The Enchantment of Modern Life 2001-08-05 it is a commonplace that the modern world cannot be experienced as enchanted that the very concept of enchantment belongs to past ages of superstition jane bennett challenges that view she seeks to rehabilitate enchantment showing not only how it is still possible to experience genuine wonder but how such experience is crucial to motivating ethical behavior a creative blend of political theory philosophy and literary studies this book is a powerful and innovative contribution to an emerging interdisciplinary conversation about the deep connections between ethics aesthetics and politics as bennett describes it enchantment is a sense of openness to the unusual the captivating and the disturbing in everyday life she guides us through a wide and often surprising range of sources of enchantment showing that we can still find enchantment in nature for example but also in such unexpected places as modern technology advertising and even bureaucracy she then explains how everyday moments of enchantment can be cultivated to build an ethics of generosity stimulating the emotional energy

and honing the perceptual refinement necessary to follow moral codes throughout bennett draws on thinkers and writers as diverse as kant schiller thoreau kafka marx weber adorno and deleuze with its range and daring the enchantment of modern life is a provocative challenge to the centuries old narrative of disenchantment one that presents a new alter tale that discloses our profound attachment to the human and nonhuman world

Anthropology and Modern Life 2021-03-28 franz boas 1858 1942 is widely regarded as the founder of american anthropology he influenced an astonishing variety of scholars and researchers from the anthropologists margaret mead and ruth benedict to the philosopher w e b dubois and novelist zora neale hurston towards the end of his life he also lectured widely in an attempt to educate the public on the dangers of nazi ideology anthropology and modern life demonstrates the incredibly rich and fertile range of boas s thought engaging with controversies that resonate loudly today the problem of race and racial types heredity versus environment the significance of intelligence tests open versus closed societies the nature versus nurture debate and nationality and nationalism believing passionately that science should be used to break down racial and cultural barriers from the book s very opening boas shatters the myth

that anthropology is simply a collection of curious facts about exotic peoples thanks to Boas's influence anthropologists and other social scientists began to see that differences among the races resulted not from physiological factors but from historical events and circumstances and that race itself was a cultural construct this Routledge Classics edition includes a new foreword by Regna Darnell and an introduction and afterword by Herbert S. Lewis who details Franz Boas's life influence and ideals in writing the present book I desired to show that some of the most firmly rooted opinions of our times appear from a wider point of view as prejudices and that a knowledge of anthropology enables us to look with greater freedom at the problems confronting our civilization Franz Boas Anthropology and Modern Life

The Painting of Modern Life 1985 from t j
clark comes this provocative study of the
origins of modern art in the painting of
parisian life by edouard manet and his
followers the paris of the 1860s and 1870s was
a brand new city recently adorned with

boulevards cafes parks great exhibitions and suburban pleasure grounds the birthplace of the habits of commerce and leisure that we ourselves know as modern life a new kind of culture quickly developed in this remade metropolis sights and spectacles avidly appropriated by a new kind of consumer clerks and shopgirls neither working class nor bourgeois inventing their own social position in a system profoundly altered by their very existence emancipated and rootless these men and women flocked to the bars and nightclubs of paris went boating on the seine at argenteuil strolled the island of la grande jatte enacting a charade of community that was to be captured and scrutinized by manet degas and seurat it is clark s cogently argued and profusely illustrated thesis that modern art emerged from these painters attempts to represent this new city and its inhabitants concentrating on three of manet s greatest works and seurat s masterpiece clark traces the appearance and development of the artists favorite themes and subjects and the technical innovations that they employed to depict a way of life which under its liberated pleasure seeking surface was often awkward and anxious through their paintings manet and the impressionists ask us and force us to ask ourselves is the freedom offered by modernity a myth is modern life heroic or monotonous

Design in Modern Life and Industry 2016-08-29 it s time for us to re examine the past our lives are infinitely richer if we take the time to look at what the greeks and romans have given us in politics and law religion and philosophy and education and to learn how people really lived in athens rome sparta and alexandria this is a book with a serious point to make but the author isn t simply a classicist but a comedian and broadcaster who has made television and radio documentaries about humour education and dorothy parker this is a book for us all whether political

cultural or social there are endless parallels between the ancient and modern worlds whether it s the murder of caesar or the political assassination of thatcher the narrative arc of the hit hbo series the wire or that of oedipus the popular enthusiasm for the emperor titus or president obama over and over again we can be seen to be living very much like people did 2 000 or more years ago

