidre roux has hidden her psychic abilities until now but ominous visions plague her and between the martial arts tactics her twin brother taught her and the hand to hand combat she learned in the army she s realizing just how important these skills are for her well being when a reporter moves in next door she s not sure just what to think dave carter owns a gun it is texas and comes to her rescue when her brother suddenly drops into her life again from there it s the normal stuff that women and men tend to do when they re getting to know each other boating swimming dancing except for one thing she s trying to keep her secret under wraps at all costs which is difficult to do when she s under surveillance by the fbi and people keep wanting her dead could a reporter who s not really a reporter prove he might just have what it takes to keep her safe for the long run it has become commonplace to say that the decline of rheumatic fever in europe and north america has little if any thing to do with medicine but to conclude that efforts to control the disease are futile would be an error leading to what could be termed public health malpractice the need for adequate treatment of patients suffering from acute rheumatic fever or chronic rheumatic valvular heart disease is obvious but control also means prevention and here too the need is obvious if only to lighten the burden on health care due especially to the treatment of patients with advanced forms of the disease the feasibility of and justification for rheumatic fever control programmes in developing countries has been often questioned a co operative study co ordinated by the world health organization has now demonstrated that systematic prevention of rheumatic fever recurrences not only benefits the patients concerned but also has economic advantages primary prevention by systematic penicillin treatment of all streptococcal throat infections is at present beyond the reach of many health care systems and anti streptococcal vaccination is still in the research phase the mainstay of the combat against rheumatic heart disease thus remains 7 rheumatic fever secondary prevention the long term monthly administration of penicillin injections to identified patients this requires among other things that penicillin be
