open circuits is a photographic exploration of the beautiful design inside everyday electronics its stunning cross section photography unlocks a hidden world full of elegance subtle complexity and wonder our phones computers and appliances are made of hundreds of internal components each precisely engineered to perform a certain function but none intended to actually be seen through painstakingly executed vividly detailed cross section photography open circuits reveals the surprising and often accidental beauty hiding inside the electronic components that drive our everyday devices from resistors to leds usb cables to headphone jacks stepper motors to nixie tubes the book s arresting imagery transforms more than 130 components into delightful works of art as you visually dissect the components insides you ll learn about how they work and how they were made open circuits has something for everyone to appreciate whether you re a seasoned electrical engineer an amateur tinkerer or simply a lover of art and photography

## Amateur Radio Stations of the U.S. 1927

this is an unusual book combining as it does papers on astrobiology history of astronomy and sundials but after all woody sullivan is an unusual man in late 2003 i spent two fruitful and enjoyable months in the astronomy department at the university of washington uw working on archival material accumulated over the decades by woody for a book we will co author with jessica chapman on the early development of australian astronomy the only serious intellectual distraction i faced during this period was planning for an iau colloquium on transits of venus scheduled for june 2004 in england where i was down to present the cook paper i knew woody was also interested in transits and indeed anything remotely connected with shadows see his paper on page 3 and in discussing the preston meeting with him it transpired that his 60th birthday was timed to occur just one week later this was where the seed of woodfest began to germinate why not invite friends and colleagues to join woody in seattle and celebrate this proud event i put the idea to woody and others at uw they liked it and woodfest was born

## **Mineral Resources Bulletin 1984**

by the age of 20 Washburn was a mountain climbing wunderkind who had published four books most would consider this accomplishment enough for a lifetime but for Washburn it was only a beginning filled with exciting and entertaining anecdotes and with Washburn's breathtaking photos and maps on high is the first book to reveal in his own words his extraordinary life and work

## **Technical Manual 1944**

the futurist movement was founded and promoted by Filippo Tommaso Marinetti beginning in 1909 with the first futurist manifesto in which he inveighed against the complacency of cultural necrophiliacs and sought to annihilate the values of the past writing that there is no longer any beauty except the struggle any work of art that lacks a sense of aggression can never be a masterpiece in the years that followed up until his death in 1944 Marinetti through both his polemical writings and his political activities sought to transform society in all its aspects as Günter Berghaus writes in his introduction futurism sought to bridge the gap between art and life and to bring aesthetic innovation into the real world life was to be changed through art and art was to become a form of life this volume includes more than seventy of Marinetti's most important writings many of them translated into English for the first time offering the reader a representative and still startling selection of texts concerned with futurist art literature politics and philosophy
