editing the journal *Minerva* being a central figure in the congress of cultural freedom serving as a founding member of the editorial board of the *Bulletin of Atomic Scientists* and being a member of the International Council on the Future of the University. Shils recognizes that a unity of concern runs through his many theoretical writings and activities. Early in his life the concern was expressed as understanding the character of consensus during the last fifteen years of his life. He refined his understanding of consensus through investigation of the nature of collective self-consciousness that concern was the structure and character of the moral order of a society and in particular liberal democratic society. Accompanying the autobiography are two unpublished essays: *Society, Collective Self-Consciousness, and Collective Self-Consciousnesses* and *Collective Self-Consciousness and Rational Choice*, two areas of intellectual concern discussed in the autobiography. The book contains a fascinating discussion of many of the people Shils knew throughout his illustrious career: Robert Park, Louis Wirth, Talcott Parsons, Karl Mannheim, Michael Polanyi, Audrey Richards, Karl Popper, Robert Merton, and many others. They represent Shils' final formulations on the character of society and its moral order. As such, it is a most important contribution both to the history of the social sciences in the twentieth century and to sociological theory. Documents of Life was originally published in 1983 and became a classic text providing both a persuasive argument for a particular approach and a manifesto for social research. As a critique of anti-humanist methodology in the social sciences, it championed the use of life stories and other personal documents in research which are now widely used. Today this book is a substantially revised and expanded version which takes on recent developments, providing numerous illustrations from a range of life documents. The book traces the history of the method, examines ways of doing life story research, and discusses the many political and ethical issues raised by such research. The whole book has been substantially rewritten, and this book considers the methodological and theoretical questions associated with the use of life stories, oral histories, personal narratives, autobiographies, and

voyages and sociology explores the transatlantic  
journeys which have inspired american and european  
sociologists and contributed to the development of  
sociology in europe and in north america furthering our  
understanding of the very complex processes which  
affect the diffusion of ideas it sheds light on the  
diverse influences which come into play be they on an  
individual institutional or political level with an  
international team of experts investigating the  
reciprocal influence of sociological thought on either  
side of the atlantic this volume will appeal to any  
scholar interested in the history of sociology the  
mutual influence of systems of thought and the  
migration of ideas this volume offers intellectual  
portraits of eleven giants of the modern social  
sciences it is bound by two central themes the first is  
that there is a fundamental unity behind the various  
forms of social science there is a general social  
science as well as a variety of social science  
disciplines the second theme is that a biographical  
approach is a useful tool for making clear some of the  
central ideas of social science by looking at the lives  
and achievements of selected masters we should be  
better able to understand the fundamental nature or  
natures of social science in order to determine which  
figures should be regarded as masters schellenberg  
defines the three main kinds of work he sees as central  
for social science first is the work of basic discovery  
done by searchers who made especially important  
contributions to empirical work in the social sciences  
the persons he selected for special treatment here are  
louis leakey mary leakey margaret mead and b f skinner  
he then considers the work of theory choosing for  
examination seers who had made especially important  
theoretical contributions john dewey talcott parsons  
and kenneth boulding schellenberg next examines those  
social scientists who worked to seek changes in society  
these were the shakers or social reformers in  
schellenberg s view these come in three main subtypes  
and he sought to include at least one example of each  
gunnar myrdal and alva myrdal as social engineers c  
wright mills as a rebellious social critic and daniel

patrick moynihan as one whose contribution was made more directly into the world of politics schellenberg's exploration of the lives of these eleven masters of twentieth century social science reveals many surprises and ironies while he points out major contributions he also has felt free to make criticisms as he has said these were all real persons with failings and foibles as well as persons of great achievement i felt that the examination of sociology and catholic social teaching contemporary theory and research contains essays by key scholars in the territory where catholic social thought and secular sociology meet and offers a much needed alternative to the relativism and individualism that so often characterize social scientific analysis today contributors to this volume argue that catholic social teaching as articulated so powerfully today in recent papal encyclicals and major summations such as the compendium of the social doctrine of the church offers a powerful moral framework for addressing today's pressing social problems this is especially true since many of its tenets find solid support in social scientific research on the nature of the person and the workings of culture and social institutions sponsored by the society of catholic social scientists and including work by sociologists from both the society and the pontifical academy of social sciences this volume is offered in the spirit of pope john paul ii's exhortation to draw from contemporary social science whatever can help the church better understand contemporary social issues and trends and thus better serve humanity specific articles address such topics as the church as a virtual nation in the international arena changing cultural norms regarding deviance the historical and contemporary relationship between catholicism and mainstream academic sociology empirical support for a natural law perspective on family relations the social psychology of happiness and moral behavior among emerging adults the sociology of knowledge from a distinctively catholic perspective and how the principles of subsidiarity and solidarity can be used to analyze and evaluate the functioning of institutions like the family education and the state each author also offers some autobiographical reflections on how they relate sociology and their life

country retreated from racially specific remedies and we trace the education reformer geoffrey canada s efforts to transform the lives of inner city children with ambitious interventions even as other reformers sought to help families escape their neighborhoods altogether duneier offers a clear eyed assessment of the thinkers and doers who have shaped american ideas about urban poverty and the ghetto the result is a valuable new estimation of an age old concept
