complementary and alternative medicine cam is frequently conceptualized as nothing but placebo i will argue and provide the evidence in this chapter that apart from potential specific effects cam is a clever way of inducing generic self healing effects jerome d frank s model serves to conceptualize this cam practitioners normally establish good relationships and take time to listen to their patients they have very elaborate rituals to enact those effects they demonstrate their prowess and they provide alternative explanatory models that make sense at least to those patients that consult with them most important of all perhaps is the fact that nearly all cam modalities require patients to become active thus serving as a catalyst to mobilize resources and stimulate the experience of self efficacy the latter is debatedly one of the most important nonspecific effects of therapy hence it is misleading to conceptualize cam effects as nonspecific effects rather it seems to be a way of activating a self healing response that is very specific in itself and indeed more specific than purportedly specific pharmacologic effects
