aesthetics isn't the only thing that you should be striving for when you design a template when creating technical documentation such as user manuals and online help systems usability readability and simplicity are just as crucial the design must please the eye and at the same time communicate the content clearly paragraph styles and character styles should be efficient to use when writing the document the layout process should be automated as much as possible as user assistance documents are frequently updated an automated layout process is much more important here than in other kinds of books for example when you insert a new paragraph into a document this shouldn't result in you having to manually tweak all subsequent page breaks not to mention page numbers cross references the table of contents and the index setting up templates and style
