from a walled off enclave of towering plants smart villas and sparkling swimming pools a surreal bubble of pure americana known as the green zone the us led coalition provisional authority under imperial viceroy I paul bremer iii attempted to rule iraq in the first twelve months after the fall of saddam hussein s regime drawing on hundreds of interviews and internal documents rajiv chandrasekaran tells the memorable story of this ill prepared attempt to build american democracy in a war torn middle eastern country detailing not only the risky disbanding of the iraqi army and the ludicrous attempt to train the new police force but also bringing to light a host of lesser known yet typical travesties among them the aide who based baghdad s new traffic laws on those of the state of maryland downloaded the contractor with no previous experience paid millions to guard a closed airport the people with prior experience in the middle east who were excluded in favour of lesser qualified republican party loyalists the case of the 24 year old who had never worked in finance put in charge of revitalising baghdad s stock exchange written with wit and urgency by a sharp eyed observer imperial life in the emerald city provides a hair raising portrait of the gap between the oz like green zone and the brutal reality of post war iraq it is american reportage at its best

a new york times critics top book of 2021 an impressive combination of diligence and verve deploying ackerman s deep stores of knowledge as a national security journalist to full effect the result is a narrative of the last 20 years that is upsetting discerning and brilliantly argued the new york times one of the most illuminating books to come out of the trump era new york magazine an examination of the profound impact that the war on terror had in pushing american politics and society in an authoritarian direction for an entire generation at home and abroad the united states has waged an endless conflict known as the war on terror in addition to multiple ground wars the era pioneered drone strikes and industrial scale digital surveillance weakened the rule of law through indefinite detentions sanctioned torture and manipulated the truth about it all these conflicts have yielded neither peace nor victory but they have transformed america what began as the persecution of muslims and immigrants has become a normalized feature of american politics and national security expanding the possibilities for applying similar or worse measures against other targets at home as the summer of 2020 showed a politically divided and economically destabilized country turned the war on terror into a cultural and then a tribal struggle it began on the ideological frontiers of the republican party before expanding to conquer the gop often with the acquiescence of the democratic party today s nativist resurgence walked through a door opened by the 9 11 era and that door remains open reign of terror shows how these developments created an opportunity for american authoritarianism and gave rise to donald trump it shows that barack obama squandered an opportunity to dismantle the war on terror after killing osama bin laden by the end of his tenure the war had metastasized into a bitter broader cultural struggle in search of a demagogue like trump to lead it reign of terror is a pathbreaking and definitive union of journalism and intellectual history with the power to transform how america understands its national security policies and their catastrophic impact on civic life

how america's failed wars in afghanistan iraq libya syria have resulted in increased threats at home from jihadist terrorism to the rise of western ultra nationalism in the management of savagery max blumenthal excavates the real story behind america's dealings with the world and shows how the extremist forces that now threaten peace across the globe are the inevitable flowering of america's imperial designs washington's secret funding of the mujahedin provoked the russian invasion of afghanistan in 1979 with guns and money the united states has ever since sustained the extremists including osama bin laden who have become its enemies the pentagon has trained and armed jihadist elements in afghanistan syria and libya it has launched military interventions to change regimes in the middle east in doing so it created fertile ground for the islamic state and brought foreign conflicts home to american soil these failed wars abroad have made the united states more vulnerable to both terrorism as well as native ultra nationalism the trump presidency is the inevitable consequence of neoconservative imperialism in the post cold war age trump's dealings in the middle east are likely only to exacerbate the situation

america one of the most religious countries in the world is also the most violent do god and war define the american spirit as much as apple pie and baseball this unsettling book illustrates how bellicose war like language is used to explain the spiritual quest it explores the violence of god tradition as it exists in all religions including buddhism and then examines how this dynamic is flipped with political leaders using spiritual and religious language to sell war to the general public although god and religion have often been used to sell war in the united states this has been especially true since 9 11 after surveying

