dead letters to nietzsche examines how writing shapes subjectivity through the example of nietzsche s reception by his readers including stanley rosen david farrell krell georges bataille laurence lampert pierre klossowski and sarah kofman more precisely joanne faulkner finds that the personal identification that these readers form with nietzsche s texts is an enactment of the kind of identity formation described in lacanian and kleinian psychoanalysis this investment of their subjectivity guides their understanding of nietzsche s project the revaluation of values not only does this work make a provocative contribution to nietzsche scholarship but it also opens in an original way broader philosophical questions about how readers come to be invested in a philosophical project and how such investment alters their subjectivity

## Letters to Me, When I Grow Up

In their new book Finn Egil Tønnessen and Per Henning Uppstad provide a set of theoretical and philosophical reflections on research in reading and dyslexia. It is a pleasure to welcome this book which reflects the many contributions made by researchers at the National Centre for Reading Education and Research in Stavanger, Norway. Usha Goswami, University of Cambridge, careful reflection on the concepts and methods used is a prerequisite for further development in any field of research. The authors think cognitive psychology has become too dominant in reading and dyslexia research, arguing that it should be combined with behaviourism and connectionism. In part by focusing on the concept of 'skill', the key components of a skill are claimed to be automaticity, awareness, and shifts between them. Reading is defined as an interpretative skill which should be viewed from the perspective of hermeneutics. The authors use these fundamental analyses and definitions to shed new light on the 'balanced approach to reading instruction', 'reading fluency', and other key concepts. The book also deals with problems in the definition of 'dyslexia' and proposes a method to arrive at clear and fruitful definitions. It concludes with a chapter trying to answer the question of in what sense or to what extent it can be claimed that reading and dyslexia research has made progress. The book mainly builds on articles published over the past 25 years by Professor Finn Egil Tønnessen at the National Centre for Reading Education and Research, Stavanger, Norway.