John Vassos 2023-04-19 hebrew and hellene explores the intellectual and personal relations among john henry newman matthew arnold and walter pater three figures

important in the development of nineteenth century english thought and culture fundamentally concerned with the humanistic vision of arnold and pater especially as they adapted the traditional religious culture to the needs of their generation david delaura also recognizes newman s central role to a far greater degree than has been realized newman assumed a commanding position in the thought of the two younger men delaura seeks to define the mechanics of the process by which the conservative religious humanism of newman could be exploited in the fluid relativistic and aesthetic humanism of pater the careers of arnold and pater are viewed as a continuing effort to reconcile the opposing forces of one of the central modern myths the great cultural struggle between religious and secular values arnold s hebraism and hellenism delaura traces this important movement in nineteenth century culture by studying the development of key phrases and ideas in the writings of the three men the secularization of newman s ideal of inwardness in arnold s criticism and culture and in pater s impassioned contemplation the shared emphasis on an elite culture the growing tendency to identify culture with the functions of traditional religion newman as the supreme apologist of both religious orthodoxy and the older oxonian tradition offered a rich arsenal to the defenders of a

literary culture increasingly threatened by the utilitarian spirit and by a rising scientific naturalism moreover with the appearance of his apologia in 1864 the mystery and the miracle of Newman's personality intrigued a new literary generation in Hebrew and Hellenic Delaura looks beyond the debates of the late Victorians the immediate inheritors of this legacy to the continuing twentieth century discussion of the nature of literature its place in the humanizing process and its role in a science dominated civilization he finds the problems faced by Pater Arnold and Newman and some of their solutions surprisingly relevant to unfinished contemporary debate

Sustainable Development Goals in Northeast

India 2021-12-10 as a historical inquiry and synthesis this intellectual history is the first study to apply the ideal type or model building methodology of Otto Hintze 1861-1940 to western historical thought or to what R. G. Collingwood called the idea of history for it contains succinct and useful models for seeing and teaching classical Christian and modern professional historiography religion and the rise of history is also the first work to suggest that in addition to his well known paradoxical simul and or at the same time way of thinking and viewing life Martin Luther also held to a way that was deeply

incarnational dynamic and or in with and under this dual vision and a lutheran ethos strongly influenced leibniz hamann and herder and was therefore a matter of considerable significance for the rise of a distinctly modern form of historical consciousness commonly called historicism in protestant germany smith s essay suggests a new time period for the formative age of modern german thought culture and education the cultural revolution in germany this age began in the early 1760s and culminated in 1810 with the founding of the university of berlin the first fully modern and modernizing university this university first became the recognized center for the study of history however through the work of leopold von ranke 1795 1886 here the story shows how a young ranke derived his individualizing way of thinking and viewing life mainly from luther how his life work is the best example in western literature of the rise of history from a calling to a profession and how the three way discussion between troeltsch meinecke and hintze concerning the nature of modern historical thought was of central importance for the reorientation of western social historical thought in the twentieth century

Vol.1/2005-2015 Vol.2/2014-2021 Vol.3 2005 a
practical and clarifying approach to aging

and aging related diseases providing a thorough and extensive theoretical framework. The biostatistics of aging from Gompertzian mortality to an index of aging relatedness addresses the surprisingly subtle notion with consequential biomedical and public health relevance of what it means for a condition to be related to aging. In this pursuit the book presents a new quantitative method to examine the relative contributions of genetic and environmental factors to mortality and disease incidence in a population with input from evolutionary biology, population genetics, demography, and epidemiology. This medically motivated book describes an index of aging relatedness and also features original results on the asymptotic behavior of the minimum of time to event random variables which extends those of the classical statistical theory of extreme values. A comprehensive and satisfactory explanation based on biological principles of the Gompertz pattern of mortality in human populations, the development of an evolution based model of causation relevant to mortality and aging related diseases of complex etiology, an explanation of how and why the description of human mortality by the Gompertz distribution can be improved upon from first principles, the amply illustrated analysis of real world data including a program

for conducting the analysis written in the freely available statistical software technical appendices including mathematical material as well as an extensive and multidisciplinary bibliography on aging and aging related diseases the biostatistics of aging from Gompertzian mortality to an index of aging relatedness is an excellent resource for practitioners and researchers with an interest in aging and aging related diseases from the fields of medicine biology gerontology biostatistics epidemiology demography and public health

Men Behaving Differently 1986 first published in 2002 visual words provides a unique and interdisciplinary evaluation of the relationship between images and words in this period Victorian England witnessed a remarkable growth in literacy culminating in the new literary nationalism that emerged at the beginning of the twentieth century each chapter explores a different aspect of this relationship the role of Dickens as the heroic author the book as an iconic object the growing graphic presence of the text the role of the graphic trace the sister arts pen and pencil tradition and the competition between image and word as systems of communication examining the impact of such diverse areas as advertising graphic illustration narrative painting frontispiece portraits bibliomania

Anthropology and Modern Life 2022-02-16 this book grapples with fundamental questions about the evolving nature of pictorial representation and the role photography has played in this ongoing process these issues are explored through a close analysis of key themes that underpin the photography practice of canadian artist jeff wall and through examining important works that have defined his oeuvre wall s strategic revival of the picture has had a resounding influence on the development of contemporary art photography by expanding the conceptual and technical frameworks of the medium and introducing a self reflexive criticality naomi merritt brings a new and original contribution to the scholarship on one of the most significant figures to have shaped the course of

contemporary art photography since the 1970s and shines a light on the multilayered connections between photography and art this book will be of interest to scholars in the history of photography art and visual culture and contemporary art history