the relationship of war and the spiritual quest in the major world religions this study concludes with an overview of how that dynamic has affected the contemporary american public discourse on war does this intermingling of war and spirituality prepare the population for the coming of war the institutional blending of the sacred and human aggression appear to be fundamental to human society the second section of the book concentrates on the political language and speeches of american politicians since 2002 following the run up to the iraq war and its continuation over the past decade showing how this mystical war conflation permeates american society

in this shocking exposé two government fraud experts reveal how private contractors have put the lives of countless american soldiers on the line while damaging our strategic interests and our image abroad from the shameful war profiteering of companies like halliburton kbr to the sinister influence that corporate lobbyists have on american foreign policy dina rasor and robert h bauman paint a disturbing picture here they give the inside story on troops forced to subsist on little food and contaminated water on officers afraid to lodge complaints because of halliburton s political clout on millions of dollars in contractors bogus claims that are funded by american taxpayers drawing on exclusive sources within government and the military the authors show how money and power have conspired to undermine our fighting forces and threaten the security of our country

we have long saved and curated objects from wars to commemorate the war experience these objects appear at national museums and memorials and are often mentioned in war novels and memoirs through them we institutionalize narratives and memories of national identity as well as international

power and purpose while people interpret war in different ways and there is no ultimate authority on the experiences of any war curators of war objects make different choices about what to display or write about none of which are entirely problematic good or accurate this book asks whose vantage points on war are made available and where for public consumption it also questions whose war experiences are not represented are minimized or ignored in ways that advantage contemporary militarism christine sylvester looks at four sites of war memory the national museum of american history the vietnam veterans memorial arlington national cemetery and selected novels and memoirs of the american wars in vietnam and iraq to consider the way war knowledge is embedded in differing sites of memory and display while the museum shows war aircraft and a laptop computer used by a journalist covering the american war in iraq visitors to the vietnam memorial or arlington cemetery find more prosaic and civilian items on view such as baby pictures slices of birthday cake or even car keys in addition memoirs and novels of these wars tend to curate ghastly horrors of wars as experienced by soldiers or civilians for sylvester these sites of war memory and curation provide ways to understand dispersed war authority and interpretation and to consider which sites invite viewers to revere a war and which reflect personal experiences that show the undersides of these wars sylvester shows that scholars policymakers and other citizens need to consider different types of situated memory and knowledge in order to fully grasp war rather than idealize it

at turns poignant funny philosophical and raw but always real the wolves of helmand is both a heartfelt homage to the marine brotherhood with whom biggio served and an expression of respect and love for the people of afghanistan who ultimately trusted shared and appreciated their purpose ten years after serving his country as a u s marine captain frank gus biggio signed up once again because he missed the brotherhood of the military leaving behind his budding law career his young wife and newborn son he was deployed to helmand province the most violent region in war torn afghanistan for reasons few would likely understand before reading this book riven by conflict and occupation for centuries because of its strategic location the region he landed in was at that time a hotbed of taliban insurgency as a participant in the landmark u s led operation khanjar biggio and his fellow marines were executing a new era military strategy focused largely on empowerment of the local population the offensive began with a troop surge designed to thwart the taliban but was more importantly followed by the restoration of the local government and real time capacity building among the withdrawn and destitute afghan people the wolves of helmand is unlike other war memoirs it takes us less into the action though there is that too and more into the quiet places of today s war zones yes you ll read of our marines stealth arrival in a single night our advanced weaponry and our pop up industrial village command centers you ll read as well about the ambushed patrols and the carnage of ieds but you will also read of the persistence humility ruggedness loneliness tedium diplomacy and humanity of our marines jobs there

which more than anything else reveals the magnitude of even the smallest victories completed years after the author's return from his mission the wolves of helmand is most of all a decade long self examination of a warrior's heart conscience and memory whether intended or not biggio's deep reflections and innate honesty answer every question you've ever wanted to ask about life and death in war and even questions you probably never thought to ask what calls a warrior to duty what makes sustains plagues and even breaks a warrior these are bigger questions than the ones impolite society pokes around when a veteran returns home did you kill anyone did you have to go why would you fight for another country why were we even there yet the answers to those queries are here too in this thoughtful memoir that will make you think about war family love and loss
