~~and other educators who use the material on a~~
regular basis we had another successful
workshop on october 29 th 1997 we introduced
the allstar website and kiosk to about twenty
science and history teachers from dade county
public schools dcps most teachers were from
middle schools although we had some from
elementary schools also we provided several
demonstrations of the allstar material to
local schools in the dade county public
schools dcps system we used the allstar
material with fiu s summer immersion program
for flame students this program includes a
high number of minority students interested in
science and engineering we also presented the
material at national science teachers
association nsta and national congress on
aviation and space education ncase conferences
and will be presenting the material at the
southeast florida aviation consortium sefac we
provided two on site workshops in the nsta
conference with total attended of about 70
teachers the

~~this guide provides teachers and students many~~
opportunities chapters within the guide
present the history of rocketry national
aeronautics and space administration s nasa s
21st century space exploration policy rocketry
principles and practical rocketry these topics
lay the foundation for what follows a wealth
of dynamic rocket science classroom activities
that work the activities focus on sir isaac
newton s laws of motion and how they apply to
rockets they incorporate cooperative learning
problem solving critical thinking and hands on
involvement they support national and state
standards for science mathematics and
technology across many grade levels all of the
activities are designed with the classroom in
mind they include clear descriptions
background information for the teacher and
student detailed procedures and tips lists of
readily available materials assessments
questions for discussion and extensions the
activities are designed to foster excitement
and a passion for learning it has been created
as a two to six week classroom unit depending
upon the grade level of the students but
individual activities can be extracted and
used as stand alone classroom experiences
teachers will find activity objectives and
principles clearly stated along with the
vocabulary terms necessary for understanding
the principles involved the original rockets

ebundle printed book and ebook download code
this facilitators guide and corresponding
interactive student notebook addresses a
growing need for solid instruction inquiry and
development of 21st century skills in aviation
at the high school level this instructor guide
delivers the resources necessary for high
school teachers to provide an excellent
introduction to aviation the guide promotes
aviation as an innovative field and includes
exploration of aviation as an industry and the
study of the fundamentals of flight while
exploring the various career opportunities
available within the aviation industry the
guide and accompanying digital materials
include plans for research based teaching of
technical information standards based
activities assessments and resources all

~~designed to engage students different learning~~
styles it is intended to be used by
professionals entering a high school aviation
classroom with varying industry expertise and
experiences all lessons are planned for a
standard 50 minute lesson time or could be
combined to accommodate block scheduling
lessons may be taught independently within any
subject science technology engineering math
history language arts or used as a
comprehensive aviation themed curriculum each
lesson plan includes an introduction education
standards essential questions purpose how to
accomodate students with special needs
preparation comprehensive directions for the
lesson activity steps instructor guidance and
assessments the curriculum is intended to be
used for grade levels 9 12 and is aligned to
next generation science standards common core
state standards for math and language arts and
north dakota aviation standards this
curriculum provides 14 essential topics
divided into chapters to engage the next
generation of the aviation workforce it has
been backwards designed that is goals were set
before choosing instructional methods and
forms of assessment topics include the science
of flight aviation history career paths
aerodynamics principles of navigation and
flight control and related operations and
services as part of a rigorous curriculum this
