Overcoming Students' Misconceptions in Science 2017-02-28

this book discusses the importance of identifying and addressing misconceptions for the successful teaching and learning of science across all levels of science education from elementary school to high school it suggests teaching approaches based on research data to address students common misconceptions detailed descriptions of how these instructional approaches can be incorporated into teaching and learning science are also included the science education literature extensively documents the findings of studies about students misconceptions or alternative conceptions about various science concepts furthermore some of the studies involve systematic approaches to not only creating but also implementing instructional programs to reduce the incidence of these misconceptions among high school science students these studies however are largely unavailable to classroom practitioners partly because they are usually found in various science education journals that teachers have no time to refer to or are not readily available to them in response this book offers an essential and easily accessible guide

Process Oriented Guided Inquiry Learning (POGIL) 2008

pogil is a student centered group learning pedagogy based on current learning theory this volume describes pogil s theoretical basis its implementations in diverse environments and evaluation of student outcomes

Analytical Chemistry 2014-12-31

an essential guide to inquiry approach instrumental analysis analytical chemistry offers an essential guide to inquiry approach instrumental analysis collection the book focuses on more in depth coverage and information about an inquiry approach this authoritative guide reviews the basic principles and techniques topics covered include method of standard the microscopic view of electrochemistry calculating cell potentials the berrilambert atomic and molecular absorption processes vibrational modes mass spectra interpretation and much more

Transforming Urban Education 2014-04-03

transformations in urban education urban teachers and students working collaboratively addresses pressing problems in urban education contextualized in research in new york city and nearby school districts on the northeast coast of the united states the schools and institutions involved in empirical studies range from elementary through college and include public and private schools alternative schools for dropouts and museums difference is regarded as a resource for learning and equity issues are
