excerpt from parks and park engineering in an age of many books every author must make his apology for a new volume the output of engineering treatises and text books is so great that for a time at least in certain branches further additions should be made only for very good and exceptional reasons the author of this little book believes that by reason of the dearth of information on the specialized subject treated a sufficient reason exists for the publication of his manuscript which for several years in abbreviated form he has used in his classes at lafayette college the magnitude of the park movement in america is only beginning to be appreciated by the average well informed person our larger cities already have their parks most of them but recently acquired and it will not be long before all of our american cities will have them also not merely a few small city squares but extensive modern parks reservations and playgrounds connected by parkways and boulevards this book is prepared principally for the benefit of the young and inexperienced engineer of construction the author hopes that it may be found useful to members of newly formed park associations and commissions the introduction and rapid spread of two eurasian mussel species dreissena polymorpha zebra mussel and dreissena rostriformis bugensis quagga mussel in waters of north america has caused great concern among industrial and recreational water users these invasive species can create substantial problems for raw water users such as water treatme the engineer is bearer of the nation s industrialization says the tower pictured on the front cover president park chung hee 1917 1979 was seeking to scale up a unified national identity through industrialization with engineers as iconic leaders but park encountered huge obstacles in what he called the second economy of mental nationalism technical workers had long been subordinate to classically trained scholar officials even as the country became an industrial powerhouse the makers of engineers never found approaches to techno national formation engineering education and training that koreans would wholly embrace this book follows the fraught attempts of engineers to identify with korea as a whole it is for engineers both korean and non korean who seek to become better critical analysts of their own expertise identities and commitments it is for non engineers who encounter or are affected by korean engineers and engineering and want to understand and engage them it is for researchers who serve as critical participants in the making of engineers and puzzle over the contents and effects of techno national formation india bounded by the majestic himalayan ranges in the north and edged by an endless stretch of golden beaches is the land of hoary tradition and cultural diverse vivid kaleidoscope of landscapes glorious historical sites and royal cities misty mountain hideaways colourful people rich civilizations and festivities craft india incredible recent years have witnessed the educational scene especially the higher education sector in the state undergoing a sea change in respect of quality diversity and accessibility in tune with the global trends kerala s surge in the educational front is to be viewed in the backdrop of the country s great legacy in education india has been a major seat of learning for thousands of years the country was home to takshashila the first university in the world and aryabhama the inventor of the digit zero in fact education in kerala has now become more value added and affordable thanks to the pro active initiatives of the state government and active involvement of the private sector moreover in the higher education market kerala has a significant edge in respect of cost which means that there would be growing influx of candidates into the state from outside the state for better and affordable professional education in the days to come with the most sought after professionals and excellent network of institutes kerala is becoming the very preferred educational destination in the world and we are equipped for you with some elucidations which step up her significance in the educational map in campus plus we propose some valuable information along with a number of educational institutes in the state which will be useful for the students and parents in the higher education scenario engineering lies behind almost every type of entertainment from the press that printed this book through special effects in many movies to the creation of rides based
